**Survey on Income and living conditions**

SRB366 PD10 301213

## Poverty and Social Inequality in Republic of Serbia in 2013

- Revised data -

The **Survey on Income and Living Conditions (SILC)** was implemented for the first time in Serbia in 2013.

The **goal** of the Survey is to collect data in order to calculate the indicators of poverty, social exclusion and living conditions. The way in which the survey is conducted is of particular importance, knowing that it has been based on the standardized methodology, applied in all EU member states. The Survey is conducted once a year.

According to the results, the **at-risk-of-poverty rate** in 2012 is **24.5%**. These persons are not necessarily poor, but they are at the higher risk of poverty than the others.

The **at-risk-of-poverty threshold** (relative poverty line) amounts to **13,680.00** dinars a month on an average for a single person household. For a household with two adults and one child aged below 14, the threshold is **24,624.00** dinars<sup>1</sup> per month, while for a four-member household with two adults and two children aged below 14, it amounts to **28,728.00** dinars.

The **at-risk-of-poverty rate by age** shows that individuals up to 18 years of age are the most exposed to the poverty risk (**29.7%**). The lowest at-risk-of-poverty rate is found in the group of persons who are over 65 years (**19.4%**).

The highest at-risk-of-poverty rate have individuals in households with two adults with three or more dependent children<sup>2</sup>, **44.4%**, and single parents with one or more dependent children, **34.2%**.

According to the **employment status** for persons aged 18 and over, the most exposed to the at-risk-of-poverty are unemployed persons (**48.4%**), while the lowest at-risk-of-poverty rate have employees working for employers (**6.4%**). In case of self-employed persons, this rate amounts to **38.3%**. The at-risk-of-poverty rate for pensioners is **14.4%**.

**Graph 1. Main indicators on poverty and social exclusion, %**

<sup>1</sup> See methodological explanation for equivalised disposable income

<sup>2</sup> The notion "dependent child" refers to all individuals less than 18, as well as to persons aged 18 to 24 who live with at least one parent and are economically inactive.

**Table 1. Relative poverty and inequality indicators<sup>3</sup>**

	2013
<b>At-risk-of-poverty rate, %</b>	<b>24.5</b>
At-risk-of-poverty rate before social transfers <sup>4</sup> :	
Social transfers not included in the income, %	31.8
Pensions and social transfers not included in the income, %	51.1
At-risk-of-poverty threshold (on a <u>monthly</u> level):	
Single person household, in RSD	13,680.00
Household with two adults and one child younger than 14 years, in RSD	24,624.00
Household with two adults and two children younger than 14 years, in RSD	28,728.00
Relative at-risk-of-poverty gap, %	36.6
S80/S20 income quintile share ratio	8.6
Gini coefficient	0.38

**Table 2. At-risk-of-poverty rate by sex and age, %**

	2013		
	Gender		Total
	Male	Female	
<b>REPUBLIC OF SERBIA<sup>5</sup></b>	<b>24.9</b>	<b>24.1</b>	<b>24.5</b>
<b>Age groups</b>			
0-17 <sup>6</sup>	-	-	29.7
18-64	25.5	23.3	24.4
18-24	27.7	26.4	27.0
25-54	25.0	24.6	24.8
55-64	25.8	18.3	21.8
65 and over	15.5	22.3	19.4

**Table 3. At-risk-of-poverty rate by the type of household, %**

	2013
<b>All households without dependent children</b>	<b>21.3</b>
Single person household	26.3
Male	29.5
Female	24.4
Younger than 65	28.1
Older than 64	24.9
Two adults without dependent children	21.4
Two adults younger than 65	24.6
Two adults, at least one aged 65 years and over	18.1
Other households without dependent children	19.2
<b>All households with dependent children</b>	<b>27.0</b>
Single person with dependent children	34.2
Two adults with one dependent child	24.9
Two adults with two dependent children	24.6
Two adults with three or more dependent children	44.4
Other households with dependent children	25.8

<sup>3</sup> The definitions of the main indicators are given in the methodology section

<sup>4</sup> The at-risk-of-poverty rate if social transfers and pensions would not exist

<sup>5</sup> Since 1999, the Statistical Office of the Republic of Serbia has not collected data for the AP Kosovo and Metohia and therefore it is not included in the coverage of the data for the Republic of Serbia (total)

<sup>6</sup> For the 0-17 age group only the total at-risk-of-poverty rate is shown, without any separation by sex

**Table 4. At-risk-of-poverty rate by the most frequent status in the labor market and by sex (for persons aged 18 and over), %**

	2013		
	Gender		Total
	Male	Female	
<b>Employed persons</b>	<b>16.5</b>	<b>12.8</b>	<b>14.9</b>
Employees	7.1	5.7	6.4
Self-employed <sup>7</sup>	38.4	38.2	38.3
<b>Not employed persons</b>	<b>30.0</b>	<b>28.2</b>	<b>29.0</b>
Unemployed persons	51.1	45.1	48.4
Retired persons	13.5	15.1	14.4
Other inactive persons	26.6	34.8	32.5

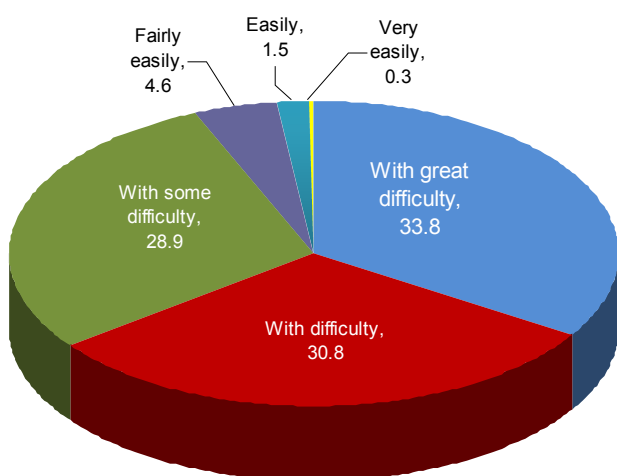

**Table 5. Dispersion around the at-risk-of-poverty threshold, %**

	2013
<b>40% of the national median equivalised disposable income</b> At-risk-of-poverty rate	13.3
<b>50% of the national median equivalised disposable income</b> At-risk-of-poverty rate	18.4
<b>70% of the national median equivalised disposable income</b> At-risk-of-poverty rate	30.4

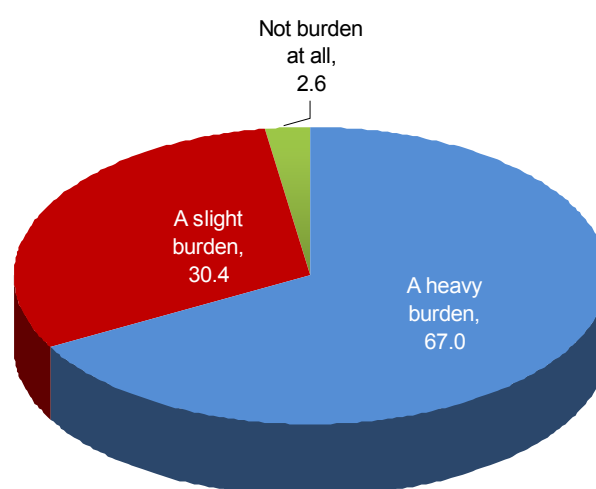

**Table 6. Material deprivation indicators, %**

	2013
<b>Persons who live in a household that:</b>	
Cannot afford paying for one week annual holiday away from home	67.2
Cannot afford a meal with meat, chicken, fish (or vegetarian equivalent) every second day	30.6
Cannot afford unexpected financial expense (10,000 RSD)	50.1
Cannot afford to keep home adequately warm	18.3
<b>Material deprivation rate (three or more items)</b>	<b>44.3</b>

**Graph 2. Subjective poverty (Ability of the household to make ends meet), %**

**Graph 3. Financial burden of the total housing cost, %**

<sup>7</sup> Self-employed persons also include farmers

Graph 4. At-risk-of-poverty rate by poverty threshold in 2013, comparison with other European countries, %

## METHODOLOGY

**Territorial coverage:** The survey is implemented on the territory of the Republic of Serbia and the processing provides data for the Republic of Serbia (total) and for the regions: Belgrade region, Vojvodina region, Sumadija and Western Serbia, and Southern and Eastern Serbia. Since 1999, the Statistical Office of the Republic of Serbia has not collected data for the AP Kosovo and Metohia and therefore it is not included in the coverage of the data for the Republic of Serbia (total).

**Sample:** The sample design for the survey is a two-stage stratified sample with enumeration areas as the primary and households as the secondary units of selection. From an original sample design that included 8,008 of the households, 6,501 households were surveyed (81.2%), which included 17,187 persons aged 15 and over.

**Observation units** are households selected according to the sample plan, whether these were one-person or several-member households, as well as all household members aged 15 and over. Collective households were not included in this survey.

- A **household** means any family or other community of persons who live together and jointly spend funds for meeting their basic life needs (food, housing, etc.), regardless of whether all members are permanently at the place where the household resides or some of them temporarily reside in some other place in the country or abroad on account of work, education or for some other reason.
- **Collective** (institutional) **households** are, e.g., monasteries, institutes for the placement of children without parental care, student dormitories, military facilities, boarding schools, establishments for carrying out prison sanctions and detention measures, etc.

**Reference period** for the collected data that refers to:

- **income** is 12 months in the previous calendar year – the year 2012 for the first wave,
- **material deprivation** is the moment of surveying – the year 2013 for the first wave.

**Equivalised disposable income** is the total household disposable income evenly distributed among the members of the household according to the modified OECD (Organisation for Economic Co-operation and Development) equivalence scale. In accordance with this scale, first adult member of the household receives the value of 1, other adults aged 14 and over 0.5, and children under the age of 14, 0.3. Household income does not include income in kind.

The **at-risk-of-poverty threshold** (relative poverty line) represents 60% of the median national equivalised disposable income and it is presented in dinars.

The **at-risk-of-poverty rate** represents the share of persons whose equivalised disposable income is below relative poverty line. These persons are not necessarily poor, but they are at the higher risk of poverty than others.

The **relative at-risk-of-poverty gap** represents the difference between the at-risk-of-poverty threshold and the median equivalised income of the persons who are below the at-risk-of-poverty threshold

The **S80/S20 income quintile share ratio** compares the total equivalised disposable income of the upper income quintile (20% of the population with the highest equivalised income) with those from the lower income quintile (20% of the population with the lowest equivalised income).

The **Gini coefficient** represents the measure of inequality in the distribution of income. The value of this coefficient goes within the interval from 0 to 1, where 0 represents perfect equality, i.e., each person has equal income. As the value of the coefficient grows, so grows the income inequality.

The **most frequent status in the labor market** refers to the activity status which the person had for at least 7 months during the reference period. It is calculated for the persons aged 18 and over.

The **dispersion around the at-risk-of-poverty threshold** shows sensitivity of the estimated at-risk-of-poverty rate to the selection of the poverty threshold – 40%, 50%, 70% of the median national equivalised disposable income.

The **material deprivation of a household** is an indicator of the material conditions that influence the quality of life of the household.

**The material deprivation items are:**

1. inability of the household to keep its home adequately warm,
2. inability of the household to afford the washing machine,
3. inability of the household to afford a car,
4. inability of the household to afford paying for one week annual holiday away from home,
5. inability of the household to face unexpected financial expenses,
6. inability of the household to afford a telephone,
7. inability of the household to afford a colour TV,
8. inability of the household to afford a meal with meat, chicken, fish (or vegetarian equivalent) every second day,
9. being in arrears with mortgage or rent payments, utility bills, hire purchase instalments or other loan payments.

The **material deprivation rate** is an indicator of the inability of a household to financially afford at least 3 out of 9 items of material deprivation.

The **severe material deprivation rate** is an indicator of financial inability of a household to afford at least 4 out of 9 items of material deprivation.

**Subjective poverty (Ability to make ends meet)** represents a subjective feeling of the respondents about the difficulties faced by the household in its attempt to pay all of its necessary costs taking into consideration the total income of that household.

**Financial burden of the total housing cost** shows the degree to which housing costs represent a financial burden for a household. These expenditures include housing payments whether installments for the repayment of a loan, if the household member is the owner of the dwelling, or rent, if the household members rents the dwelling. Housing costs also include utility services, expenditures related to housing and expenditures related to the maintenance of the dwelling.

**The work intensity** of the household refers to the number of months that all working age household members have been working during the income reference period as a proportion of the total number of months that could theoretically be worked within the household. The work intensity is defined as very low (0-0.20), low (0.20-0.45), medium (0.45-0.55), high (0.55-0.85) and very high (0.85-1). For example, **low work intensity** refers to households whose working-age members worked between 20% and 45% of the total number of months they could have possibly worked during a referent period.
