Labor Force Survey

SERB 180 RS10 300610

Labor Force Survey

April 2010

- Preliminary results -

Introductory notes

Labor Force Survey represents a study survey that most completely considers the labor force status and fluctuations in the labor market.

While conducting this survey, the methodological solutions, harmonized with the recommendations and definitions of the International Labor Organization – ILO and EUROSTAT requirements (European Statistical Office) were applied and thereby, the most important source was obtained for the international comparison of data of the Republic of Serbia and other countries, regarding the field of labor statistics. The frame for the sample selection is based on the 2002 Census of population, households and dwellings.

The survey covered about 7000 households of Central Serbia and Vojvodina. The data were collected relative to the demographic features of the whole population. For the population aged 15 and over, the data on their working activity were also collected. The total of 20616 persons were interviewed and for 18069 persons the data regarding their working activity were obtained, which equals to 0.3% of the total number of persons aged 15 and over.

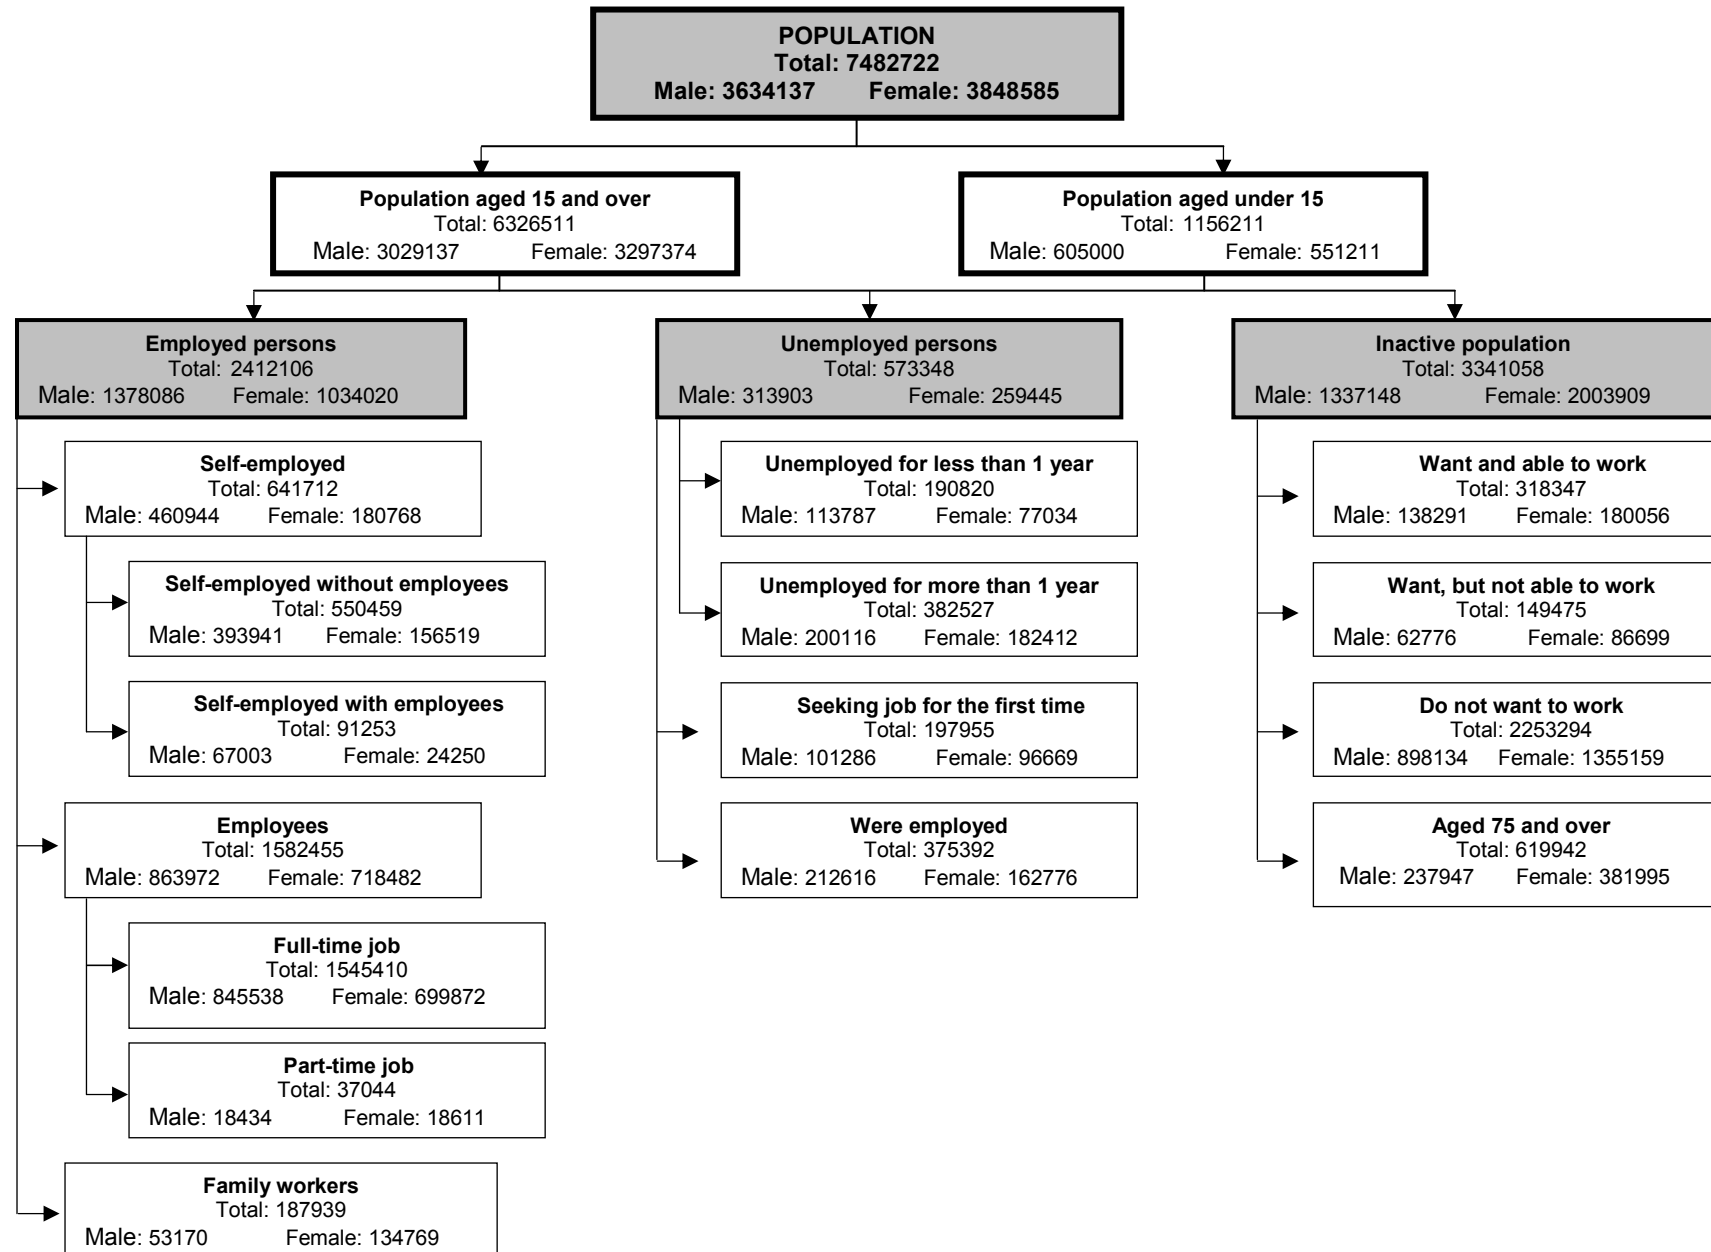

Labor Force Survey was carried out in April 2010 and the observation period was 19-25 April 2010.

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohia and therefore these data are not included in the coverage for the Republic of Serbia (total).

Structure of active population aged 15 and over, April 2010
- Republic of Serbia -

Review of basic population sets of the Republic of Serbia, April 2010

1. Population by activity, sex, region, type of settlement, educational attainment and age, April 2010

Main Definitions

The Labor Force Survey observes population aged 15 and over, relative to the activity status in the respective week and not according to formal status of the persons interviewed.

The term **employed** here anticipates the persons who did a job for at least one hour in the respective week and were duly remunerated (payments in money or in kind), as well as the persons who were employed and were absent from work in the observed week.

Family workers are the persons rendering help, i.e. service to other household members in running family business or agricultural holding and were not remunerated for their work.

The term **unemployed** refers to the persons who, in the respective week did not perform any work for remuneration and who did not have a job they were absent from and which they could carry on after the absence, in case they met the conditions as follows:

- In the last four weeks these persons undertook active steps to find job and if a job was offered, they would be able to start working within two weeks time;
- In the last four weeks these persons undertook no active steps to find job, since they had already found a job and were about to start working after the respective week, latest within the following three – month period.

Active population (labor force) includes all employed and unemployed persons aged 15 and over.

Inactive population consists of the population aged 15 and over who were not categorized as active population.

Activity rate presents the percentage share of active population in total population aged 15 and over.

Employment rate presents the percentage share of employed population in total population aged 15 and over.

Unemployment rate presents the percentage share of unemployed population in total number of active population.

Inactivity rate presents the percentage share of inactive population in total population aged 15 and over.
