Methodological explanations:

The presented data are collected by the survey on quarterly construction activity. The report is filled by enterprises that perform construction works. The survey does not include all enterprises, but only those, important for construction activity.

Value indices at constant prices are obtained by dividing indices at current prices by appropriate indices of producer's prices of elements and materials incorporated in construction.

More detailed methodological explanations of this survey are available on the website of the Office http://webrzs.stat.gov.rs.

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).
