Notes

Data on expected yields of late crops, fruit and grapes, are based on reports delivered by agricultural enterprises and cooperatives, and estimates by statistical estimators for individual holdings.

According to these data, in 2008 expected maize production is 5930 thousand tons, which is by 51.9% greater than production in previous year. Compared to last year, decrease in production is expected for sugar beet by 32.2%, and larger production of sunflowers by 49.3%, soya by 18.5%, potatoes by 12.7% and beans by 2.8%.

Compared to ten-year average (1998-2008) expected production of maize, sunflower, and soya is by 12.1%, 38.0% and 32.2% larger, while expected production of potatoes, sugar beet and beans decreased by 1.1%, 7.1% and 24.4% respectively.

Referring to fruit, compared to realized production in previous year, smaller production of apples by 7.5% and plums by 6.9% is expected. Compared to ten-year average, larger production of apples by 18.4% and plums by 44.0% is expected.

Expected grapes production in Republic of Serbia is by 17.2% larger than in 2007, which is by 17.4% more, compared to ten-year average production.

Previous results on harvest of late crops, and fruit and grapes production in 2008, will be published at the end of November.
