## Realized yield of late crops, plums and grapes in the Republic of Serbia, 2011 - Preliminary results -

Data on realized yield of late crops, plums and grapes are shown as of November 10<sup>th</sup> 2011.

According to these data, maize production in 2011 amounted to 6463 thousand tones, which is by 10.3% less than realized production in the previous year. Compared to 2010, expected production of sunflower is by 14.5% greater, of potatoes by 1.8%, while expected is smaller production of sugar beet, by 15.3% and of soya, by 19.2%.

Compared to ten-year average (2001-2010), expected production of maize is by 10.2% greater, of sunflower, by 19.4%, of soya, by 30.9%, of sugar beet, by 6.8% and of potatoes, by 1.9%.

Production of plums increased by 39.1% respective to production realized in 2010 and related to ten-year average, the increase was 21.2%. Realized production of grapes in the Republic of Serbia remained on the same level as in 2010 and compared to ten-year average, it decreased by 11.7%.

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohia and therefore these data are not included in the coverage for the Republic of Serbia (total).

Territorial distribution is in accordance with the Regulation on Nomenclature of Statistical Territorial Units ("Official Gazette of RS", No. 109/09 and 46/10).

Final data on realized yield of late crops and production of fruit and grapes in 2011 will be published in mid-December.

## Production of some main crops, plums and grapes

Thous. tons

### Methodological notes

Data in this statistical release are gathered by the Reports on realized yield of late crops, fruit and grapes (PO-33a, PO-33b).

Companies and agricultural cooperatives complete the reports, based on own accounting records, while data on family holdings are produced by statistical estimators, for each of the estimation areas (one cadastre municipality or several of them).

Harvested areas are areas on which crops were harvested and yield realized. Realized yield of fruit and grapes is expressed as yield per fertile tree/ vine.

For interested users, more detailed short methodology on crop production statistics is available on the website of the Statistical Office of the Republic of Serbia: [www.stat.gov.rs](http://www.stat.gov.rs).
