According to preliminary data, the turnover of retail trade in the Republic of Serbia in November 2005, compared to November 2004, grew by 45.7% at current prices and by 25.2% at constant prices. In November 2005, compared to the previous month, the turnover of goods is decreased by 3.7% at current prices and by 4.9% at constant prices.

In the first eleven months 2005, compared to the same period 2004, the turnover of retail trade increased by 50.6% at current prices and by 29.3% at constant prices.

Notes: The indices published in this communication have been obtained from the Monthly Survey of Retail Trade (TRG-10), monthly survey which has been carried out since January 2003 on the sample of chosen enterprises of all types of property that deal with retail trade, no matter whether retail trade is their main activity or not. Large enterprises have been included in the sample intentionally, on the basis of the made turnover in retail sale in the previous period, while others have been chosen by the random sample method.

The value of turnover in retail sale since 1 January 2005 includes the VAT, unlike the previous period (basis) when the turnover tax was included.

Turnover at constant prices indices have been obtained by deflating the current prices indices by corresponding indices of retail prices, electricity excluded.

All published indices should be treated as preliminary results, which means there some corrections can appear on the basis of the obtained results in the quarterly statistical survey – the Quarterly Survey of Retail Trade (TRG-16), published as a separate communication.
