PREFACE

By launching the publication “Municipalities of Serbia, 2009”, the Statistical Office of the Republic of Serbia carries on to issue annual statistics compilations on municipalities. Our decision to establish a publication that comprises the data of various aspects of social and economic development of Serbian municipalities came from our appreciation of the social requirements for an overall insight of the status and development of certain municipalities.

This publication, just as the previous volumes of the series, features about 1000 data for each municipality. Considering the contents, coverage and presentations, this is actually a complete yearbook of municipalities and regarding the distribution of contents we have at disposal an elaboration of the Statistical Yearbook of Serbia, 2009.

In presenting the data we took into account the present organization of the Republic of Serbia and its respective administrative bodies.

A wider selection of the data presented by municipalities, which this publication could not possibly comprise, could be found in certain volumes of the “Bulletin”, the summary of which can be found at the end of the publication. In the Statistical Office of the Republic of Serbia in Belgrade and also in our regional offices we keep filed more detailed statistical data that were not published, however they are available to the interested clients. The data are offered in printed form and in electronic form (series 1997-2008 available at SORS website).

Apart from the data of the SORS, the publication features the data provided by the Ministry of Interior of the Republic of Serbia, the National Bank of Serbia - the Solvency Center, the Geodetic Office of the Republic of Serbia, the National Employment Service and the Public Health Institute of Serbia.

In order to provide an insight into the data of this publication for the largest number of users, the Statistical Office of the Republic of Serbia edited also a separate publication, the Municipalities of Serbia, 2009, in English.

Municipalities of Serbia, 2009: Main principles of editing

Distribution of material

The statistical material in this publication was presented following basically the same sequence as in the Statistical Yearbook of Serbia. Certain chapters of the Yearbook were excluded here: Geographical review, Climate and environment, National accounts, Individual consumption, Money, External trade, Catering, Science and International review.

Principles of presentation

The publication includes only the basic data of the large volume statistics. Although it was initially envisaged to comprise data in multi-year series, for technical reasons the publication is limited to the most recent data for one year. In the publication end we offered information about the source of the respective data for the previous period, which gives the opportunity to users to create data series on their own.

The municipalities were divided here into administrative districts. The municipalities within cities were specially presented in groups.

Methodological explanations

In a separate chapter of the publication we gave the most required methodological explanations. The detailed methodological explanations can be found in the volumes of the edition "Methodologies and standards" (SORS), i.e. "Methodological papers" (FSO).

Data sources

The statistical data presented here resulted from the accomplished programs of statistical surveys.

Included are also certain statistics that are in charge of following institutions: National Bank of Serbia - the Solvency Center, Geodetic Office of the Republic of Serbia, National Employment Service and Public Health Institute of Serbia. In the tables containing these data we gave the full titles of the data sources.

Coverage

The data coverage, whole and partial, is explained in the methodological papers. The data are fully comparable by municipalities and the years of production (in the cases where the data for several years are given). However due to different methodological basis, the data presented in various tables are not completely comparable.

Technical presentations

As a rule, all the municipalities were covered in table presentations. In certain areas, where the phenomena observed are not characteristic of all municipalities, the municipalities not featuring the phenomena observed were excluded. In the case of City of Belgrade, the most data were presented so to cover all municipalities.

Starting from 1999 Statistical Office of the Republic of Serbia does not have at disposal certain data for AP Kosovo and Metohia. Therefore the data for the Republic of Serbia (total) comprise only the data for the central Serbia and AP Vojvodina.

¹⁾ Average number of overnight stays is calculated by dividing number of overnight stays by number of tourists. As tourists are registered in each place where they stay, in case of changing place we have repeated data, i.e. duplicating.

Therefore, average number of overnight stays, calculated in this way, is probably smaller than real one.

¹⁾ In relation to previous years, certain considerable data changes occurred. This resulted from discontinued traffic of analog operators. Also, due to transfer from analog to digital operators in 2007, the distribution of connections, and capacities of existing and new operators were reorganized. Therefore certain 'overflow' of connected capacities among municipalities is found in the report.

METHODOLOGICAL EXPLANATIONS

GENERAL INFORMATION

Sources and methods of data collection

The data on the total area of the Republic of Serbia, on the area of AP Vojvodina and AP Kosovo and Metohia, as well as the data on the area of municipalities were taken over from the Geodetic Office of the Republic of Serbia 1 January 2009. Since the new cadastre measurements are in process, the data on the total area of the Republic and the provinces should be considered as provisional. The data on the area of the most of municipalities are final; therefore the discrepancy exists between the sum of the municipal areas and the total area. The data on the number of cadastre municipalities were also taken over from the Geodetic Office of the Republic of Serbia.

The population estimates for 2008 were derived according to the population estimate of 18/06/2007 and the data on the natural and mechanical migrations in second half 2007 and first half 2008. The mechanical component of migrations covers the internal migrations only.

SOCIAL SYSTEM

ELECTIONS AND COMPOSITION OF MUNICIPAL AND CITY/TOWN ASSEMBLIES

Sources and methods of data collection

The data on the results of the local government elections, i.e. the elections for the delegates to municipal and city/town assemblies were obtained from the municipal and city/town electoral boards by summarized reports for the level of municipality, i.e. city/town, while the results of the local government elections for AP Kosovo and Metohia were taken over from the protocols made on voting places and centrally processed with the Republic electoral commission. The data on delegates from AP Kosovo and Metohia were not possibly compiled.

Coverage

The elections for delegates were held on 11/05/2008. In four municipalities the elections were repeated (09/11/2008) since the establishment and election of the executive bodies were not carried out in due course (Vrnjačka Banja, Knjaževac, prijeopolje I Ruma).

Simultaneously, for the first time after 1996, local government elections were held at AP Kosovo and Metohia in 26 municipalities (out of 29), i.e. the elections were not held in the municipalities of Glogovac, Kačanik and Štimlje. Pursuant to the decision of the Republic electoral commission an extra number of voting places were opened where internally displaced people from AP Kosovo and Metohia voted. Out of the total of 157 extra-opened voting places – 115 were in the central Serbia, 26 in AP Vojvodina and 16 on Kosovo and Metohia. The number of regular voting places in the municipalities of Kosovo and Metohia was 279. At each extra-opened voting place voting was carried out for two-three, even for four or five or more municipalities of Kosovo and Metohia. For each municipality made was a special protocol on the voting results. Since for each municipality presented were those voting places (their number) that produced protocols, each extra-opened voting place was more than once presented in the results by municipalities and in total results for the AP. In this way, with regular and multiple-presented extra-opened voting places, the total number of voting places on AP Kosovo and Metohia was 2073 (in local government elections in 1996, the total number of voting places for all 29 municipalities of the Province equaled to 1082).

Definitions

The candidates for delegates are pronounced by political parties, coalitions of parties, i.e. civil groups. The municipal and city/town assemblies are single-home institutions and the mandate of delegates lasts four years.

Each municipality/city is one electoral unit in elections for delegates.

POPULATION

Sources and methods of data collection

The data on population, households and families in 2002 were shown according to the Census of population, households and dwellings in 2002.

The population number estimate in mid-year (as of 30 June) is calculated on the basis of data of population census, data on population increase and data on internal migrations.

Data on births, deaths and contracted marriages are compiled and supplied by registrars and data on marriages dissolved (divorces) by the courts of respective jurisdiction.

Coverage

The statistics of *births* cover all births (live and dead births) in the respective year. The statistics of *deaths* covers all death cases. The statistics of *contracted marriages* cover the marriages that have been legally contracted, i.e. entered into the register of marriages. The statistics of *dissolved marriages* cover by legally enforceable resolution dissolved, i.e. divorced marriages, null and void made marriages.

According to the legal provisions on registers, the cases of births, deaths and contracted marriages are entered into registers kept for the region where the respective events took place, regardless the fact whether this is the place of residence of the concerning parties. When processed data are further re-classified according to place of residence and this is in compliance with the census conception of constant population.

Here we should note that starting from 1999 Statistical Office of the Republic of Serbia does not have at disposal certain data for AP Kosovo and Metohia and therefore they are included in the coverage for the Republic of Serbia (total).

Definitions

Population. In 1991 and 2002 censuses, population was registered and the output presented according to the conception of constant population, i.e. respondents were registered at their usual places of residence, even if in the time of census execution they were absent for any reason (travel, education, fieldwork, work abroad, military service, medical treatment, imprisonment, etc.). Pursuant to international recommendations, in 2002 census as constant population we assumed, apart from citizens in the country, also our citizens that worked, i.e. stayed

abroad for a year or less, as well as the foreign citizens that worked here or stayed as family members for more than a year. In Table 3.1, the final data on the number of population as found in censuses of 1991 and 2002 are mutually comparable, since by special processing of 1991 census data we excluded our citizens that worked or stayed abroad for more than a year.

2002 census was not conducted on the territory of AP Kosovo and Metohia.

National and ethnic affiliation. As in the previous post-war censuses, in 2002 census the data on the national composition of the population were collected according to free declaration of the respondents. Pursuant to Article 45, the Constitution of the Federal Republic of Yugoslavia, the citizens were granted full freedom to declare their national affiliation. Further, citizens were free not to be declared on the issue and these cases were to be registered by enumerators as 'not declared'.

For the children under the age of 15, the reply was provided by a parent, an adopter parent or a guardian.

Age. In the tables of census data and vital statistics, the population was categorized by age i.e. (complete) living years. Each age group relates to complete years of age, e.g. the age group 0 – 4 comprises the children from the birth to the completed fifth year.

According to the data of age, several important population sub-sets are derived: pre-school children (aged below 7), primary school /compulsory education children (aged 7-14), working age population (aged 15 – 64), female fertile population (15 – 49).

Educational attainment. As in the previous census, the 2002 census provided the data referring to the educational attainment, i.e. the school completed that presents the educational attainment. The persons who had not completed primary school gave the data on the schooling years accomplished. The data are presented in tables for all persons aged 15 and over.

Marital status. The data on marital status are provided for the population aged 15 and over. Just as before, the 2002 census data on marital status refers to the actual legal status (legal marital status) and not to the factual status.

Active population anticipates the persons aged 15 and over, with occupation, as well as unemployed persons seeking employment and the persons on leave for military service (active population without occupation). Under the term 'occupation' we anticipate the execution of certain jobs in order to provide life support.

The persons acquiring (personal) income are those not included in the set of active population, however they have means of sustenance provided from regular receipts, e.g. pension (old-age, disablement, family pensions), real estate related earnings (lease of flat, house, land, shop, etc.) and other personal income (disablement and welfare subsidies, family/children allowances, scholarships, etc.).

Supported population anticipates the persons without personal income of any kind, or with unsubstantial resources and therefore they are mainly supported by parents, relatives or other persons, including legal persons.

Persons working abroad are the persons that for less than a year work abroad, for foreign employer or independently. These persons provided no data on their occupation abroad or on the contingent occupation before leaving the home country and they may not be categorized by certain socioeconomic parameters (occupation, socioeconomic status, etc.).

Members of families of persons working abroad are those persons who do not work abroad, however they stay there for less than a year as members of the families of persons working abroad.

Agricultural population is consisted of the persons who are by occupation workers in agriculture, fishing and forestry, as well as persons supported by this category.

Active agricultural population anticipates the persons aged 15 and over, with the occupations above mentioned, who are employed or individually engaged (at their own, family or other holdings) and who provide for living support in this way.

Individual agricultural workers (farmers) are persons aged 15 and over, who individually work at agricultural holdings.

Supported agricultural population comprises the persons with no personal income or with not sufficient income, who are therefore supported by persons with agricultural occupation.

Household is every family or other community of persons who live together and jointly spend their income for living support (dwelling, food, etc.), regardless the fact whether all the members permanently stay at the place where the household is situated or some members stay at some other place, or abroad, due to work, education or other reasons.

Family is a close family community, consisted of only a married couple or of parents (single or both) and

their children. Extra-marital communities (with or without children) are also considered as families.

Live born is a child that showed the signs of life (breathing and heart beat) after birth.

Stillborn is a child born showing no life signs, provided that pregnancy lasted longer than 28 weeks.

Death causes. The data on death causes are classified according to the International classification of diseases, injuries and death causes (Revision 10, in use since 1997).

EMPLOYMENT AND EARNINGS

Sources and methods of data collection

The data on the employed in enterprises, cooperatives, institutions and organizations were collected on the basis of Semiannual report on the employed and their salaries and wages (*RAD-1P*) and through Survey supplementary to the semiannual report on the employed and their salaries and wages, which provided the assessment of the number of employed in small-size enterprise (up to 50 employed) that were not covered by regular semiannual survey.

The data on private entrepreneurs, persons that individually run business/are professionally active, and on their employees were collected through the regular semiannual survey, *RAD-15*, provided by the Health Insurance Office of the Republic of Serbia.

The annual average was calculated as the arithmetical mean value of the number of the employed persons as of 31 March and of 30 September.

The data on employment and unemployed persons are obtained from the National Employment Service.

Coverage

The semiannual survey of employment and salaries and wages covers enterprises, institutions and other organizations. The survey does not cover: foreign citizens employed in the Republic of Serbia, citizens of the Republic of Serbia employed with international representation offices in the Republic of Serbia, employed that are doing military service, the employed on non-paid leave for one year or more, active military officers and civilians employed with the Army and the employees of the interior bodies. In implementing surveys on employment applied was organization - territory principle of observation, i.e. municipality was regarded as basic territorial unit. Therefore, as a reporting unit we anticipate every enterprise or

institution with their business units at the territory of the municipality where the head office is seated and these units are engaged in the same principal activity. Business units with the registered main or principal activity other than that of the head office of enterprise or institution are considered as separate reporting units, even though they are situated on the territory of the municipality where the head office of the respective enterprise / institution is seated.

Also, as a separate reporting unit we consider any business unit that is situated out of the municipality where the head office of the corporate enterprise or institution is found.

The semiannual survey on private entrepreneurs, persons that individually run business and their employees, covers only the employed persons that are registered with the Health insurance office of the Republic of Serbia.

The data on unemployed persons cover only those persons registered with the National Employment Service.

Definitions

The term '**employed**' cover all the persons that have signed employment contract with enterprise or institutions (officials are also included here), or with private entrepreneurs, regardless the fact whether permanent or casual employment was contracted and whether these are full-time or part-time jobs. The term 'employed' does not cover households' members rendering assistance at holdings, shops or enterprises run by another household member, or persons serving punishments and casually hired associates.

Sources and methods of data collection

The data on average salaries and wages were collected pursuant to regular monthly communications on the number of employed and salaries and wages (*RAD-1*).

Coverage

Enterprises, institutions, cooperatives and organizations of all ownership types and their composite units all submit monthly reports on number of employment and salaries and wages, according to organization and territory principle, on municipality level.

Definitions

Pursuant to Article 105, the Act on labor, **salaries and wages** comprise remuneration including taxes and contributions that are paid out of earnings that employed acquired for the work executed and the time spent as office hours; then extra remuneration and other payments (excluding compensations for commuting to work, allowances for business trips – domestic and abroad, retirement compensations, solidarity aid, jubilee awards, compensations of undertaking costs and compensations for damages due to injury at work or professional disease).

BUDGET AND RESOURCES

Sources and methods of data collection

Data on budgetary revenues and expenditures are collected and processed by the Ministry of Finance – Treasury Administration.

Coverage

Data on budgetary revenues and expenditures are related to statements of balance of budget of all cities and municipalities that create local government. Covered are all direct and indirect budgetary beneficiaries that are mainly financed from the local government funds.

Definitions

Total budgetary revenues consist of current (tax and non-tax) revenues, receipts from selling non-financial assets, and receipts from borrowing and selling financial assets. Receipts from the sales of non-financial assets cover only income acquired through the sales of capital goods (government-ownership buildings and structures, stocks and land) and capital transfers from non-government institutions. Budgetary revenues are used to cover budgetary expenditures. Regular operating costs of budgetary beneficiaries are financed by current revenues. Budgetary expenditures also comprise purchase of non-financial assets, credit repayment and purchase of financial assets.

BUDGET BENEFICIARIES EXPENDITURES

Sources and methods of data collection

The data on direct budget beneficiaries were collected through regular statistical survey, 'Budget beneficiaries - Complex annual survey', (*KGI-03*), which

is carried out pursuant to financial statements and other accounting documents. The data on indirect budget beneficiaries were taken over from the balance of payment received from the Treasury administration.

Coverage

The survey *KGI-03* compiles the data on income and expenditure of budgetary beneficiaries. The data are shown according to the Classification of activities.

Definitions

Budget beneficiaries' expenditures include the remuneration for employees, taxes, operating expenses, fees and fines, current donations, subsidies and grants, welfare from the budget, payments to NOGs, repayment of interests and incurred credit costs, amortization costs and purchase of non-financial assets.

INVESTMENTS

Sources and methods of data collection

The data on investments in fixed assets are collected from all legal persons domestically, by the regular annual survey "Investments in fixed assets" (*INV-01*) and the same data are relative to all ownership types (social, private, cooperatives, mixed and state property).

Coverage

The data on realized investments in new assets are given at current prices, by technical structure (construction works, equipment and other) and by the type of constructions (new facilities, reconstructions, modernization, superstructures, extensions or replacements of existing facilities) and by activities. They are classified by investments' destination and location (pure activity principle). Covered are all legal persons, except those classified as small-size legal persons, pursuant to Article 7, the Act on accounting and auditing.

Definitions

Realized investments represent the value of effectively carried out constructions, executions or purchase of new objects, equipment and other, no matter whether these investments were accomplished and paid up. The same investments are classified according to destination of investments (pure activity principle).

PRICES

Sources and methods of data collection

The retail prices of agricultural and industrial produce and the prices of services that are regularly processed each month are scanned by statistical institutions of selected towns. The prices of industrial (foodstuffs and non-food) products and the prices of services are scanned once per month at 3-10 places, depending on size of town. The prices of agricultural products are surveyed twice a month, generally in 3 to 5 stores and in market places (1 to 5 markets in a town).

Average monthly price for each item and service in a town is calculated by non-weighted arithmetical mean value of prices at several surveyed prices. Average annual prices for industrial products and services are calculated by non-weighted arithmetical mean value of monthly prices and for agricultural products by weighting monthly prices of fresh vegetables and fruit with weights that present the quantity structure of the products sold in the respective month.

Coverage

Retail prices are scanned in 15 towns (10 of the central Serbia and 5 of Vojvodina) and they relate to about 470 products and services (about 145 foodstuff products, 245 industrial non-food products and about 80 kinds of services).

Definitions

Retail prices are those prices at which retail shops, individual producers and service providers sell products and render services to end users. The prices include Value added tax.

AGRICULTURE

CROP PRODUCTION

Sources and methods of data collection

The data on agricultural enterprise and cooperatives are collected through regular annual surveys of land sown in spring, *PO-22*, returns of early crops, *PO-32* and returns of late crops, *PO-33*. The data are provided according to accounting and other records. The data on family holdings are obtained from statistical estimates. About 1250 estimators supply the respective data for about 4000 estimated areas (on the territory of the central Serbia and Vojvodina), which as a rule include one or more cadastral municipalities. Mainly statistical

estimators are successful agricultural producers who are well familiar with local developments. In their activities, these statistical estimators rely on recent cadastre data, estimates of previous years, information from agricultural producers and professionals, their own observations and on other sources.

Coverage

Since the statistics of land areas and yields are based on the overall cadastre, estimates cover total funds and production of agricultural holdings, as well as other production (non-agricultural households, gardens in urban areas, etc.)

Definitions

Utilized agricultural area is land area utilized for agricultural production. Utilized agricultural area includes: arable land and kitchen gardens, orchards, vineyards, meadows and pastures.

Arable areas are the land areas used for field crop production. Here also included is land that is left 'to recover', uncultivated, as well as vine and fruit-tree nurseries and clover and alfalfa fields. However this publication does not include data on uncultivated land areas and nurseries, which makes the difference to 'arable fields and gardens – total'.

Yielding fruit trees and vines are those that may give yields, regardless the fact whether actually they gave yields or not.

More detailed methodological explanations of crop production statistics could be found in *the Methodological papers*, volume no 211, published by the FSO.

FORESTRY

Sources and methods of data collection

The data of forestry statistics are collected by regular annual surveys and are based on the existing programs and records of forests management: *ŠUM-21* (Annual survey of exploitation of public forests), *ŠUM-23* (Annual survey of private forests exploitation) and *ŠUM-41* (Annual report on forestation and forests growing) for private and public forests, and *ŠUM-13* (Tree-annual survey on changes in forests' area) for public and private forests. These data are all provided by *Srbijašume* and *Vojvodinašume*, the public forests administration companies, as well as by other organizations in charge of forests management (national parks, cooperatives, etc.)

Definitions

Under the term **forest** we assume a land area over 5 acres overgrown with forest trees, regardless the fact it is of economic significance, has protection function or is envisaged for special purposes.

Forestation is all artificial forestation, by sowing or planting, either to re-grow forests on wasted land (forestation 'in forests') or to grow new forests ('new' forestation).

Forests felling relates to the gross mass of felled timber, measured at stumps.

Technical wood is the wood that is due to its physical and technical properties envisaged for technical and industrial purposes.

WATER AND SANITATION SERVICES

Sources and methods of data collection

Data on water purification, supply and waste water drainage from settlements are obtained by means of regular annual surveys "Public water supply and sewerage" (Vod-2v and Vod-2k), which are based on records and documents of public companies in charge of water supply and sewerage management, and partly on estimates. Data are collected annually, starting from 2005.

Coverage

The data on water usage in settlements are collected from reporting units in charge of water supply and/or managing water usage systems. Surveys do not cover individual water supply (household supply) systems, which serve exclusively certain households or household groups.

The data on waste and purified water are collected from organizations responsible for managing public sewerage system.

Definitions

Water capture anticipates public water supply with water from different sources, using underground, spring and surface water.

Supplied water is all directly captured and provided water quantities that public supply system distributes to users during the referent year. The supplied quantities are determined by water meters or otherwise by calculations as stipulated by regulations for certain activity.

Wastewater is water that after use is anticipated as wastewater and transported to purification plant, or that is discharged (to underground or surface water). Wastewater quantities do not include atmospheric water. Wastewater quantities are measured by water meters or estimated according to defined production standards.

To **purify wastewater**, i.e. polluted used water means to eliminate from water, to an acceptable degree, all hazardous matters and radioactive substances that appeared, and in this way to make water safe for use.

CONSTRUCTION

Sources and methods of data collection

Annual survey of construction works (*GRADJ -11*), Monthly report on construction permits (*GRADJ -10*) and Annual report on demolished housing constructions and dwelling adaptations (*GRADJ -71*).

Coverage

Annual survey of construction works covers all construction works carried out by legal and physical entities engaged in construction activity, section Construction, as well as legal entities not classified into construction activity, but that comprise units engaged in construction. Data on works carried out by sole proprietors are taken over from the records of construction permits.

Construction works value anticipates all construction materials applied and labor force used. The value does not include the costs of land, project design, supervision and VAT. The value of works relate to undertakings in referent year, i.e. accomplished and unaccomplished constructions. The value of works conducted by contractors is provided on the basis of annual balance statements, and the value of works undertaken by sole proprietors is taken over from the records of construction permits. The works executed were presented by territory where construction sites are found and not by territory, i.e. place where contractor's head office is situated.

Annual report on demolished housing constructions and dwelling adaptations cover demolished housing constructions, as well as buildings with one or more apartments adapted into non-residential premises. Reporting units are respective administrative bodies, as well as units that have available documentation on demolished constructions.

Definitions

Construction anticipates structures on the ground, any underground and over-ground construction, as well as hydro-technical structures, for which construction works are performed, and which are made of construction material, built-in finished products and parts.

Dwelling is any residential construction unit intended for habitation, consisting of one or several rooms with necessary auxiliary spaces (kitchen, bathroom, lobby, pantry, toilet, etc.) or without auxiliary spaces, and with one or more separate entrances.

More detailed methodological explanations on construction statistics are found in the SORS edition Methodologies and standards, Annual survey of construction works, volume 21/2007 and Monthly report on construction permits, volume 22/2007.

TRADE

SALES AND PURCHASE OF AGRICULTURAL, FORESTRY AND FISHING PRODUCTS

Sources and methods of data collection

The data on the sales and purchase of the products of agriculture, forestry and fishing are collected in the Monthly survey of the turnover of agricultural products of private production, in enterprises and cooperatives (*PO-TRG-33*) and in the Monthly survey of purchase of agricultural produce from individual producers (*TRG-31*). The sources here are payment balances and other documents provided by enterprises, cooperatives and other respective organizations.

Coverage

Purchase and sales of agricultural, forestry and fishing produce include the sales of own production range of enterprise and cooperatives and purchase from family households, which authorized organizations make for further sales and processing.

Definitions

Under the term 'sold and purchased quantities' we anticipate the turnover, i.e. the delivery of agricultural products of the production range of enterprises and cooperatives, as well as directly purchased volumes of agricultural goods from family households for further sales and processing.

TOURIST TRADE

Sources and methods of data collection

The data on tourist arrivals and overnight stays are presented according to regular survey – Monthly survey of arrivals and overnight stays in tourist resorts (*TU-11*), where accommodation services are rendered.

Coverage

Monthly survey of tourist trade statistics covers all catering and other organizations offering accommodation (boarding) services. However, the coverage of accommodation (boarding) services in households may not be considered as full since some households provide accommodation (boarding) services without having obtained license from the respective local government bodies and therefore they are not included by the survey. Also, some households do not provide data for all tourist customers.

Definitions

A **tourist** is each person who makes at least one overnight stay at a tourist resort or other boarding facility, in the place other than his / her usual place of residence.

Tourists are registered in the place or resort where they stay. In the case of changing the place, they are again registered i.e. double recorded.

TRANSPORT AND COMMUNICATIONS

Sources and methods of data collection

The data on highway and regional roads are provided from the Roads Directorate and the data on local roads from the respective municipal bodies, according to regular annual surveys.

“Srbija”, PTT public enterprise and “TELEKOM SRBIJA”, Joint stock co. provide data on PTT traffic on the basis of regular annual statistical surveys.

The data on registered road motor and articulated vehicles were obtained from the files of registered vehicles that are maintained with the Ministry of Interior of Serbia.

Coverage

Funds and PTT traffic relate to the public PTT traffic carried out under the organization of “Srbija” PTT public enterprise and “TELEKOM SRBIJA”, Joint stock co.

Telephone subscribers comprise the active lines of all legal and physical persons that are PTT property and in ownership of subscribers.

Covered are all registered vehicles except the vehicles of the Serbian army, diplomatic and consular representation offices and the vehicles bearing temporary registration plates.

Definitions

PTT mailing and parcel traffic comprise only dispatches in domestic and dispatches and receipts in international traffic. Data on letter mails include printed items, test reports, business documents, dispatches for the blind and air mailings. Turnover of newspapers and magazines is not given by municipalities, since as dispatch this is registered only in the places where editorial boards have their head offices and when received – as letter mails.

EDUCATION

Sources and methods of data collection

Data on primary and secondary education relate to school year end and they are compiled by: Annual survey of regular primary schools at school year end (*ŠOR-K*), Annual survey of regular secondary schools at school year end (*ŠSR-K*), Annual survey of special primary schools (*ŠSO-K*), Annual survey of special secondary schools (*ŠSS-K*) and Annual survey of adult education primary schools (*ŠOO-K*).

Data on registered university students are compiled through regular annual survey of registered students (*ŠV-20*) and the data on graduate students – through regular annual surveys of graduate students (*ŠV-50*). Survey of registered (enrolled) students relates to data of winter term registration (in academic year) and survey of graduate students relates to respective calendar year.

Data on pre-school institutions are obtained through regular annual survey of pre-school institutions (*PŠV*) and data on students' boarding houses are provided by regular annual survey of students' boarding houses (*ŠD*).

Coverage

The data on primary education include regular incomplete (four-grade, five-grade, six-grade) and complete (eight-grade) primary schools. Regular secondary schools may be established as high schools, art schools or secondary schools of vocational education and training (VET).

Special schools include individual primary and secondary schools, as well as special forms for children of slow development within regular primary and secondary schools. Adult education schools include primary schools and forms for adults within regular primary schools. Relative to the adult education schools, under the column 'completed educational requirements', i.e. 'completed primary schooling' covered are adults that having passed examinations at regular primary schools completed schooling pursuant to study program (curriculum) for adults.

Pre-schools include kindergartens and the forms of pre-school children.

Definitions

In the statistics of education, under the term **schools** we anticipate organizations or composite units that provide teaching of certain kind, following the defined study program and curriculum.

CULTURE

Sources and methods of data collection

The data on cinemas are compiled annually in the regular statistical survey of cinemas (*FILM-1*).

Definitions

A **cinema** is a hall or open-air theater equipped and envisaged for public film projections, regardless the fact it is an independent organization or a composite unit of some other organization. Included are regular cinemas (in permanently occupied halls), open-air cinemas and traveling cinemas.

Cinema performance is a public film projection (feature film projection) that lasts approximately two hours.

PUBLIC HEALTH

Sources and methods of data collection

The collection of statistics of health is obligation of the Institute of Public Health of Serbia "Dr Milan Jovanovic Batut".

Data on health care institutions, i.e. organizational units, workers and activities are collected by annual reports for certain types of health services.

Coverage

Data published in this chapter were compiled from health care institutions in the Republic of Serbia (without data for Kosovo and Metohia), which are included in the Plan of health institutions network. Figures on staff are shown as of 31 December.

SOCIAL WELFARE

Sources and methods of data collection

The data on minor and adult persons who are beneficiaries of social welfare are collected by the way of annual survey of minor beneficiaries and forms of social welfare (*SZ-1a*) and annual survey of adult beneficiaries and forms of social welfare (*SZ-1b*).

Coverage

Regular statistical surveys cover all social welfare centers, social welfare services within municipal assemblies and also inter-municipal centers on the territory of the Republic of Serbia.

Definitions

A **social welfare beneficiary** is any person that is registered as social case to be solved, and this case is further processed by social welfare center or by respective professional team of municipal assembly. Under the terms of **form, measure and service of social welfare** we anticipate any case of social welfare service rendered pursuant to law, municipal acts and the respective provisions of family law.

JUSTICE ADMINISTRATION

Sources and methods of data collection

Data on adult and minor persons sentenced by absolute decrees are compiled from the courts of general jurisdiction, by the way of individual statistical questionnaire.

Coverage

Covered are all adult persons, i.e. minor persons that were declared guilty and that were rendered sentences, which courts of general jurisdiction acknowledged as decrees absolute, in the respective year and pursuant to Penalty code.

Definitions

Adult person sentenced by decree absolute is a person aged 18 and over, and **minor person sentenced by decree absolute** is a person aged between 14 and 18.
