Production of some main crops, plums and grapes

Thous. tons

Notes

Data on expected yield of late crops, plums and grapes, are gathered by reports for agricultural enterprises and cooperatives and statistical estimations which are conducted by statistical estimators for individual agricultural producers.

According to these data maize production is expected to amount 6102 thousands of tones in 2008 which is by 56.3% greater than production in previous year.

Compared to 2007 decrease in production is expected for sugar beet by 27.5%, while production of sunflowers, soya and potatoes is expected to increase by 52.9%, 16.6% and 13.7%.

Compared to ten-year average (1998-2008) expected production of maize, sunflower and soya is by 14.4%, 41.3% and 30.2% larger, while production of potatoes and sugar beet is smaller by 0.2% and 0.8% respectively.

Referring to fruit, compared to realized production in previous year, smaller production of plums is expected in Republic of Serbia by 13.3%, while the production of grapes is expected to increase by 4.4%. In the same time both plums and grapes production is larger compared to ten-year average (1998-2008), by 34.2% for plums and 4.6% for grapes.

Final data on production of late crops fruit and grapes in 2008, will be available at the end of December.
