¹⁾ Due to small number of occurrences, the data was taken over from Census of Agriculture, 2012.

Methodological notes

Data for 2015 are obtained on the basis of conducting the Survey on agricultural production – Animal production, sample based. Sample selection was done according to the data from the Statistical register of agricultural holdings. Single-stage stratified sample covered 1.5% of agricultural holdings, i.e. 8 971 family holdings, 584 holdings of legal entities and 142 holdings of unincorporated enterprises.

Territorial distribution was done in compliance with the Regulation on the Nomenclature of Statistical Territorial Units („Official Gazette of RS“, No 109/09 and 46/10).

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).

Short version of methodology is available on the website of the Statistical Office of the Republic of Serbia: www.stat.gov.rs.
