**Indices of realized production of wheat and expected yields of late crops  
previous year = 100**

**Notes**

The data on realized production of wheat and expected production of maize, sugar beet, sunflower and soya, as of August 10<sup>th</sup>, 2010 are based on reports from agricultural enterprises and cooperatives and estimates provided by statistical estimators for family holdings.

According to these data, in the Republic of Serbia the production of wheat amounted to 1651 thousand tons, which is decrease of 20.1% related to 2009. Compared to the ten-year average (2000-2009), wheat production has decreased by 20.3% and harvested area by 13.9%.

The final data on harvested quantity of wheat will be available by mid-September 2010.

Expected yields of late crops, as of August 10<sup>th</sup>, 2010, compared to 2009, increased referring to maize (7.0 %), sugar beet (12.3%), sunflower (8.8%) and soya beans (33.5%). If compared with ten-year average, expected production of maize increased by 25.9%, of sugar beet by 30.2%, of sunflower by 18.4% and of soya by 57.1%. It should be noted that areas under sugar beet were larger (by 8.6%), under sunflower (by 8.6%) and under soya (by 17.6%) in relation to the previous year.

The second yield estimates of mayor late crops, fruit and grapes as of September 1<sup>st</sup> will be published at the end of September.
