<sup>1)</sup> Enter data on the location of the fishing holding regardless of whether they are the same or different from the address of the legal entity / entrepreneur / holder of the holding

**15. Juveniles are produced on the holding** (circle a number):

1. Only for the holding's own needs   2. For holdings own use and further sale   3. Only for sale   4. Juveniles is not produced on the holding

**16. Fish for consumption is produced on the holding** (circle a number):

1. Only for the holding's own needs   2. For holdings own use and further sale   3. Only for sale   4. Fish for consumption is not produced on the holding

**The report is filled out by legal entities, entrepreneurs and family fishing holdings engaged in the production of fish for consumption and juveniles, regardless of whether the production is intended for the holdings own needs or for sale.**

## 1. EMPLOYEES AT THE FISHING HOLDING IN 2017

				Number
1.	In production	Full time	Men	
2.			Women	
3.		Part-time	Men	
4.			Women	
5.		Occasional	Men	
6.			Women	
7.	On other jobs			

**Full time** – If at least 90% of employee's working hours are realized by performing direct production activities

**Part-time** – If 30-90% of employee's working hours are realized by performing direct production activities

**Occasional** – If 30% of employee's working hours are realized by performing direct production activities

The employee category is determined by the participation of hours worked in the total working hours fund in 2017, regardless of whether the employee is working indefinitely or for a specific time or is a seasonal worker.

The number of employees working **on other jobs** refers to the average number of employees during 2017 on technical and administrative tasks related to primary production in the fisheries (excluding employees working on the holding in trade, catering and tourism or fish processing).

Calculation of the average number of employees working on other jobs is done by summing the final monthly balance and dividing by 12.
