Methodological explanations

The aim of this survey is the calculation of price indices of producers' prices of agriculture and fishing products. Average prices are calculated based on quantities and values of purchased and sold products, obtained from the Trade Statistics and Agricultural Statistics.

Data are published about 12th of each month (the reference period m-2), in the edition Statistical Release, with the mark CN40, and they are also presented on the website of the Statistical Office of the Republic of Serbia (www.stat.gov.rs).
