Note: Data are given according to Classification of Activities, by sections and divisions. Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to Kosovo and Metohia and therefore these data are not included in the coverage for the Republic of Serbia (total).

Methodological explanation

Producer price indices of industrial products for domestic market are calculated on the basis of prices collected from domestic producers, which are realized on the domestic market, and of corresponding weights. Such indices are the indicators of producer prices movements and are used as one of the main short-term indicators for economic analysis and reviews.

The products for measuring prices are selected from every industrial division with the largest output on the domestic market, which prices can present general price movements in industry by divisions and products destination.

Detailed methodological explanations are available on the website of the Statistical Office of the Republic of Serbia: <http://webzrs.stat.gov.rs/WebSite/Public/PageView.aspx?pKey=288>

Data are published on the fifth day of each month for the previous month in the edition Statistical Releases, with the indication CN20, as well as on the website of the Statistical Office of the Republic of Serbia.
