

COMMUNICATION

CN30

number 170 - Year LX. 21.06.2010.

Price Statistics

SRB170 CN30 210610

Retail prices of agricultural produces - from 1. VI to 7. VI 2010. -

Retail prices of agricultural produces are monitored twice a month, on green market day being between 1st - 7th and 15th - 21st in the month. They are monitored in stores and on markets with the greatest turnover. The prices are those of the most important and selected agricultural food products depending on the season. The monitored prices for each products are: the most frequent, the lowest and the highest ones.

The most frequent price at the monitoring place (store in the socially-owned and private sector or green market) is that for which the selected product is sold in greatest quantities. The most frequent price in town is one of the three most frequent prices in stores (socially-owned, private) or at green market, depending where the largest quantity of one product is sold on the reference day.

The lowest and highest prices in town are price limits.

Kilogram is used as the unit of measurement, except for liter and pieces, which are used for milk and hen eggs.

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohia and therefore these data are not included in the coverage for the Republic of Serbia (total).

(More detailed: Instructions for price monitoring, Methodological Materials, number 306, edition of the Federal Statistical Office, 1987).

The most frequent, lowest and highest prices of agricultural products - from 1. VI to 7. VI 2010. -
