

LABOUR FORCE SURVEY, 2012

Belgrade, 2013

Publishers: Statistical Office of the Republic of Serbia
For Publishers: Prof Dragan Vukmirović, PhD, Director

The data published in this publication shall be used subject to quoting the source.

PREFACE

The Statistical Office of the Republic of Serbia publishes the final data of the Labour Force Survey 2012.

The survey was conducted in April and November 2012 on the territory of the Republic of Serbia. In determining the main contingents of labour force we applied the international recommendations and definitions and therefore the data of this survey present the main source of labour force statistics that are internationally comparable, by their contents and regarding the applied methodology.

The data of this survey are envisaged for a wide circle of domestic users and are also forwarded to numerous international organizations (Eurostat, ILO, the World Bank, IMF, OECD, UNICEF, UNESCO, etc.).

The bulletin consists of five basic parts. The part one contains the methodological explanations and the plan of sample. In the second part offered are the basic indicators of working-age population (aged 15-64). In the part three we presented the basic indicators for the population aged 15 and above (rates and structures). The part four offers the tables and graphs regarding population – total, and the population aged 15 and above. In the part five we presented the tables with the estimates of totals, the top and bottom limits of 95% interval of confidence and the coefficient of variation for the main population features.

On special request we may place at disposal of our users other data of the Survey as well, according to the questionnaire and the methodological guidelines.

When applying the data of this survey, the users are advised to note that certain data obtained by the cross-presentations of certain modalities might be insufficiently reliable, which is due to the sample size.

Belgrade, 2013

Director,

Prof Dragan Vukmirović, PhD

Methodological explanations	7
Working-age population (aged 15 – 64)	
1.1. Working-age population by activity, sex, region and type of settlement, 2012	15
1.2. Working-age population by age, sex, region, type of settlement and activity, 2012	16
1.3. Structure of working-age population by age, sex, region, type of settlement and activity, 2012.....	16
1.4. Structure of working-age population by educational attainment, sex, region, type of settlement and activity, 2012.....	17
1.5. Employed working-age persons by age, sex, region, type of settlement and employment status, 2012	18
1.6. Structure of employed working-age persons by age, sex, region, type of settlement and employment status, 2012.....	18
1.7. Structure of employed working-age persons by educational attainment, sex, region, type of settlement and employment status, 2012.....	19
1.8. Employed working-age persons by section of activities, sex, region, type of settlement, employment status and educational attainment, 2012	20
1.9. Structure of employed working-age persons by section of activities, sex, region, type of settlement, employment status and educational attainment, 2012	21
1.10. Employed working-age persons by occupations, sex, region, type of settlement, employment status and educational attainment, 2012	23
1.11. Structure of employed working-age persons by occupations, sex, region, type of settlement, employment status and educational attainment, 2012	24
1.12. Structure of employed working-age persons by working hours in week observed, sex, region, type of settlement and educational attainment, 2012	25
1.13. Structure of employed working-age persons by size of local unit they work with, sex, region, type of settlement and educational attainment, 2012	26
1.14. Structure of employed working-age persons by type of job, sex, region, type of settlement and educational attainment, 2012	27
1.15. Structure of employed working-age persons by type of ownership, sex, region, type of settlement and educational attainment, 2012	28
1.16. Structure of self-employed persons (employees excluded) by work location, sex, region, type of settlement and educational attainment, 2012	29
1.17. Self-employed persons (employees excluded) that apart from principal have supplementary job, by sex, region, type of settlement and educational attainment, 2012	30
1.18. Structure of unemployed by time of searching job, sex, region, type of settlement and educational attainment, 2012	31
1.19. Inactive population of working age by reasons they do not search job, sex, region, type of settlement and age, 2012	31
Basic indicators of population aged 15+	
2.1. Rate of activity, employment, unemployment and inactivity, by age and sex, 2012	35
2.2. Rate of activity, employment, unemployment and inactivity, by age and sex, 2012	35
2.3. Rate of activity, employment, unemployment and inactivity, by age and sex, 2012	36
2.4. Rate of activity, employment, unemployment and inactivity, by age and sex, 2012	36
2.5. Rate of activity, employment, unemployment and inactivity, by age and sex, 2012	37
2.6. Structure of population aged 15+, by educational attainment, sex, region, type of settlement and activity, 2012	37
2.7. Rate of activity, employment, unemployment and inactivity for population aged 15+, by areas, 2012	38
Rate of employment, by areas, 2012	39
Rate of unemployment, by areas, 2012	40
Total population and population aged 15+	
3.1. Total population by activity, sex, region, type of settlement and educational attainment, 2012	43
3.2. Sets of population aged 15+ by activity, sex, region, type of settlement and educational attainment, 2012	44
3.3. Population aged 15+ by age, sex, region, type of settlement, activity and educational attainment, 2012	46
3.4. Structure of population aged 15+ by age, sex, region, type of settlement, activity and educational attainment, 2012	47
3.5. Structure of population aged 15+ by educational attainment, sex, region, type of settlement and age, 2012	48
3.6. Structure of population aged 15+ by subjective employment status, sex, region, type of settlement and educational attainment, 2012	50
3.7. Structure of population aged 15+ by activity, sex, region, type of settlement, subjective view of financial situation in their own household and educational attainment, 2012.....	51
3.8. Structure of population aged 15+ by activity, sex, type of settlement, by regions and areas, 2012	52
3.9. Structure of employed persons by age, sex, region, type of settlement and educational attainment, 2012.....	53
3.10. Structure of employed persons by sections of activities, sex, region, type of settlement and educational attainment, 2012	54
3.11. Employed persons by sections of activities, sex, region, type of settlement and educational attainment, 2012.....	56
3.12. Share of informal employment by sex, region, type of settlement, educational attainment and age, 2012	57

3.13. Share of informal employment in total number of employed, by sections of activities, sex, region, type of settlement and educational attainment, 2012	58
3.14. Structure of employed persons by occupations, sex, region, type of settlement and educational attainment, 2012	59
3.15. Employed persons by occupations, sex, region, type of settlement and educational attainment, 2012	59
3.16. Structure of employed persons by working hours per week, sex, region, type of settlement and educational attainment, 2012.....	60
3.17. Structure of employed persons by type of ownership and working hours per week, sex, region, type of settlement, and educational attainment, 2012	61
3.18. Structure of employed persons by sections of activities, sex, region, type of settlement and working status, 2012	62
3.19. Structure of employed persons by total service years, sex, region, type of settlement and educational attainment, 2012	63
3.20. Employed persons by usual office hours per week, sex, region, type of settlement, employment status and educational attainment, 2012	64
3.21. Structure of employed persons by specific office hours, sex, region, type of settlement, employment status and educational attainment, 2012	65
3.22. Employed persons by age, sex, region, type of settlement, employment status and educational attainment, 2012.....	67
3.23. Structure of employed persons by age, sex, region, type of settlement, employment status and educational attainment, 2012.....	68
3.24. Employed persons by employment status, type of ownership, sex, region, type of settlement, and educational attainment, 2012.....	69
3.25. Structure of employed persons by employment status, type of ownership, sex, region, type of settlement, and educational attainment, 2012	70
3.26. Structure of employed persons by usual office hours per week, sex, region, type of settlement, employment status and educational attainment, 2012	71
3.27. Structure of employed persons with additional job, by employment status, sex, region, type of settlement, educational attainment and age, 2012.....	73
3.28. Structure of employed persons by place of work, sex, region, type of settlement and educational attainment, 2012	74
3.29. Employed persons by sections of activities, sex, region, type of settlement and type of work, 2012	75
3.30. Structure of employed persons by sections of activities, sex, region and type of settlement and type of work, 2012	76
3.31. Structure of employed persons by working hours, sex, region, type of settlement and educational attainment, 2012	77
3.32. Structure of employed persons by reasons they work as temporary employed, seasonal or casual jobs, by region, type of settlement and educational attainment, 2012	77
3.33. Structure of employed persons with additional job, by educational attainment, sex, region and type of settlement, 2012	78
Unemployed persons (aged 15+)	
4.1. Unemployed persons by age, sex, region, type of settlement and educational attainment, 2012	81
4.2. Structure of unemployed persons by age, sex, region, type of settlement and educational attainment, 2012.....	81
4.3. Structure of unemployed persons by educational attainment, sex, region and type of settlement, 2012	82
4.4. Structure of unemployed persons by time they seek job, sex, region, type of settlement and educational attainment, 2012	83
4.5. Structure of unemployed persons by previous status, sex, region, type of settlement and educational attainment, 2012	83
4.6. Unemployed persons by type of job they seek, sex, region, type of settlement and educational attainment, 2012.....	84
Inactive population (aged 15+)	
5.1. Inactive population aged 15+, by age, sex, region, type of settlement and educational attainment, 2012	87
5.2. Structure of inactive population aged 15+, by age, sex, region, type of settlement and educational attainment, 2012	87
5.3. Structure of inactive population by reasons they do not seek job, sex, region, type of settlement, educational attainment and age, 2012	89
Potentially active population (aged 15+)	
6.1. Potentially active population by age, sex, region, type of settlement and educational attainment, 2012.....	93
Sampling errors and 95% confidence intervals for parameters	
A. Estimates of totals, top and bottom limits of 95% confidence interval and coefficients of variation for main population features, 2012	97
B. Estimates of rates, top and bottom limits of 95% confidence interval and coefficients of variation for rate of activity, employment and unemployment, 2012	98

METHODOLOGICAL EXPLANATIONS

Preface

Labour Force Survey is a survey envisaged to collect the data on the main features of labour force, based on which we estimate the total labour force in the country. The principal objective of the study is to provide for the data on three main, independent contingents of population: employed, unemployed and inactive persons. The study specially takes into account the working-age population (aged 15-64) and the data collected are used to monitor, to measure and to assess the economic and social trends in the Republic of Serbia.

The survey results are given in aggregate form and in this way, pursuant to Article 27, the Act on statistical surveys (Official gazette of RS, no 83/92, 53/93, 67/93, 48/94 and 101/2005), the confidentiality of individual data on households and individual persons is fully ensured.

Unit of interview

Unit of interview is any member of random selected household, and the unit of selection can be any household selected for the sample.

The basic socio-demographic data were collected for all members of the selected households, however for the working status we surveyed only persons aged 15 and over.

Period of observation

In 2012 the LFS was conducted twice: in October and in April. The period of observation for October anticipated the time from 15 – 21 October 2012, and the interviews were carried out from 22 October to 4 November 2012. In April, the period of observation was from 16 – 22 April 2012, while the interviews were conducted from 23 April to 6 May 2012.

For the purpose of Labour Force Survey, **week** is defined as a seven-day period of time, from Monday to Sunday inclusive.

Definitions

In preparing the methodology instruments for the Survey we used the definitions and recommendations published in the methodological papers of Eurostat: COUNCIL REGULATION (EC) No 577/98, REGULATION (EC) No 1991/2002 и No 2257/2003 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL, COMMISSION REGULATION (EC) No 1897/2000 и 430/2005.

Under the term **household** we anticipate: **a)** any family or other community of persons who declare to live together and jointly spend their income for basic living support (costs of dwelling, food, etc), regardless the fact whether in the time of interview all the members appear in the place where the household is situated; **b)** every person who lives on his / her own (single-person household) and is not member of any other household in some other place, a person living in a separate or divided dwelling, or as a tenant, regardless the fact whether he / she lives in the same room with another tenant or with the members of the lessor's household; however this person does not spend income jointly with them but only pays for the dwelling.

Employed persons are the persons that in the week observed at least for an hour did some work for remuneration (in money or in kind), as well as the persons with job (i.e. employed persons) who in the respective week were absent from work. Apart from the persons who contracted employment and work with enterprises, institutions or other organizations or are active within private unincorporated enterprises, here included are individual agricultural producers, unpaid family workers/supporting household members, as well as the persons who found and made agreement (in verbal or in written) on casual job conduct without contracting employment and to whom the subject jobs were the only source of subsistence. Therefore, the Survey does not relate to the formal working status of the surveyed persons, but the working status is determined based on the real activity that interviewed persons practiced in the respective week.

Pursuant to the Classification of occupational status of employed persons, the following categories are defined: self-employed, employees and unpaid family workers.

Self-employed are the persons who work as sole proprietors of enterprises, institutions, private shops or agricultural holdings, as well as the persons who maintain individual professional practice or some other activity for their own account.

Employees are the persons who work with their employers in any ownership sector, either according to formal contract of employment or based on verbal agreement. As employees we anticipate household members that render their support in running family business and who are paid for their work.

Unpaid family workers (supporting household members) are the persons who provide support to another family member in running family business or agricultural holding, however receive no remuneration for this.

Unemployed persons are the persons who in the respective week did no work for remuneration and who were not employed but absent from their work that they could resume after the leave. However this is subject to the following:

- In the last four weeks these persons undertook active steps to find job and if a job was offered, they would start within two-week time;
- In the last four weeks these persons undertook no active steps to find job, since they had already found job and were about to start working after the week respective and within the following three months latest.

Active population (labour force) includes all employed and unemployed persons.

Inactive population consists of the population aged 15 and over who were not categorized under active population.

Potential active population (potential labour force) includes the persons who take active steps to find job but cannot start working at once, i.e. within two weeks, as well as the persons who can immediately start working but do not take active steps to find job. Here included are also so called 'discouraged persons', who do not undertake steps to find job because they are convinced they cannot find one, although they could start working immediately in the case the job was offered.

Subjective employment status presents the employment status of a surveyed person according to his / her own opinion and not according to his / her actual activity in the week observed.

Activity rate presents the percentage share of active population in the total population of working-age.

Employment rate presents the percentage share of employed population in the total population of working-age.

Unemployment rate presents the percentage share of unemployed population in the total number of active population aged 15 and over.

Inactivity rate is the percentage share of inactive population in the total population aged 15 and over.

Classifications

For coding and processing the data collected by this survey, the following classifications were used:

1. **Classification of activities**, which is comparable to the UN classification of activities, *ISIC – rev. 4* and the EU classification *NACE, rev. 2*;
2. **Classification of occupations**, which is comparable to the International standard classification of occupations, *ISCO – 88*;
3. **List of schools**, which is comparable to the International Standard Classification of Education, *ICSED – 1997*;
4. **Classification of positions/professional status of employed persons**, which is comparable to the International Classification of Status in Employment, *ICSE*.

Methodological notes

Explanations of differences relative to the previous Labour Force Surveys

Labour Force Survey was carried out in our country for the first time in 1994, as a pilot survey, and since 1995 it has been conducted as a regular annual survey.

In previous surveys, the frame for sample selection was the 1991 Census of population, households and dwellings and the survey sample included about 3900 households.

The frame for sample selection for the 2004 Labour Force Survey was the Census 2002, and the survey was carried out on a sample of over 6500 households.

When we created the instruments for the 2004 survey, the contents of the interview form was changed and that provided for more precise definition of the main population contingents obtained from this survey.

In 2008 revised were the questionnaire and the methodological guidelines for the LFS in accordance with the latest recommendations by Eurostat, because of the necessity to conduct Labour Force Survey twice a year (in April and in October).

In the following table given is a series of data of LFS 2012, for the main contingents of population aged 15 and over:

Main sets of population aged 15+, by sex, 2002-2012

* Since 2004, the frame for sample selection has been changed.

Differences appearing between data on number of employment found in Labour Force Survey and in other statistical surveys

The data on the number of employed from administrative sources are collected by regular monthly and semi-annual surveys (*RAD-1*, *RAD-1P* and *RAD-15*); while the data on the number of registered unemployed persons are obtained from the National employment service. The data provided from these sources differ from the data collected by the Labour Force Survey due to the following reasons:

- **Method of collection** is different: in the Labour Force Survey the data are collected from the persons, i.e. members of the households selected for the sample, while the data from administrative sources are collected from the reports by enterprises, institutions, cooperatives or other organizations.
- **Data source** for the Survey are statements of persons responding to interviewers, while the sources for administrative data are the records that the personnel departments of reporting units keep pursuant to the Act on labour records.
- **Observation unit** for the Survey is each member of random selected household, while observation unit for administrative data collection is enterprise, institution, cooperative or other organization, as well as composite units thereof.
- **Period of observation** of activity for the Survey is the week preceding the interview, while the respective period for administrative data collection is the last day of the respective month.
- **Definitions of employment** are different. The data on the number of employed persons obtained from administrative sources relate only to the officially employed (persons who signed contract of employment with employer), while in the Labour Force Survey as employed we regard each person that in the respective week did some work for remuneration (in money or in kind) for minimum one hour, as well as any person that has job (is employed) but in the week observed was absent from work. As employees anticipated are also individual farmers/agricultural producers, as well as unpaid family workers to whom this work is the only source of subsistence.
- **Timing** – The data on the number of employed from administrative sources are collected and published monthly, while for Labour Force Survey the same data are collected and published biannually.

Sample plan

Rotation panel sample was applied and it provides the optimum sample efficiency for estimating changes and mean values through repeated measurements. The sample is designed in a way that the survey can be carried out several times a year (biannually, quarterly and all year round).

Basic set includes all households and persons that work or reside for one year and more on the territory of the Republic of Serbia. Excluded are persons that live abroad for more than one year and persons in institutional households (students' homes, homes for children and young people with developmental disability, homes for socially imperilled children, old / retired people homes, homes for adults with disability, monasteries, nunneries, etc.).

Type of sample – Two-stage, stratified sample. The first stage units are enumeration areas and the second stage units are households.

Stratification. Enumeration areas, as primary units, are stratified by the type of settlement (urban and other) and by territory covered by administrative districts. The central Serbia administrative districts are Beograd municipalities, then Mačvanski, Kolubarski, Podunavski, Braničevski, Šumadijski, Pomoravski, Borski, Zaječarski, Zlatiborski, Moravički, Raški, Rasinski, Nišavski, Toplički, Pirotski, Jablanički and Pčinjski upravni okrug. The administrative districts of Vojvodina are Severnobački, Srednjobanatski, Severnbanatski, Južnbanatski, Zapadnobački, Južnobački i Sremski upravni okrug.

Frame for sample selection for the first stage is the list of enumeration areas with 20 or more households, and for the second stage the frame is made of the lists of households for the selected enumeration areas. The sample was reduced by 1% in relation to the basic set.

Sample size. For 2012 survey the sample included 20048 households. The anticipated sample size is increased by 1432 households in relation to 2011. The sample was increased in order to reduce the effect of non-responsiveness, which is considerably influenced by the repeated interviewing of households. The number of enumeration areas selected for the sample remained unchanged, i.e. 2148. In enumeration areas that are the first time selected for the sample in 2011 and 2012 we selected 10 households in each, and in the repeated enumeration areas we selected 8 households in each.

Sample allocation to administrative districts and by type of settlement was carried out using the *Bethel* software, which was developed at ISTAT. *Bethel* software provided for possible defining of sample size and allocation of units by strata, simultaneously taking into account the variables of interest: unemployed, employed, active population, and various domains such as: Serbia – total, administrative districts – total, as well as two-stage sample plan, introducing the information on estimate of the expected design effect achieved from previous surveys, and which corresponds to two-stage sample plan. The sample allocation obtained by the use of *Bethel* software, anticipating the above mentioned conditions, does not differ notably from the proportional allocation, however offers more precise estimates for certain administrative districts.

Sample selection. The first stage units (enumeration areas) are selected systematically with probability in proportion to the number of population aged 15 and over, according to 2002 Census. Within each stratum enumeration areas are sorted according to the municipality they belong to and the ordinal number within the municipality. This systematic selection provides for high level of implicit geographic stratification and ensures effective sample distribution. The second stage units (households) are selected with equal probability (simple random selection).

Rotation scheme was prepared for the purpose of quarterly survey and then modified for biannual survey. In this way established rotation scheme provides for possible rotation of households in case of transferring to quarterly survey.

For biannual survey, six different rotation groups are taken, three of which are repeated relative to the previous six-month period, i.e. 50% of the households appearing in the sample in April, are again interviewed in October.

Sample realization. 44113 persons were interviewed, and for 39089 persons collected were the data on their working activity, which makes 0.6% of the total number of population aged 15 and over.

System of estimation that was applied corresponds to two-stage stratified sample, where the selection procedure for the first stage is in proportion to the size, repeated, while for the second stage it is simple random selection, and not repeated.

The basic weight resulting from the applied sampling design was corrected to allow for non-response. In order that estimates of totals (of number of persons) should comply with the current demographic estimates, we implemented post-stratification by age (below 14, 15 and over) and by administrative districts, according to the estimated number of persons for the referent period, which corresponds to the basic set observed by the survey.

Estimated were the total and average values and the respective errors, for the Republic of Serbia – total, and NUTS 2 level (Beogradski region, Region Vojvodine, Region Šumadija and Zapadne Srbije, Region of Južne i Istočne Srbije, Region Kosovo i Metohija).

Sampling errors are published for the main population features only (tables A and B). Along with coefficient of variation (*CV*), as relative measures of estimation reliability (%), provided are also 95% intervals of confidence for the parameters.

Symbols

- = no occurrence
- ... = data not available
- 1) = note/footnote in table
- 0 = data less than 0.5 of measurement unit
- 0,0 = data less than 0.05 of measurement unit
- () = incomplete, i.e. insufficiently reliable data
