Marriages and divorces in the Republic of Serbia, 2010

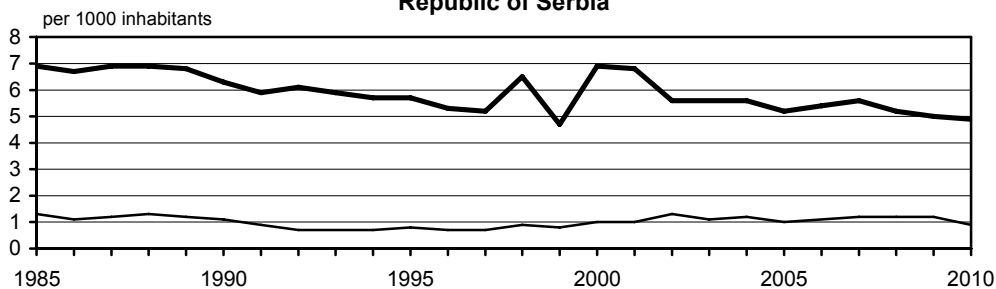

In this communication, the Statistical Office of the Republic of Serbia presents the main data on marriages in 2010, according to: age of groom and bride, order of marriage, previous marital status, activity, educational attainment and national affiliation, as well as main data on divorces in 2010, by age of husband and wife, order of marriage, previous marital status, duration of marriage, number of dependent children and to whom children are given after divorce.

For a fuller consideration of these phenomena, the basic indicators are provided for 2002 and period 2007-2010. All relevant indicators are calculated on the basis of estimated mid-year population, according to the concept of constant population from the 2002 Census.

Statistics of marriages encompasses marriages signed according to valid legal acts on marriages, noted in the registry of marriage certificates, while statistics of divorces includes legally divorced, annulled or illegal marriages.

Starting from 1998 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohia and therefore these data are not included in the coverage for the Republic of Serbia (total).
