Methodological Notes: The data published in this statistical release were obtained from three regular quarterly surveys relating to: a) wholesale and retail trade of motor vehicles and motorcycles, b) wholesale trade and c) retail trade, which are conducted on a sample of companies.

The sampling frame comprises all large, medium-sized and randomly selected companies. The estimation includes also certain companies that are not registered under trade as being their principal activity, but have parts dealing with trade.

In 2011, new standards for the collection and publication of statistical data were used: Classification of Activities (2010) (Official Gazette of RS, 54/2010), Classification of Products by Activities and Nomenclature of Statistical Territorial Units (Official Gazette of RS, 109/09 and 46/10).

Methodological notes and definitions by trade divisions of the Classification of Activities (CA divisions 45-47) are available on the website of the Statistical Office of the Republic of Serbia (www.stat.gov.rs)

The cited methodology changes should be taken into account when comparing the data published up to 2011.

Goods turnover includes value added tax (VAT).

Goods turnover indices at constant prices are obtained by deflating the indices at current prices with appropriate consumer price indices, which exclude: water (from public utilities systems), electricity and motor vehicles, motorcycles and parts thereof.

Seasonally adjusted retail trade indices at constant prices are published in "Monthly Statistical Review".

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohia and therefore these data are not included in the coverage for the Republic of Serbia (total).
