Notes:

Data on expected production of wheat, early fruit and areas sown with maize, sugar beet, sunflower and soya are as of 25.05.2009.

According to the state of crops on the estimation day, production of wheat is expected to amount 1987 thousand tons in the Republic of Serbia, which is by 5.2% less than production realized in the previous year and by 4.0% less than ten - year average production (1999-2008).

Referring to fruit, decrease in production is expected for raspberries by 3.5% and cherries by 10.0% and increase in production of sour cherries by 3.9% and apricots by 27.1%, when compared to the previous year.

Compared to 10 - year average, increase in the production is expected for cherries by 10.7%, sour cherries by 20.5% and apricots by 30.1%, while production of raspberries is expected to decrease by 3.2%.

Areas under maize, sunflower and soya decreased by 5.3%, 17.4% and 0.9% respectively, while areas under sugar beet increased by 26.4%, compared to the last year.

Compared to 10 - year average, areas under sunflower are smaller by 11.8%, and areas under maize by 0.8%, while areas under sugar beet and soya are larger by 3.5% and 12.5% respectively.

Final data on spring sowing period 2009 will be available at the end of July.
