Livestock number in the Republic of Serbia, 1998- 2006

NOTES:

The presented data are preliminary results on the number of livestock and poultry and on the number of breeding heads, by types.

Data on the number of livestock and poultry, referring to agricultural enterprises and cooperatives are collected by regular annual reports, while the data related to private agricultural holdings and households are obtained by annual Livestock Number Survey. Starting with 2006, the Survey is carried out as of 01. 12. The two – stage stratified sample has been applied in the survey, covering about 1 % of households.

The presented data are as of 01. 12. 2006, in the Republic of Serbia, and when compared to the previous data, as of 15. 01. 2006, total number of cattle increased by 0.9 %, of pigs by 24.5 %, of horses by 16.7 % and of goats by 17.0 %. Number of cows and heifers in calf decreased by 7.8 %, as well as number of sows and sows of first farrow by 9.3 %, of sheep by 3.3 %, of breeding ewes by 1.3 % and total number of poultry decreased by 7.3 %.

Referring to data analysis, it should be noted that critical moment for livestock and poultry number has been changed.

Data related to the Republic of Serbia do not include data on Kosovo and Metohia.

Final data on livestock number, by types and categories, as well as data on livestock balance, increase and livestock production will be published in June.
