Notes: The indices published in this communication are obtained from the Monthly Survey of Retail Trade (TRG-10). Since 2009, the sample involves all big and middle-sized enterprises, registered in the sections 50 and 52 of the Classification of Activities, while small enterprises have been selected by the random sample method. The sample also involves certain number of enterprises registered in other sections of activities, but performing the retail trade activity.

The value of turnover in retail trade includes the VAT.

The turnover indices at constant prices are obtained by deflating the indices at current prices by the corresponding indices of retail prices, electricity excluded.

All published indices ought to be regarded as preliminary results, meaning that some corrections can appear on the basis of the obtained results in the quarterly statistical survey – the Quarterly Survey of Retail Trade (TRG-16), which is published as a separate communication.

Seasonally adjusted retail trade turnover indices at constant prices are published in “Monthly statistical review”, from number 3/2008.
