Municipalities in the Republic of Serbia by areas and regions

- As of January 1st 2013 -

Scale 1:1.840.000

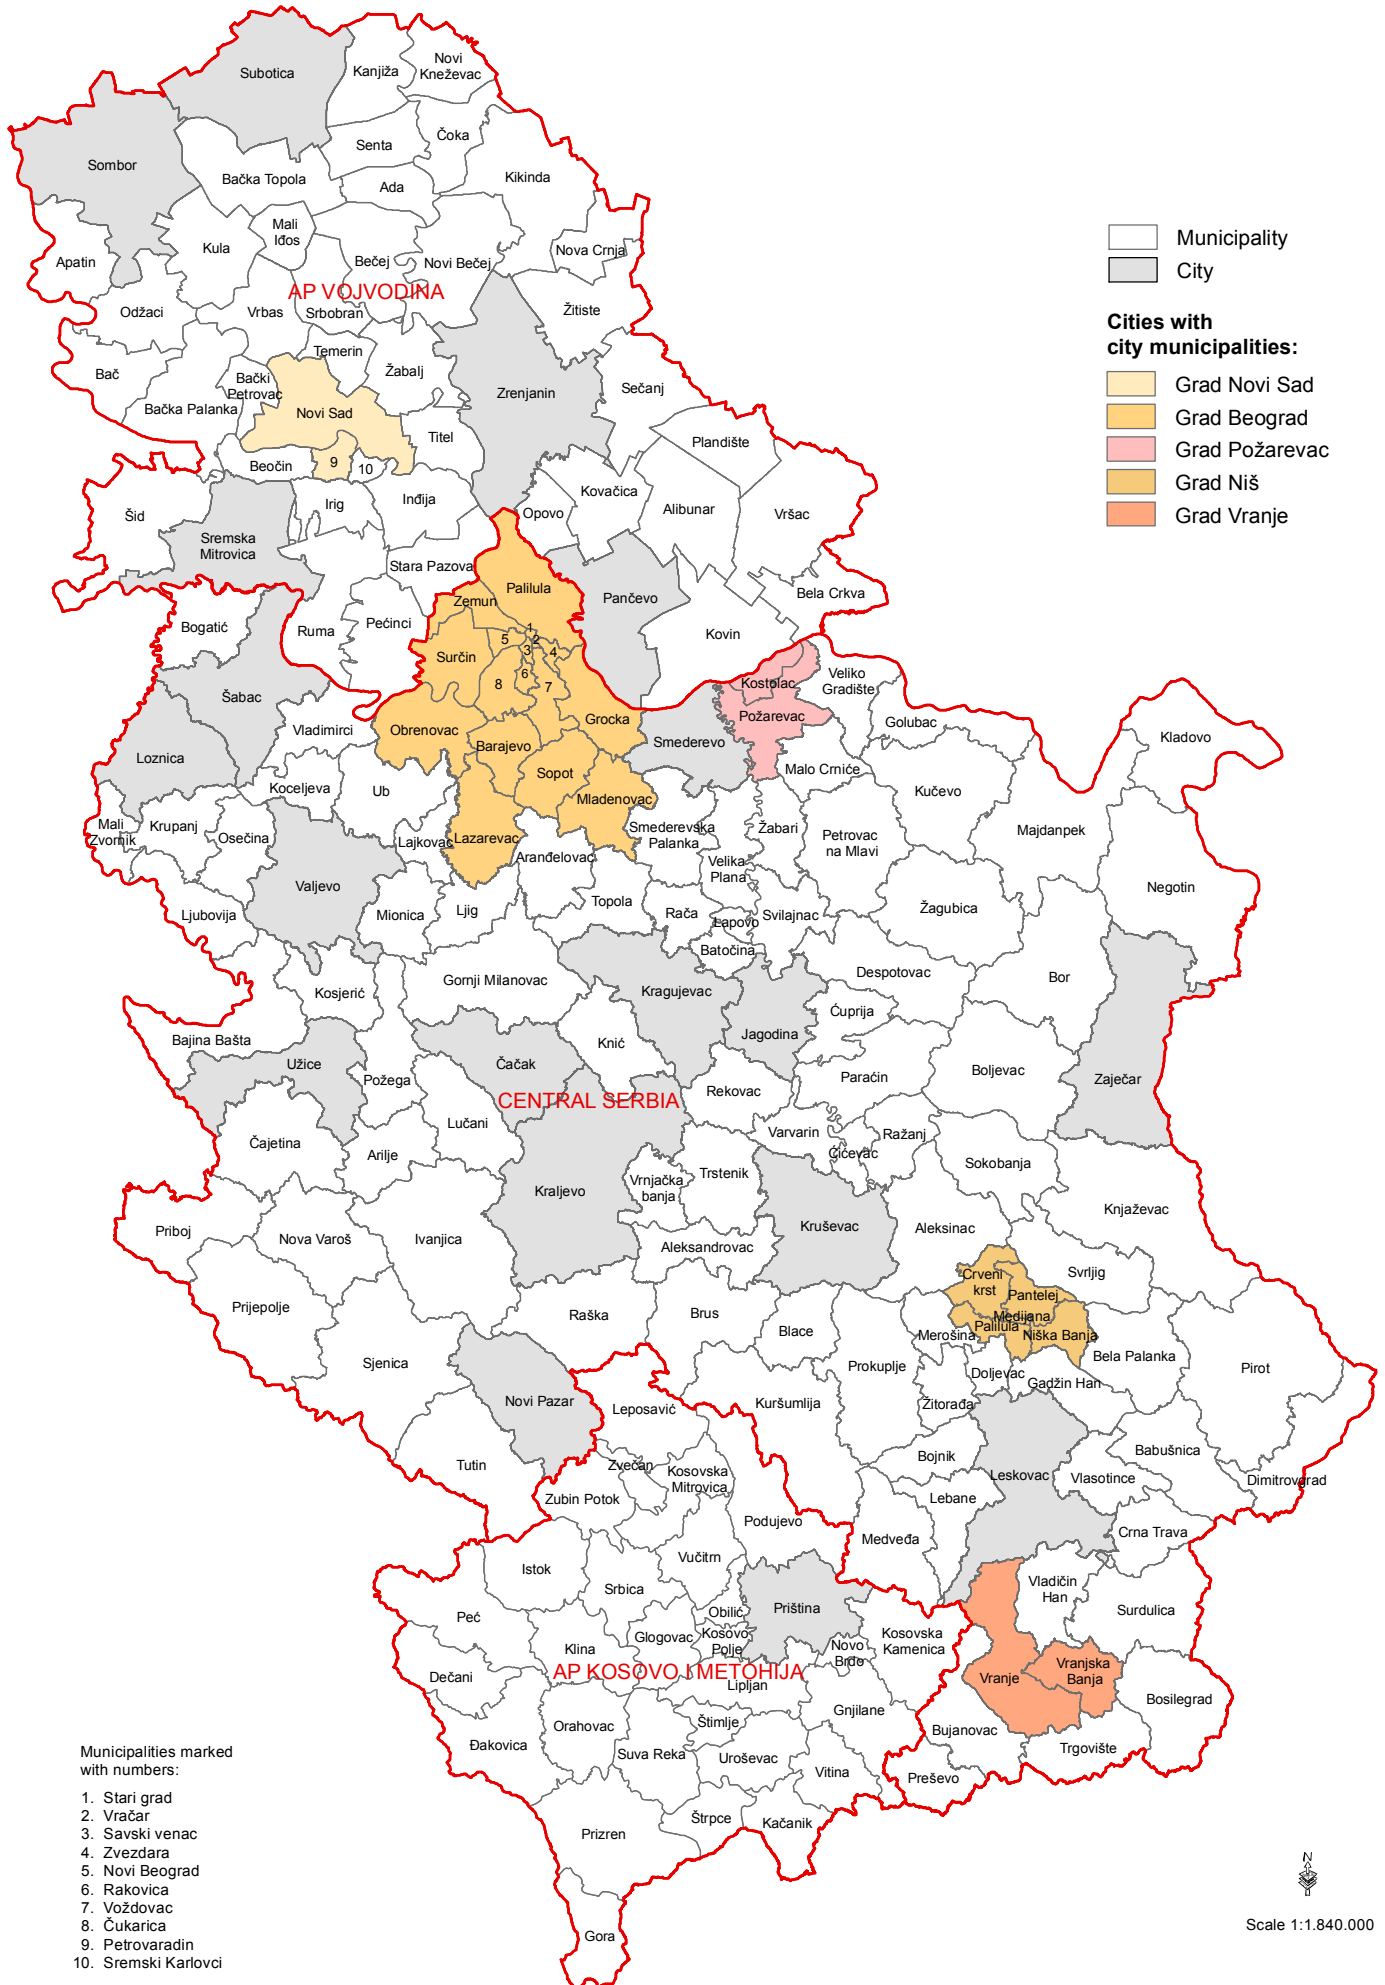

Municipalities in the Republic of Serbia by administrative districts

- As of January 1st 2013 -

Cities and municipalities in the Republic of Serbia

- As of January 1st 2013 -

Municipality
 City

Cities with city municipalities:

Grad Novi Sad
 Grad Beograd
 Grad Požarevac
 Grad Niš
 Grad Vranje

Municipalities marked with numbers:

1. Stari grad
2. Vračar
3. Savski venac
4. Zvezdara
5. Novi Beograd
6. Rakovica
7. Voždovac
8. Čukarica
9. Petrovaradin
10. Sremski Karlovci

Scale 1:1.840.000

PREFACE

By launching the publication “Municipalities and regions of the Republic of Serbia, 2013”, the Statistical Office of the Republic of Serbia carries on with issuing annual statistics on municipalities and regions of the Republic of Serbia. Our decision to establish a publication that comprises the data of various aspects of social and economic development of Serbian municipalities, cities and regions came from our appreciation of the social requirements for an overall insight of the status and development of certain municipalities, cities and regions.

This publication, just as the previous volumes of the series, features about 1000 data for each municipality, city and region. Considering the contents, coverage and presentations, this is actually a complete statistical yearbook of municipalities.

In presenting the data we took into account the present organization of the Republic of Serbia and its administrative bodies. Territorial distribution is presented in accordance with the Regulation on Nomenclature of Statistical Territorial Units (“Official Gazette of RS”, No. 109/09 and 46/10).

A wider selection of the data presented by municipalities, cities and regions which this publication could not possibly comprise, could be found in certain volumes of the “Bulletin”, the summary of which can be found at the end of the publication. At the Statistical Office of the Republic of Serbia, in Belgrade head office and at its regional offices, we keep filed more detailed statistical data that were not published, but are available to the interested clients. The data are offered in printed and electronic form (series 1997-2012 available at SORS website).

Apart from the data of the SORS, the publication contains the data provided by the Ministry of Interior of the Republic of Serbia, Ministry of Finance, Republic Geodetic Authority of the Republic of Serbia, National Employment Service and Institute of Public Health of Serbia.

Final and selected results of 2012 Census of Population, Households and Dwellings and Census of Agriculture are, for the first time, presented in this publication, by municipalities, cities and regions.

In order to provide an insight into the data of this publication for the wide range of users, the Statistical Office of the Republic of Serbia edited also a separate English version of the publication (“*Municipalities and regions of the Republic of Serbia, 2013*”).

“Municipalities and regions in the Republic of Serbia, 2013” Main principles of editing

Distribution of material

The statistical material in this publication was presented following basically the same sequence as in the “Statistical Yearbook of Serbia”. Certain chapters of the Yearbook were excluded here: Geographical review, Climate and environment, National accounts, Individual consumption, Money, External trade, Catering, Research and development and International review.

Data sources

The statistical data presented here resulted from the accomplished programs of statistical surveys.

Included are also certain statistics that are in charge of the following institutions: Ministry of Finance, Republic Geodetic Authority of the Republic of Serbia, National Employment Service and Institute of Public Health of Serbia. In the tables containing these data, given are the full titles of the data sources.

Coverage

The data coverage, whole and partial, is explained in the methodological papers. The data are fully comparable by municipalities and the years of production, excluding the cases where methodological changes appear.

Methodological explanations

In a separate chapter of the publication, presented are the most required methodological explanations. The detailed methodological explanations can be found in the volumes of the edition “Methodologies and standards” (SORS), i.e. “Methodological papers” (FSO) or on the website of the Statistical Office of the Republic of Serbia.

Technique of presentation

As a rule, all the municipalities were covered in table presentations. In certain areas, where the phenomena observed are not characteristic of all municipalities, the municipalities not featuring the observed phenomena were excluded. In the case of City of Belgrade, majority of data were presented so as to cover all municipalities.

The municipalities were divided here into administrative districts and data on cities were presented separately. It is to be noted that certain cities did not use the opportunity to establish the city municipalities. In this yearbook, the territorial distribution was presented in compliance with the Regulation on Nomenclature of Statistical Territorial Units (“Official Gazette of RS”, No. 109/09 and 45/10).

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).

¹⁾ Annual average is calculated on the basis of two dates, as of 31 March and 30 September.

²⁾ Covered are employees in legal entities (companies, enterprises, institutions, cooperatives and other organizations) and unincorporated enterprises (persons performing activity independently) and their employees.

³⁾ Employed in small-size enterprise (up to 50 employees) are included. They are not included in regular semi-annual survey and are obtained as an estimate from the Questionnaire supplementing the semi-annual survey on the employed.

¹⁾ Covered are employees in companies, enterprises, institutions, cooperatives, organizations and small - size companies (up to 50 employees). They are not included in regular semi-annual survey and are obtained as an estimate from the Questionnaire supplementing the semi-annual survey on the employed.

²⁾ Annual average is calculated on the basis of two dates, as of 31 March and 30 September.

¹⁾ Covered are employees in companies, enterprises, institutions, cooperatives, organizations and small - size companies (up to 50 employees). They are not included in regular semi-annual survey and are obtained as an estimate from the Questionnaire supplementing the semi-annual survey on the employed.

²⁾ Annual average is calculated on the basis of two dates, as of 31 March and 30 September.

¹⁾ Average number of overnight stays is calculated by dividing number of overnight stays by number of tourists. As tourists are registered in each place where they stay, in case of changing place, data have been repeated, i.e. duplicated.

Therefore, average number of overnight stays, calculated in this way, is probably smaller than real one.

¹⁾ Average number of overnight stays is calculated by dividing number of overnight stays by number of tourists. As tourists are registered in each place where they stay, in case of changing place, data have been repeated, i.e. duplicated. Therefore, average number of overnight stays, calculated in this way, is probably smaller than real one.

¹⁾ Average number of overnight stays is calculated by dividing number of overnight stays by number of tourists. As tourists are registered in each place where they stay, in case of changing place, data have been repeated, i.e. duplicated. Therefore, average number of overnight stays, calculated in this way, is probably smaller than real one.

14.2. TOURISTS AND OVERNIGHT STAYS, BY TOURIST PLACES, 2012 (continued)

METHODOLOGICAL EXPLANATIONS

GENERAL INFORMATION

Sources and methods of data collection

The data on the total area of the Republic of Serbia, as well as the data on the area of regions, areas and municipalities were taken over from the Republic Geodetic Authority, as of January 1st, 2012. Since the new cadastre measurements are in process, the data on the area should be considered as provisional. The data on the number of cadastre municipalities were also taken over from the Republic Geodetic Authority.

The population estimates for the post-census 2012 were derived according to the population estimate as of the end of the previous year (December 31st, 2011) and the data on the results of processed statistics on natural and mechanical migrations of population in 2012.

The mechanical component of migrations covers the internal migrations only.

SOCIAL SYSTEM

ELECTIONS AND COMPOSITION OF MUNICIPAL AND CITY/TOWN ASSEMBLIES

Sources and methods of data collection

The data on the results of the elections for the delegates to municipal and city/town assemblies, as well as data on delegates from Central Serbia and AP Vojvodina were obtained from the municipal and city/town electoral boards by summarized reports for the level of municipality, i.e. city/town. The data on delegates from AP Kosovo and Metohija could not be compiled.

Coverage

The elections are carried on the whole territory of RS. The lists of voters include all citizens aged 18 and over.

The elections for delegates were held on 6/05/2012. Together with the data from these elections, processed were the data from elections for delegates in nine municipalities, in which the elections were held in 2009, i.e. 2010: Arandjelovac, Bor, Vrbas, Kovin, Kosjeric, Negotin, Odzaci, Zemun and Vozdovac. Moreover,

included were all repeated elections from May 6th to June 29th 2012.

Definitions

Elections for delegates were conducted according to proportional system and each municipality/town presented one electoral unit in elections for delegates.

The candidates for delegates are pronounced by political parties, coalitions of parties, i.e. civil groups. The municipal and city/town assemblies are single-home institutions and the mandate of delegates lasts four years.

Pursuant to the amendment to the Local elections law from 2008, the presidents of municipalities and the mayors of cities shall be elected by delegates of municipal and city/town assemblies and the candidates are pronounced by political parties, coalitions of parties and civil groups with the majority of elected delegates for assemblies.

POPULATION

Sources and methods of data collection

The data on population for 2011 are shown according to the results of 2011 Census of population, households and dwellings.

The population number estimate in mid-year (as of 30 June) is calculated on the basis of data of population census, data on population increase and data on internal migrations.

Data on births, deaths and contracted marriages are compiled and supplied by registrars and data on divorces by the courts of respective jurisdiction.

Coverage

The statistics of births cover all births (live and still births) in the respective year. The statistics of deaths covers all death cases. The statistics of contracted marriages covers the marriages that have been legally contracted, i.e. entered into the register of marriages. The statistics of divorces covers all legally divorced, dissolved, null and void made marriages.

According to the legal provisions on registers, the cases of births, deaths and contracted marriages are entered into registers kept for the region where the respective events took place, regardless of the fact whether this is the place of residence of the concerning parties. When processed, the data are further reclassified according to place of usual residence and this is in compliance with the census concept of usually resident population.

It is to be noted that starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).

2011 Census was not conducted on the territory of AP Kosovo and Metohija. In the municipalities of Presevo and Bujanovac, the decreased number in census units' coverage was recorded due to the boycott by the majority of Albanian national community.

Definitions

Population For the purpose of determining the total number of population of a given area, it was in the 2011 Census that the concept of "usual residence" was used for the first time. According to this concept, a person's place of usual residence is the place at which a person alone (in case of one-person household) or with the members of his/her household, spends most of his/her time, i.e. daily night-rest, regardless of his/her legal residence. Thus, the total population of particular place includes persons who have lived in their place of usual residence for a continuous period of at least twelve months before the critical moment of the census, as well as persons who lived in that place for less than twelve months, but with the intention of staying there for at least one year.

Age In the tables of census data and vital statistics, the population was presented by age groups - complete years of age; e.g. the age group 0 – 4 comprises the children from the moment of birth to the completed fifth year.

According to the data of age, several important population sub-sets are derived: children aged below 7, aged 7-14, working age population (aged 15 – 64), and female fertile population (15 – 49), etc.

National or ethnic affiliation As in the previous censuses, in 2011 Census, the data on national composition of the population were collected on the basis of free declaration of population. According to Article 47 of the Constitution of the Republic of Serbia,

citizens are guaranteed absolute freedom regarding the declaration on their ethnicity. Moreover, the same article states that citizens are not obliged to declare themselves on their ethnicity. In such cases, the enumerator was obliged to write the following answer: "Did not declare".

Religion The answer as to the religion in 2011 Census is the result of individual conviction based on one's comprehension of religion; thus, what mattered was the identification with the religion, but not the membership of a religion. According to Article 43 of the Constitution of the Republic of Serbia, citizens are not obliged to declare themselves on their religion. In such cases, the enumerator was obliged to write the following answer: "Did not declare".

Mother tongue As in the previous census, in 2011 Census, mother tongue was taken to be the language first spoken in early childhood, i.e. if several languages were spoken in the household, it was the language that the person considered to be his/ her mother tongue. Even though there was no note on this question, the persons were not obliged to declare themselves on their mother tongue and the enumerator was obliged to write the answer: "Did not declare".

For children under 15 years of age, data on ethnic and cultural characteristics have been given by parents, adoptive parents, or guardians.

The highest educational attainment The highest educational attainment is the school which a person completed, thus attaining his/ her highest educational level. Data on completed school relate exclusively to education attained in the official educational system, so that education attained in scope of non-standard programs, i.e. informal education (various types of courses organized in workers' universities, people's universities, etc.) is not counted. Persons who earned master and doctoral degree are shown in the group of tertiary education.

Data on the highest educational level are shown only for the population aged 15 or over.

Legal marital status Data on the legal marital status refer to the formal, legal marital status of persons. Answers to this question were provided by all respondents, including those living in consensual unions. Data on legal marital status are presented for persons aged 15 and over.

Economic activity In Census 2011 (as well as in Census 2002), the concept of so called current activity was used. According to economic activity, total population was classified into economically active and economically inactive.

Economically active population („labor force“) comprises persons who perform an occupation and the unemployed.

The contingent of **persons who perform an occupation (the employed)** comprises persons aged 15 and over who performed in the week before the census a job that was paid or would be paid (in cash or in kind), regardless whether the person had a formal and legal employment contract, only oral agreement with the employer or performed a job independently, as well as persons who had a job, but were, for objective reasons, not able to perform it in the reference week because of illness, holiday or vacation, strike or lock-out, etc.

Unemployed persons comprise persons aged 15 and over who did not work in the reference week, but were actively seeking employment and were willing to start working if a job would be offered to them within two weeks in relation to the „critical moment of the census“.

Economically inactive population comprises persons who, in the week before the census, did not seek employment nor had the opportunity to start working within two weeks if a job would be offered.

Contingent of **children up to 15** relates to persons aged under the official minimal limit for the economic activity.

The category of **pensioners** comprises economically inactive persons who acquired pension rights, regardless whether it is an old-age, disability, survivors' or farmers' pension.

Contingent of **persons who receive income from property** involves persons gaining income such as rent (renting house or flat, business premises), royalties (income from equity), etc.

The category of **pupils/ students** relates to all persons aged 15 and over who attend full – time or part – time school and who are not economically active nor recipients of survivors' pensions.

The category of **homemakers (persons engaged only in household duties in their own home)** comprises persons who are most of their time engaged in household duties in their own home.

The category **Other** comprises persons who cannot be classified in any of the above categories of economically inactive population (e.g. children aged over 14 not attending school and not seeking a job, persons incapable of work, persons who, in the referent period, were serving the prison sentence or detention measures etc.).

Household is every family or other people community of persons who live together and share their living expenses (habitation, food etc). Household is also any person who lives alone and is not a member of another household, regardless whether living in a separate or shared housing unit, in a single-person accommodation or as a tenant (i.e. one - person household).

Live born is a child that showed the signs of life (breathing and heart beating) after birth.

Stillborn is a child born showing no life signs, provided that pregnancy lasted longer than 28 weeks.

Death causes. The data on death causes are based on the concept of the main cause of death and it is defined as a disease or injury that caused the set of sick conditions which directly led to death, an accident or violence resulting in death.

EMPLOYMENT AND SALARIES AND WAGES

Employment

Sources and methods of data collection

The data on the employed in legal entities (companies, enterprises, institutions, cooperatives, and organizations) were collected on the basis of Semiannual report on the employed and their salaries and wages and through Survey supplementary to the semiannual report on the employed and their salaries and wages, which provided the assessment of the number of employed in small-size enterprise (up to 50 employed) that were not covered by regular semiannual survey.

Data on private unincorporated enterprises (persons that independently perform the activity – profession) and on their employees were collected through the regular semiannual survey, provided by the Republic Fund of Health Insurance.

The annual average was calculated as the arithmetical mean value of the number of the employed persons as of 31 March and of 30 September.

The data on employment and unemployed persons are obtained from the National Employment Service.

Coverage

The semiannual survey on employment and salaries and wages covers companies, enterprises, cooperatives, institutions and other organizations. The survey does not cover: foreign citizens employed in the

Republic of Serbia, citizens of the Republic of Serbia employed with international representation offices in the Republic of Serbia, employed in the Ministry of Defence and in the Ministry of Interior. In implementing surveys on employment applied was organization - territory principle of observation, i.e. municipality was regarded as basic territorial unit. Therefore, as a reporting unit we anticipate every enterprise or institution with their business units at the territory of the municipality where the head office is seated and these units are engaged in the same principal activity. Business units with the registered main or principal activity other than that of the head office of enterprise or institution are considered as separate reporting units, even though they are situated on the territory of the municipality where the head office of the respective enterprise / institution is seated.

Also, as a separate reporting unit we consider any business unit that is situated out of the municipality where the head office of the corporate enterprise or institution is found.

The semiannual survey on private unincorporated enterprises (persons that independently perform activity – profession) and their employees covers only the employed persons that are registered at the Republic Fund of Health Insurance.

The data on unemployed persons cover only those persons registered with the National Employment Service.

Definitions

The term *employed* in this survey comprises persons who entered into employment with an employer (business companies, enterprise, institution, organization and private entrepreneur–person performing occupation-activity independently), as well as employer himself in case of a private entrepreneur - person performing occupation-activity independently. The persons working under contract, performing temporary or occasional jobs are not considered as *employed*.

Salaries and wages

Sources and methods of data collection

The data on average salaries and wages were collected pursuant to regular monthly surveys on the number of employed and salaries and wages, and the data provided by the Ministry of Finance and Economy (Tax administration).

Coverage

The data on salaries and wages of the employed in companies, enterprises, institutions, cooperatives and other organizations (legal entities) of all ownership types are collected by regular statistical survey.

Since January 2009, coverage of observation units has been extended. When calculating average salaries and wages, besides those paid to the employed in legal entities, also included are salaries and wages paid to employees in unincorporated enterprises (physical persons). Data on salaries and wages in unincorporated enterprises are taken over from the records of Tax administration.

Definitions

Pursuant to Article 105, the Act on labor, **salaries and wages** comprise remuneration including taxes and contributions that are paid out of earnings that employed acquired for the work executed and the time spent as office hours; then extra remuneration and other payments (excluding compensations for commuting to work, allowances for business trips – domestic and abroad, retirement compensations, solidarity aid, jubilee awards, compensations of undertaking costs and compensations for damages due to injury at work or professional disease).

LOCAL GOVERNMENT BUDGET

Sources and methods of data collection

Data on budgetary revenues and expenditures of municipalities and cities of the Republic of Serbia are collected and processed by the Ministry of Finance and Economy– Treasury Administration.

Coverage

Data on budgetary revenues and expenditures are related to statements of balance of budget of all cities and municipalities that create local government. Covered are all direct and indirect budgetary beneficiaries that are mainly financed from the local government funds.

Definitions

Total budgetary revenues consist of current (tax and non-tax) revenues, receipts from selling non-financial assets, and receipts from borrowing and selling financial assets. Receipts from the sales of non-

financial assets cover only income acquired through the sales of capital goods (government-ownership buildings and structures, stocks and land) and capital transfers from non-government institutions. Budgetary revenues are used to cover budgetary expenditures. Regular operating costs of budgetary beneficiaries are financed by current revenues. Budgetary expenditures also comprise purchase of non-financial assets, credit repayment and purchase of financial assets.

BUDGET BENEFICIARIES EXPENDITURES

Sources and methods of data collection

The data on direct budget beneficiaries were collected through regular statistical survey, 'Budget beneficiaries - Complex annual survey', which is carried out pursuant to financial statements and other accounting documents. The data on indirect budget beneficiaries were taken over from the balance of payment received from the Treasury administration.

Coverage

Compiled are the data on revenues and expenditures of budgetary beneficiaries. The data are shown according to the Classification of Activities.

Definitions

Budget beneficiaries' expenditures include the remuneration for employees, taxes, operating expenses, fees and fines, current donations, subsidies and grants, welfare from the budget, payments to NGOs, and re-payment of interests and incurred credit costs, amortization costs and purchase of non-financial assets.

INVESTMENTS

Sources and methods of data collection

The data on investments in fixed assets are collected from all legal persons, by the regular annual survey „Investments in Fixed Assets”, and they refer to all ownership types.

Coverage

The data on realized investments in fixed assets are given at current prices, by technical structure (construction works, equipment and other) and by the type of constructions (new facilities, reconstructions, modernization, superstructures, extensions or replacements of existing facilities) and by activities. They are classified by investments' destination and location (pure activity principle). Covered are all legal entities, except those classified as small-size

enterprises, pursuant to Article 7, the Act on accounting and auditing.

Definitions

Realized investments in a reporting year present the value of effectively carried out constructions, executions or purchase of new objects, equipment and other fixed assets, no matter whether these investments were accomplished and paid off.

PRICES

Sources and methods of data collection

The **retail prices** of agricultural and industrial products and the prices of services that are regularly processed each month are scanned by statistical institutions of selected towns. The prices of industrial (food and non-food) products and the prices of services are scanned once per month at 3-12 places, depending on size of town. The prices of agricultural products are surveyed twice a month, generally in 3 to 7 stores and in market places (1 to 7 markets in a town).

Average monthly price for each item and service in a town is calculated by non-weighted geometric mean value of prices at several surveyed places. Average annual prices for industrial products and services are calculated by non-weighted geometric mean value of monthly prices and for agricultural products by weighting monthly prices of fresh vegetables and fruit with weights that present the quantity structure of the products sold in the respective month.

Coverage

Retail prices are scanned in 15 towns (10 of the central Serbia and 5 of Vojvodina) and they relate to about 590 products and services.

Definitions

Retail prices are those prices at which retail shops, individual producers and service providers sell products and render services to end users. The prices include Value added tax.

AGRICULTURE

CENSUS OF AGRICULTURE 2012

Presented data are the part of results of 2012 Agriculture Census that was conducted on the territory of the Republic of Serbia in the period October 1st to

December 15th, 2012, in accordance with the Law on Agriculture Census, 2011 („Official Gazette of RS“, no. 104/09 and 24/11). The data are shown by holdings' location.

2012 Census of Agriculture covered enterprises, farm cooperatives, other forms of organization with the status of legal entities and unincorporated enterprises registered in the Business Register Agency under agricultural production as their primary activity or registered in another activity, but having organizational parts where agricultural production is performed, also including family agricultural holdings.

Definitions

An agricultural holding is a technical and economically independent production unit which has single management and on which an enterprise, farm cooperative or another legal entity, entrepreneur or family holding undertakes agricultural production as primary or secondary activity.

Holding's location is the place where overall agricultural production takes place or at least its main part. It is usually the place where agricultural facilities / buildings are placed, intended for agricultural production (e.g. buildings for cattle housing, glasshouses, coolers for agricultural products storage, the greatest administrative building, etc.) or the largest part of utilized agricultural area.

Utilized agricultural area includes:

- agricultural area in kitchen gardens
- arable land and gardens (including fallow land)
- permanent crops - orchards, vineyards, nurseries, crops of basket willows, areas with typha, carob trees, areas on which mushrooms are planted, as well as crops of Christmas trees intended for selling and
- meadows, pastures cultivated (used) by the holding.

CROP PRODUCTION

Sources and methods of data collection

The data on agricultural enterprises and cooperatives are collected through regular annual surveys on area sown in spring, early crops yields and late crops yields. The data are provided according to accounting and other records. The data on family holdings are obtained from statistical estimates. About 1250 estimators supply the respective data for about 4000 estimated areas (on the territory of the central Serbia and Vojvodina), which as a rule include one or more cadastral municipalities. Mainly statistical estimators are successful agricultural producers who are well familiar with local developments. In their activities, these statistical estimators rely on recent cadastre data, estimates of previous years, information

from agricultural producers and professionals, their own observations and on other sources.

Coverage

Since the statistics of land areas and yields are based on the overall cadastre, the estimates cover total funds and production of agricultural holdings, as well as other production (non-agricultural households, gardens in urban areas, etc.)

Definitions

Utilized agricultural area is land area utilized for agricultural production. Utilized agricultural area includes: arable land and kitchen gardens, orchards, vineyards, meadows and pastures.

Arable areas are the land areas used for field crop production. Here also included is land that is left 'to recover', uncultivated, as well as vine and fruit-tree nurseries and clover and alfalfa fields. However this publication does not include data on uncultivated land areas and nurseries, which makes the difference to 'arable fields and gardens – total'.

Yielding fruit trees and vines are those that may give yields, regardless the fact whether they actually gave yields or not.

More detailed methodological explanations of crop production statistics could be found in *the Methodological papers*, volume no 211, published by the FSO.

FORESTRY

Sources and methods of data collection

The data of forestry statistics are collected by regular annual surveys and are based on the existing programs and records of forests management: Annual survey on exploitation of public forests, Annual survey on private forests exploitation and Annual report on afforestation and forests growing for private and public forests, and Tree-annual survey on changes in forests' area for public and private forests. These data are all provided by *Srbijašume* and *Vojvodinašume*, the public forests administration companies, as well as by other organizations in charge of forests management (national parks, cooperatives, etc.)

Definitions

Under the term **forest** we assume a land area over 5 acres overgrown with forest trees, regardless the fact

it is of economic significance, has protection function or is envisaged for special purposes.

Afforestation is all artificial afforestation, by sowing or planting, either to re-grow forests on wasted land (afforestation 'in forests') or to grow new forests ('new' afforestation).

Forests felling relates to the gross mass of felled timber, measured at stumps.

Technical wood is the wood that is due to its physical and technical properties envisaged for technical and industrial purposes.

WATER SUPPLY AND SEWERAGE

Sources and methods of data collection

Data on water supply and the number of households connected to the net work are obtained by means of regular annual surveys on water supply. Data on sewerage and remediation activities and the number of households connected to the sewerage network are collected by the Annual survey on wastewater from settlements. Reporting units shall fill in forms in accordance with respective records and documents, and according to estimates when required. Data are collected annually, starting from 2005.

Coverage

The data on water usage in settlements are collected from reporting units in charge of water supply and/or managing water usage systems. Surveys do not cover individual water supply (household supply) systems, which serve exclusively certain households or household groups. The data on purified and waste water are collected from reporting units responsible for managing public sewerage system.

Definitions

Water supply anticipates total water quantities that the public system has abstracted from surface and underground water abstractions.

Supplied water means all directly abstracted and provided water quantities that the public supply system distributed to users during the referent year. The supplied quantities are determined by water meters or otherwise by calculations as stipulated by regulations for certain activity.

Wastewater is water that after use shall be transported to purification plant, or discharged to recipient (ground, underground or surface water). Wastewater quantities do not include atmospheric

water. Wastewater quantities are measured by water meters or estimated according to defined production standards.

To **purify wastewater**, i.e. polluted used water means to eliminate from water, to a n acceptable degree, all hazardous matters and radioactive substances that appeared, and in this way to make water safe for use.

CONSTRUCTION

Sources and methods of data collection

Data are collected in Annual survey on construction works, Monthly report on construction permits and Annual report on demolished housing constructions and dwelling adaptations.

Coverage

Annual survey on construction works covers all construction works carried out by legal and physical entities engaged in construction activity, section Construction, as well as legal entities not classified into construction activity, but that comprise units engaged in construction. Data on works carried out by sole proprietors are taken over from the records of construction permits.

Construction works value anticipates all construction materials applied and labor force used. The value does not include the costs of land, project design, supervision and VAT. The value of works relate to undertakings in referent year, i.e. accomplished and unaccomplished constructions. The value of works conducted by contractors is provided on the basis of annual balance statements, and the value of works undertaken by sole proprietors is taken over from the records of construction permits. The works executed were presented by territory where construction sites are found and not by territory, i.e. place where contractor's head office is situated.

Annual report on demolished housing constructions and dwelling adaptations cover demolished housing constructions, as well as buildings with one or more apartments adapted into non-residential premises. Reporting units are respective administrative bodies, as well as units that have available documentation on demolished constructions.

Definitions

Construction anticipates structures on the ground, any underground and over-ground construction, as well as hydro-technical structures, for which construction works are performed, and which are made of construction material, built-in finished products and parts.

Dwelling is any residential construction unit intended for habitation, consisting of one or several rooms with necessary auxiliary spaces (kitchen, bathroom, lobby, pantry, toilet, etc.) or without auxiliary spaces, and with one or more separate entrances.

More detailed methodological explanations on construction statistics are found in the SORS edition Methodologies and standards, Annual survey on construction works, volume 21/07 and Monthly report on construction permits, volume 22/07 and Annual survey on demolished dwelling constructions and dwellings converted into business premises, volume 23/07.

TRADE

SALE AND PURCHASE OF AGRICULTURAL, FORESTRY AND FISHING PRODUCTS

Sources and methods of data collection

The data on the sale and purchase of the products of agriculture, forestry and fishing are collected in the Monthly survey on turnover of agricultural products of private production, in enterprises and cooperatives and in the Monthly survey on purchase of agricultural products from family holdings. The report sources are records and other documentation provided by legal persons, cooperatives and other respective organizations.

Coverage

Purchase and sale of agricultural, forestry and fishing produce include sale of own production of enterprises and cooperatives and purchase from family holdings, authorized for organizing further sale or processing.

Definitions

Under the term '**sold and purchased quantities**' we anticipate the turnover, i.e. the delivery of agricultural products from own production of legal

persons and cooperatives, as well as directly purchased quantities of agricultural products from family households, aimed at further selling or processing.

TOURIST TRADE

Sources and methods of data collection

The data on tourist arrivals and overnight stays are presented according to regular survey – Monthly survey on arrivals and overnight stays in tourist resorts, where accommodation services are rendered.

Coverage

Monthly survey on tourist trade statistics covers all catering and other entities offering accommodation services. However, the coverage of tourist accommodation services in households may not be considered as complete, since some households provide accommodation services without having obtained license from the respective local government bodies and therefore they are not covered by the statistical survey. Also, some households do not provide data for all tourist customers.

Definitions

A **tourist** is each person who makes at least one overnight stay at a tourist resort or other boarding facility, in the place other than his / her usual place of residence.

Tourists are registered in the place or resort where they stay. In the case of changing the place, they are again registered i.e. double recorded.

TRANSPORT AND COMMUNICATIONS

Sources and methods of data collection

The data on national roads, class I and class II are provided from the Roads Directorate and the respective municipal bodies and data on provincial (municipal) roads from regular annual surveys, provided by the respective municipal bodies.

Data on PTT traffic are obtained from the public enterprises PTT company "Srbija", "Telekom Srbija" AD, "Telenor" d.o.o, "VIP MOBILE" d.o.o, "Orion telekom" d.o.o. and "Serbia Broadband" d.o.o., on the basis of regular annual statistical reports.

The data on registered road motor vehicles and trailers are obtained from the files of registered vehicles that are maintained in the Ministry of Interior of Serbia.

Coverage

Funds and PTT traffic relate to the public PTT traffic carried out under the organization of "Srbija" PTT public enterprise, "TELEKOM SRBIJA", a.d, "Telenor" d.o.o, "Vip Mobile" d.o.o, "Orion telekom" d.o.o and "Serbia Broadband" d.o.o.

Telephone subscribers comprise the active lines of physical persons and legal entities, presenting the property of enterprises that render services and being in the ownership of subscribers.

Covered are all registered vehicles except the vehicles of the Serbian army, diplomatic and consular representation offices and the vehicles bearing temporary registration plates.

PTT mailing and parcel traffic comprise only dispatches in domestic and dispatches and receipts in international traffic. Data on letter mails include printed items, business documents, dispatches for the blind and air mailings. Turnover of newspapers and magazines is not presented by municipalities, since such dispatches are only registered in the places where editorial boards have their head offices and when received - as letter mails.

EDUCATION

Sources and methods of data collection

Data on pre-school, primary, secondary and tertiary education are obtained from regular annual surveys.

Data on students' boarding houses are taken over from the Ministry of Education, Science and Technological Development.

Coverage

Annual reports of Education Statistics cover pre-school, primary and lower secondary, upper secondary and tertiary education from the division of the Classification of Activities - "Education". Data on pre-school, primary and lower secondary and upper secondary education relate to the end of the school year, whereas data on students enrolled in tertiary education refer to the beginning of winter semester, i.e. when students were enrolled. Data on graduated students relate to the calendar year.

Definitions

In the statistics of education, a *school* is taken to be an educational institution or educational unit where educational activity is performed according to a curriculum. Each school unit is, regardless whether it is an independent school unit, regional unit or class within another type of school, shown under this concept.

The activity of **preschool education** refers to education of preschool aged children, i.e. children from six

months to the age of starting school. This program is performed in preschool institutions. Activity of primary and lower secondary and upper secondary education is the activity of the direct social interest and is realized as public service.

Primary and lower secondary education in the Republic of Serbia is compulsory, lasting eight years and being conducted in two educational cycles. The first cycle covers the first, second, third and fourth grade.

Activity of **upper secondary education** is performed in secondary school, i.e. in gymnasium, vocational school, arts school, mixed school (gymnasium and vocational or arts school).

Pupils with disabilities acquire education, as a rule, in schools with other pupils, and when it is in the best interest for pupils, they attend schools for pupils with disabilities, in accordance with the Law. Classes with pupils with disabilities in relevant regular schools are shown as school units, which is in line with the statistical definition of school as an observation unit.

Activity of tertiary education is realized as academic or vocational studies on the grounds of certified, i.e. accredited programs for acquiring tertiary education. Tertiary education covers higher schools, faculties and art academies.

CULTURE

Sources and methods of data collection

The data on cinemas are compiled annually in the regular statistical survey on cinemas.

Definitions

A **cinema** is a hall or open-air theater equipped and envisaged for public film projections, regardless the fact it is an independent organization or a composite unit of some other organization. Included are regular cinemas (in permanently occupied halls), open-air cinemas and traveling cinemas.

Cinema performance is a public film projection (feature film projection) that lasts approximately two hours.

HUMAN HEALTH

Sources and methods of data collection

Statistical data on health are taken over from the Institute of Public Health of Serbia "Dr Milan Jovanovic Batut".

Coverage

Data published in this chapter were compiled from health care institutions in the Republic of Serbia (without data for Kosovo and Metohija), which are included in the Plan of health institutions network. Figures on staff number are shown as of December 31.

SOCIAL WORK

Sources and methods of data collection

The data on social work beneficiaries have been taken over from the Republic Institute for Social Protection. Due to methodology changes regarding data collecting, the referent table has been changed in respect with the previous years. Categories of minor and adult beneficiaries have been changed with categories of children, young, adult and old beneficiaries of social work activities.

Coverage

Regular annual statistical surveys of the Republic Institute for Social Protection cover all social work centers, social work services within municipal assemblies and also inter-municipal centers on the territory of the Republic of Serbia.

Definitions

Social work is taken to be the organized social activity of public interest, performed with the aim to encourage citizens for independent and productive

living and prevent causing and solve the consequences of social exclusion.

A **social work beneficiary** is any person that is registered as social case to be solved, and this case is further processed by social welfare center or by respective professional team of municipal assembly.

JUSTICE ADMINISTRATION

Sources and methods of data collection

Data on adult and minor persons sentenced by absolute decrees are compiled from the courts of general jurisdiction, by the way of individual statistical questionnaire.

Coverage

Covered are all adult persons, i.e. minor persons pronounced guilty and convicted, i.e. rendered sentence, which courts of general jurisdiction acknowledged as decree absolute, in the respective year and pursuant to Penalty code.

Definitions

Adult person sentenced by decree absolute is a person aged 18 and over and minor person sentenced by decree absolute is a person aged between 14 and 18.

SUMMARY OF PUBLISHED DATA BY MUNICIPALITIES

Here listed are the volumes of "Municipal Statistics" and "Bulletins" that comprise the published data by municipalities.

MUNICIPAL STATISTICS

Complex publications on municipalities

For 1964 and 1965, No. 26

For 1965 and 1966, No. 38

Social and political system

Deputies (committee members): 37, 43, 59

Delegations and delegates: 109

Self-management bodies: 53, 75, 92

Population

Population number: 30, 40

Vital statistics: 17, 30, 39, 51, 66, 70, 81, 90, 98, 105, 110, 118, 125, 129, 131, 135, 137, 141, 148

Death causes: 105

Employment

Employees: 4, 13, 22, 49, 73, 74, 84, 95, 122

Students of qualified workers schools: 4, 49, 73, 74, 84

Examinations for qualified and highly qualified workers: 13, 49, 73, 74, 84, 95

Persons seeking employment: 49, 73, 84, 95, 122

National income

National income: 8, 25, 28, 46, 55, 65, 77, 87, 91, 100

Unincorporated enterprises (entrepreneurs)

Census of entrepreneurs: 155

Agriculture

Areas and yields: 6, 12, 24, 33, 36, 44, 45, 56, 62, 64, 68, 69, 78, 79, 80, 86, 89, 93, 96, 97, 101, 108, 112, 113

Livestock: 1, 6, 8, 11, 16, 33, 103, 111

Cooperatives: 8, 24, 44, 52, 64, 78, 86

Private agricultural holdings: 27

Statistical estimators: 11

Tractors in agriculture: 115, 126, 133, 139, 143, 147, 150, 157, 176
