Statistics of agriculture

SERB 034 PO12 210211

Number of livestock

As of 01.12.2010

- Preliminary results -

The presented data are preliminary results and relate to the number of livestock - total and to the number of breeding heads, by types.

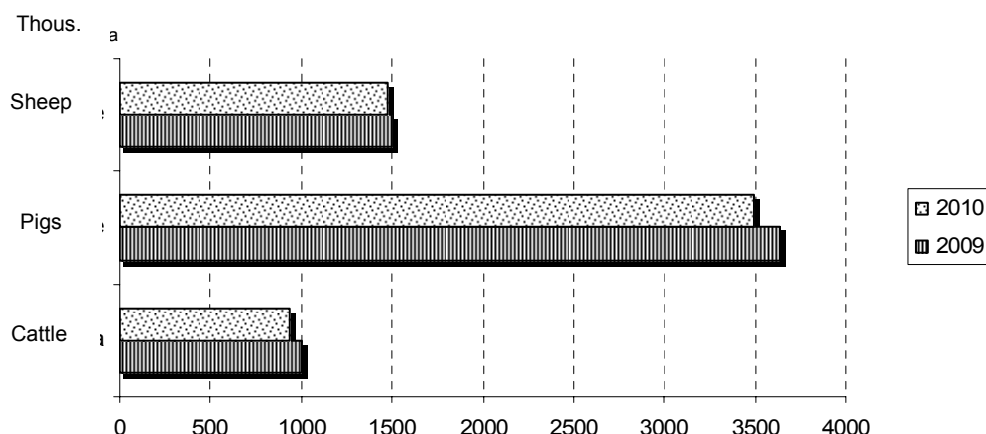

Data on the number of livestock, referring to companies, agricultural cooperatives and other forms of legal entities that deal with livestock breeding are collected by regular annual reports. Data on the number of livestock, related to family holdings are obtained by annual Livestock Number Survey (two - stage sample), covering about 1 % of family holdings.

The data as of December 1st 2010 in the Republic of Serbia, when compared to the previous data, show that number of horses decreased by 5.4%, of cattle by 6.4%, number of cows and heifers in calf by 4.1%, of pigs by 3.9%, of sows and sows of first farrow by 0.3 %, of sheep by 1.9%, of ewes for breeding by 1.6%, number of poultry decreased by 11.7% and of goats by 10.0%.

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohia and therefore these data are not included in the coverage for the Republic of Serbia (total).

Final data on livestock number, by types and categories, as well as data on livestock balance and livestock production will be published in April of the current year.

Number of livestock in the Republic of Serbia, 2009 and 2010
