## PREFACE

By launching the publication "Municipalities of Serbia, 2010", the Statistical Office of the Republic of Serbia carries on to issue annual statistics on municipalities. Our decision to establish a publication that comprises the data of various aspects of social and economic development of Serbian municipalities came from our appreciation of the social requirements for an overall insight of the status and development of certain municipalities.

This publication, just as the previous volumes of the series, features about 1000 data for each municipality. Considering the contents, coverage and presentations, this is actually a complete yearbook of municipalities and regarding the distribution of contents, we have at disposal an elaboration of the Statistical Yearbook of Serbia, 2010.

In presenting the data we took into account the present organization of the Republic of Serbia and its administrative bodies.

A wider selection of the data presented by municipalities, which this publication could not possibly comprise, could be found in certain volumes of the "Bulletin", the summary of which can be found at the end of the publication. At the Statistical Office of the Republic of Serbia, in Belgrade head office and at its regional offices, we keep filed more detailed statistical data that were not published, however are available to the interested clients. The data are offered in printed electronic form (series 1997-2008 available at SORS website).

Apart from the data of the SORS, the publication contains the data provided by the Ministry of Interior of the Republic of Serbia, the Ministry of Finance, the Geodetic Office of the Republic of Serbia, the National Employment Service and the Public Health Institute of Serbia.

In order to provide an insight into the data of this publication for the wide range of users, the Statistical Office of the Republic of Serbia edited also a separate English version of the publication.

## **Municipalities of Serbia, 2010: Main principles of editing**

### **Distribution of material**

The statistical material in this publication was presented following basically the same sequence as in the Statistical Yearbook of Serbia. Certain chapters of the Yearbook were excluded here: Geographical review, Climate and environment, National accounts, Individual consumption, Money, External trade, Catering, Science and International review.

### **Principles of presentation**

The publication offers only the basic data of the large volume statistics. Although it was initially envisaged to comprise data in multi-year series, for technical reasons the publication is limited to the most recent data for one year. In the publication end we included information about the source of the respective data for the previous period, which gives the opportunity to users to create data series on their own.

The municipalities were divided here into administrative districts. The municipalities within cities were specially presented in groups.

### **Methodological explanations**

In a separate chapter of the publication we gave the most required methodological explanations. The detailed methodological explanations can be found in the volumes of the edition "Methodologies and standards" (SORS), i.e. "Methodological papers" (FSO).

### **Data sources**

The statistical data presented here resulted from the accomplished programs of statistical surveys.

Included are also certain statistics that are in charge of the following institutions: Ministry of Finance, Geodetic Office of the Republic of Serbia, National Employment Service and Public Health Institute of Serbia. In the tables containing these data we gave the full titles of the data sources.

### **Coverage**

The data coverage, whole and partial, is explained in the methodological papers. The data are fully comparable by municipalities and the years of production (in the cases where the data for several years are given). However due to different methodological backgrounds, the data presented in various tables are not completely comparable.

### **Technical presentations**

As a rule, all the municipalities were covered in table presentations. In certain areas, where the phenomena observed are not characteristic of all municipalities, the municipalities not featuring the observed phenomena were excluded. In the case of City of Belgrade, the most data were presented so to cover all municipalities.

Starting from 1999 Statistical Office of the Republic of Serbia does not have at disposal certain data for AP Kosovo and Metohia.

<sup>1)</sup> Average number of overnight stays is calculated by dividing number of overnight stays by number of tourists. As tourists are registered in each place where they stay, in case of changing place we have repeated data, i.e. duplicating.

Therefore, average number of overnight stays, calculated in this way, is probably smaller than real one.

<sup>1)</sup> In relation to previous years, certain considerable data changes occurred. This resulted from discontinued traffic of analog operators. Also, due to transfer from analog to digital operators in 2007, the distribution of connections, and capacities of existing and new operators were reorganized. Therefore certain 'overflow' of connected capacities among municipalities is found in the report.

## METHODOLOGICAL EXPLANATIONS

### GENERAL INFORMATION

#### Sources and methods of data collection

The data on the total area of the Republic of Serbia, on the area of AP Vojvodina and AP Kosovo and Metohija, as well as the data on the area of municipalities were taken over from the Geodetic Office of the Republic of Serbia 1 January 2010. Since the new cadastre measurements are in process, the data on the total area of the Republic and the provinces should be considered as provisional. The data on the area of the most of municipalities are final; therefore the discrepancy exists between the sum of the municipal areas and the total area. The data on the number of cadastre municipalities were also taken over from the Geodetic Office of the Republic of Serbia.

The population estimates for 2008 were derived according to the population estimate of 18/06/2007 and the data on the natural and mechanical migrations in second half 2007 and first half 2008. The mechanical component of migrations covers the internal migrations only.

#### ELECTIONS AND COMPOSITION OF MUNICIPAL AND CITY/TOWN ASSEMBLIES

#### Sources and methods of data collection

The data on the results of the local government elections, i.e. the elections for the delegates to municipal and city/town assemblies were obtained from the municipal and city/town electoral boards by summarized reports for the level of municipality, i.e. city/town, while the results of the local government elections for AP Kosovo and Metohija were taken over from the protocols made on voting places and centrally processed with the Republic electoral commission. The data on delegates from AP Kosovo and Metohija were not possibly compiled.

#### Coverage

The elections shall be carried on the whole territory of RS. The lists of voters include all citizens aged 18 and over.

The elections for delegates were held on 11/05/2008. In four municipalities the elections were repeated (09/11/2008) since the establishment and election of the executive bodies were not carried out in due course (Vrnjačka Banja, Knjaževac, Prijepolje and Ruma).

Simultaneously, for the first time after 1996, local government elections were held at AP Kosovo and Metohija in 26 municipalities (out of 29), i.e. the elections were not held in the municipalities of Glogovac, Kačanik and Štimlje. Pursuant to the decision of the Republic electoral commission an extra number of voting places were opened where internally displaced people from AP Kosovo and Metohija voted. Out of the total of 157 extra-opened voting places – 115 were in the central Serbia, 26 in AP Vojvodina and 16 on Kosovo and Metohija. The number of regular voting places in the municipalities of Kosovo and Metohija was 279. At each extra-opened voting place, voting was carried out for two-three, even for four or five or more municipalities of Kosovo and Metohija. For each municipality made was a special protocol on the voting results. Since for each municipality presented were those voting places (their number) that produced protocols, each extra-opened voting place was more than once presented in the results by municipalities and in total results for the AP. In this way, with regular and multiple-presented extra-opened voting places, the total number of voting places on AP Kosovo and Metohija was 2073 (in local government elections in 1996, the total number of voting places for all 29 municipalities of the Province equaled to 1082).

#### Definitions

Each municipality/town presents one electoral unit in elections for delegates.

The candidates for delegates are pronounced by political parties, coalitions of parties, i.e. civil groups. The municipal and city/town assemblies are single-home institutions and the mandate of delegates lasts four years.

Pursuant to the amendment to the Local elections law of 2008, the presidents of municipalities and the mayors of cities shall be elected by delegates of municipal and city/town assemblies, and the candidates are pronounced by political parties, coalitions of parties and civil groups with the majority of elected delegates for assemblies.

## POPULATION

### Sources and methods of data collection

The data on population, households and families in 2002 were shown according to the Census of population, households and dwellings in 2002.

The population number estimate in mid-year (as of 30 June) is calculated on the basis of data of population census, data on population increase and data on internal migrations.

Data on births, deaths and contracted marriages are compiled and supplied by registrars and data on marriages dissolved (divorces) by the courts of respective jurisdiction.

### Coverage

The statistics of *births* cover all births (live and dead births) in the respective year. The statistics of *deaths* covers all death cases. The statistics of *contracted marriages* cover the marriages that have been legally contracted, i.e. entered into the register of marriages. The statistics of *dissolved marriages* cover by legally enforceable resolution dissolved, i.e. divorced marriages, null and void made marriages.

According to the legal provisions on registers, the cases of births, deaths and contracted marriages are entered into registers kept for the region where the respective events took place, regardless the fact whether this is the place of residence of the concerning parties. When processed data are further re-classified according to place of residence and this is in compliance with the census conception of constant population.

Here we should note that starting from 1999 Statistical Office of the Republic of Serbia does not have at disposal certain data for AP Kosovo and Metohija and therefore they are included in the coverage for the Republic of Serbia (total).

### Definitions

**Population.** In 1991 and 2002 censuses, population was registered and the output presented according to the conception of constant population, i.e. respondents were registered at their usual places of residence, even if in the time of census execution they were absent for any reason (travel, education, fieldwork, work abroad, military service, medical treatment, imprisonment, etc.). Pursuant to international recommendations, in 2002 census as constant population we assumed, apart from citizens in the country, also our citizens that worked, i.e. stayed abroad for a year or less, as well as the foreign citizens that worked here or stayed as family members for more than a year. In Table 3.1, the final data on the number

of population as found in censuses of 1991 and 2002 are mutually comparable, since by special processing of 1991 census data we excluded our citizens that worked or stayed abroad for more than a year.

2002 census was not conducted on the territory of AP Kosovo and Metohija.

**National and ethnic affiliation.** As in the previous post-war censuses, in 2002 census the data on the national composition of the population were collected according to free declaration of the respondents. Pursuant to Article 45, the Constitution of the Federal Republic of Yugoslavia, the citizens were granted full freedom to declare their national affiliation. Further, citizens were free not to be declared on the issue and these cases were to be registered by enumerators as 'not declared'.

For the children under the age of 15, the reply was provided by a parent, an adopter parent or a guardian.

**Age.** In the tables of census data and vital statistics, the population was categorized by age i.e. (complete) living years. Each age group relates to complete years of age, e.g. the age group 0 – 4 comprises the children from the birth to the completed fifth year.

According to the data of age, several important population sub-sets are derived: pre-school children (aged below 7), primary school /compulsory education children (aged 7-14), working age population (aged 15 – 64), female fertile population (15 – 49).

**Educational attainment.** As in the previous census, the 2002 census provided the data referring to the educational attainment, i.e. the school completed that presents the educational attainment. The persons who had not completed primary school gave the data on the schooling years accomplished. The data are presented in tables for all persons aged 15 and over.

**Marital status.** The data on marital status are provided for the population aged 15 and over. Just as before, the 2002 census data on marital status refers to the actual legal status (legal marital status) and not to the factual status.

**Active population** anticipates the persons aged 15 and over, with occupation, as well as unemployed persons seeking employment and the persons on leave for military service (active population without occupation). Under the term 'occupation' we anticipate the execution of certain jobs in order to provide life support.

**The persons acquiring (personal) income** are those not included in the set of active population, however they have means of sustenance provided from regular receipts, e.g. pension (old-age, disablement, family pensions), real estate related earnings (lease of flat, house, land, shop, etc.) and other personal income

(disablement and welfare subsidies, family/children allowances, scholarships, etc.).

**Supported population** anticipates the persons without personal income of any kind, or with unsubstantial resources and therefore they are mainly supported by parents, relatives or other persons, including legal persons.

**Persons working abroad** are the persons that for less than a year work abroad, for foreign employer or independently. These persons provided no data on their occupation abroad or on the contingent occupation before leaving the home country and they may not be categorized by certain socioeconomic parameters (occupation, socioeconomic status, etc.).

**Members of families of persons working abroad** are those persons who do not work abroad, however they stay there for less than a year as members of the families of persons working abroad.

**Agricultural population** is consisted of the persons who are by occupation workers in agriculture, fishing and forestry, as well as persons supported by this category.

**Active agricultural population** anticipates the persons aged 15 and over, with the occupations above mentioned, who are employed or individually engaged (at their own, family or other holdings) and who provide for living support in this way.

**Individual agricultural workers (farmers)** are persons aged 15 and over, who individually work at agricultural holdings.

**Supported agricultural population** comprises the persons with no personal income or with not sufficient income, who are therefore supported by persons with agricultural occupation.

**Household** is every family or other community of persons who live together and jointly spend their income for living support (dwelling, food, etc.), regardless the fact whether all the members permanently stay at the place where the household is situated or some members stay at some other place, or abroad, due to work, education or other reasons.

**Family** is a close family community, consisted of only a married couple or of parents (single or both) and their children. Extra-marital communities (with or without children) are also considered as families.

**Live born** is a child that showed the signs of life (breathing and heart beat) after birth.

**Stillborn** is a child born showing no life signs, provided that pregnancy lasted longer than 28 weeks.

**Death causes.** The data on death causes are classified according to the International classification of

diseases, injuries and death causes (Revision 10, in use since 1997).

#### Sources and methods of data collection

The data on the employed in enterprises, cooperatives, institutions and organizations were collected on the basis of Semiannual report on the employed and their salaries and wages and through Survey supplementary to the semiannual report on the employed and their salaries and wages, which provided the assessment of the number of employed in small-size enterprise (up to 50 employed) that were not covered by regular semiannual survey.

The data on private entrepreneurs, persons that individually run business/are professionally active, and on their employees were collected through the regular semiannual survey, provided by the Health Insurance Office of the Republic of Serbia.

Business units with the registered main or principal activity other than that of the head office of enterprise or institution are considered as separate reporting units, even though they are situated on the territory of the municipality where the head office of the respective enterprise / institution is seated.

Also, as a separate reporting unit we consider any business unit that is situated out of the municipality where the head office of the corporate enterprise or institution is found.

## PRICES

### Sources and methods of data collection

The prices of industrial (foodstuffs and non-food) products and the prices of services are scanned once per month at 3-10 places, depending on size of town. The prices of agricultural products are surveyed twice a month, generally in 3 to 5 stores and in market places (1 to 5 markets in a town).

Average monthly price for each item and service in a town is calculated by non-weighted arithmetical mean value of prices at several surveyed prices. Average annual prices for industrial products and services are calculated by non-weighted arithmetical mean value of monthly prices and for agricultural products by weighting monthly prices of fresh vegetables and fruit with weights that present the quantity structure of the products sold in the respective month.

### Coverage

Retail prices are scanned in 15 towns (10 of the central Serbia and 5 of Vojvodina) and they relate to about 470 products and services (about 145 foodstuff products, 245 industrial non-food products and about 80 kinds of services).

About 1250 estimators supply the respective data for about 4000 estimated areas (on the territory of the central Serbia and Vojvodina), which as a rule include one or more cadastral municipalities. Mainly statistical estimators are successful agricultural producers who are well familiar with local developments. In their activities, these statistical estimators rely on recent cadastre data, estimates of previous years, information from agricultural producers and professionals, their own observations and on other sources.
