Methodological explanations

The Statistical Office of the Republic of Serbia publishes the data on investments in fixed assets of the Republic of Serbia at current prices, according to the section level of the Classification of Activities pursuant to organization principle (investments are classified by domicile and activities of the investors).

The data on the investments are the results of the survey "Annual Report on Investments in Fixed Assets", which has been, since 2006, partly modified and harmonized with European System of Accounts 1995 (ESA95) and System of National Accounts 1993 (SNA93). The reporting units are all legal entities in the country that are direct investors. Coverage of the survey is complete, excluding the legal entities that are classified as small enterprises, according to article 7 of the Law on accounting and revision. Data on such entities are collected by the sample method. Even though this survey provides the majority of data on investments, certain additional calculations are also required.

Realized investments in fixed assets relate to the value of actually executed construction, production or purchase of objects, equipment and other fixed assets that were carried out in the respective year, regardless of the fact whether the investments were accomplished or not and whether they were paid off or not. The fixed assets in the production process have been used for more than a year. They can be new or second-hand, purchased or received free from domestic or international donors, produced in own arrangement or obtained through financial leasing.

Realized investments in *new* fixed assets present purchases performed directly by construction works contractors, equipment producers or fixed assets produced from own resources, i.e. fixed assets that still have not been object of selling and purchasing among direct users of these goods. Second-hand equipment purchased abroad, investments in significant land improvements and costs of land ownership transfer (excluded is value of land purchase) are also taken to be realized investments in new fixed assets.

Realized payments for investments in fixed assets present money investments in fixed assets, performed during a year, regardless of the time of construction, production or purchase.
