According to the preliminary results, the turnover of retail trade in the Republic of Serbia in December 2010, compared to December 2009, increased by 18.3% at current prices and by 6.7% at constant prices. In December 2010 compared to the previous month of the same year, the turnover increased by 13.5% at current prices and by 12.4% at constant prices.

Comparing 2010 with 2009, the turnover of retail trade increased by 7.2% at current prices and decreased by 0.9% at constant prices.

**Notes:** The indices published in this communication are based on the Monthly Survey of Retail Trade. Since 2009, all big and middle-sized enterprises, registered in the sections 50 and 52 of the Classification of Activities have been included in the sample, while small enterprises have been selected by the random sample method. The sample also involves certain number of enterprises registered in other sections of activities, but performing the retail trade activity.

The turnover in retail trade includes VAT.

The turnover indices at constant prices have been obtained by deflating the indices at current prices by the corresponding indices of retail prices, electricity excluded.

All published indices ought to be regarded as preliminary results, meaning that some corrections may appear on the basis of the obtained results in the quarterly statistical survey – the Quarterly Survey of Retail Trade, which are published as a separate communication.

Seasonally adjusted retail trade turnover indices at constant prices are published in “Monthly statistical review”.

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohia and therefore these data are not included in the coverage for the Republic of Serbia (total).
