Notes:

The data on issued building permits are overtaken from the Central Register of Integrated Procedures, which has been, according to the Law on planning and construction ("Official Gazette of the Republic of Serbia", number 132/14, article 8) administered by the Serbian Business Registers Agency (SBRA).

In the scope of this survey, the concept of „building permit” comprises the building permit for construction and the decision which approves the execution of works following the article 145 of the Law on planning and construction. The issued building permits and approvals for works executions, based on harmonized request, included are only if the construction is approved for the first time. This statistical survey comprises the issued building permits for all types of constructions described in the Classification of Types of Constructions, i.e. buildings and other civil engineering works and these are presented by territories where the planned works are performed in the country.

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).

Detailed methodological notes of this survey can be found on the website of the Statistical Office of the Republic of Serbia:
