## Marriages and divorces, 2016

In this statistical release, the Statistical Office of the Republic of Serbia presents the main data on marriages in 2016, according to: age of groom and bride, order of marriage, previous marital status, economic activity, educational attainment and national affiliation, as well as main data on divorces in 2016, by age of husband and wife, order of marriage, previous marital status, duration of marriage, number of dependent children and to whom children are given after divorce.

For a more complete consideration of these phenomena, tables contain the basic indicators for the period 2011-2016. All relevant indicators are calculated on the basis of estimated mid-year population.

Statistics of marriages encompasses marriages signed according to valid legal acts on marriages, noted in the registry of marriage certificates, while statistics of divorces includes marriages legally divorced, annulled or declared void.

Starting from 1998 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).
