Statistics of social activities

SERB 302 SZ10 011110

Social welfare, 2009

– Beneficiaries, forms, measures and services –

Data on minor and adult beneficiaries of social welfare and conducted forms, measures and services are collected annually via statistical forms “Annual statistical report on minor beneficiaries and forms of social welfare” (SZ- 1a) and “Annual statistical report on adult beneficiaries and forms of social welfare” (SZ 1b).

Beneficiary of social welfare is taken to be every person that, during the reporting year, once or several times, used certain forms and measures of social welfare and services of social work. Beneficiaries are classified into two main age groups- minor and adult beneficiaries. Each group comprises six sub-groups that are divided by the main category that presents the basic condition of the beneficiary's social need.

Form, measure and service of social welfare refer to every recorded case of conducted social welfare, according to the adopted decisions, based on respective Law and regulations, and performed by the social work centers or social welfare service.

Data on forms, measures and services of social welfare relate to the number of carried out, i.e. applied forms, measures and services during the referent period and not to the number of persons. One person can be recorded as beneficiary of social form, measure and service several times and is included in calculating total number of applied forms, measures and services. If a person takes advantage of the same mode, measure or service several times, he is recorded only once.

1. Adult beneficiaries of social welfare by category, age and sex

Category of beneficiary Sex	Total number of beneficiaries	18-20 years	21-25 years	26-27 years	28-45 years	46-59 years	60 years and over
