Notes

Data on expected yields of late crops, fruit and grapes are based on reports delivered by agricultural enterprises and cooperatives and estimates provided by statisticians for private holdings.

According to these data, expected maize production in 2010 amounts to 6847 thousand tons, which is by 7.0% greater than production in the previous year. Compared to 2009, increased production is expected referring to sugar beet, by 14.6%, of soya, by 33.4%, of sunflower, by 2.4%, while decreased production is expected regarding potatoes, by 4.0% and beans, by 17.0%.

Compared to ten-year average (2000-2009), expected production of maize, sugar beet, sunflower, soya and potatoes increased by 25.9%, 33.0%, 11.4%, 57.0% and 0.4%, respectively, while expected production of beans decreased by 22.4%.

Referring to fruit, compared to realized production in the previous year, decreased production of apples (by 19.6%) and plums (by 37.4%) is expected. Compared to ten-year average, increased production of apples (by 10.0%) and decreased production of plums (by 14.0%) is expected. Expected grapes production in the Republic of Serbia is by 21.4% decreased than in 2009, which is by 9.3% less, compared to ten-year average production.

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohia and therefore these data are not included in the coverage for the Republic of Serbia (total).

Previous results on harvest of late crops and fruit and grapes production in 2010 will be published at the end of November.
