At constant prices	103,0	108,1	109,4	103,2

3. Turnover structure by groups of goods, in %

Retail trade

	Total	Foodstuffs and alcoholic drinks	Tobacco	Clothes and footwear	Furniture, floor coverings & household appliances	Pharmaceuticals	Motor vehicles, motorcycles & parts and accessories	Fuel (for motor vehicles and motorcycles)	Other
IV – VI	100	24,1	2,1	7,3	4,8	9,8	8,5	19,0	24,4
I – VI	100	24,4	2,1	7,0	4,8	10,4	8,5	18,3	24,5

Wholesale trade

	Total	Agricultural raw goods and live animals	Foodstuffs and alcoholic drinks	Tobacco	Pharmaceuticals	Hard, fluid and gas fuels	Construction materials and equipment (wood and metal)	Chemical products	Machines, appliances and accessories	Other
IV – VI	100	7,8	19,0	3,8	7,8	13,9	11,7	5,6	5,8	24,6
I – VI	100	7,8	18,3	3,8	7,9	13,3	10,8	7,0	6,2	24,9

Methodological Notes: The data published in this communication were obtained from the regular Quarterly Survey of Retail Trade, the survey that has been carried out since 2003 and the Quarterly Survey of Wholesale Trade, implemented starting from 2006, which are carried out on the sample of enterprises of all types of ownership. The units observed are trade enterprises, as well as those enterprises not featuring trade as the prevailing activity, however including business units that deal with retail, i.e. wholesale trade. The data are collected according to the Classification of Activities (CA) and therefore all trade sub-groups (and intermediation) are comprised, except services.

Retail trade turnover presents the value of sold goods, sold (delivered) to end-users, in the first place to the population for individual consumption and household usage, as well as to physical persons and legal entities for business purposes.

Wholesale trade turnover is the sale of goods to commercial enterprises and shops that are engaged in retail trade of goods, the sale of goods to other wholesalers, as well as the goods sales to large-size customers for their own needs.

The turnover value of retail trade and wholesale trade includes the Value added tax (VAT).

Turnover indices at constant prices are obtained by deflating the indices at current prices by corresponding indices of retail prices of goods, electricity excluded, i.e. by the price indices of industrial products in wholesale trade.

Seasonally adjusted retail trade indices at constant prices are published in "Monthly Statistical Review", from number 3/2008.
