SERB128 ZS30 030613

Drinking water supply in the Republic of Serbia, 2012

– Preliminary data –

The data represent the preliminary results of the annual survey on drinking water supply from water supply system in 2012. In the tables below, presented are the data on abstracted and distributed water, number of households connected to public water supply system and water losses percentages.

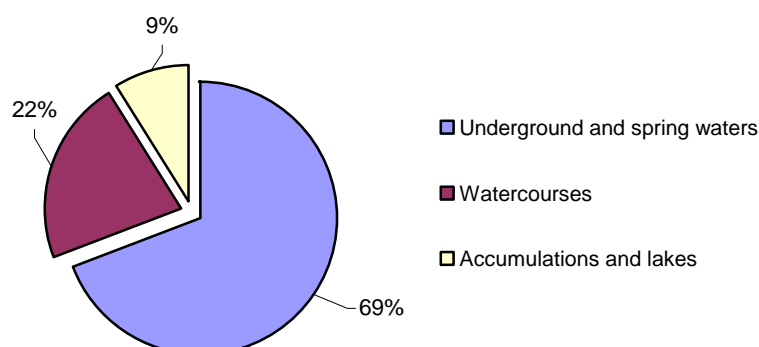

In 2012, quantity of abstracted water increased by 1.3% relative to the same period 2011 and quantity of distributed water distributed to users decreased by 0.4% compared to 2011. Compared to 2011, water distributed to households increased by 1.2%, water distributed to industrial sector increased by 3% and water distributed to other users decreased by 9.2%.

Number of households to which water was distributed increased in 2012 by 3.1% relative to 2011.

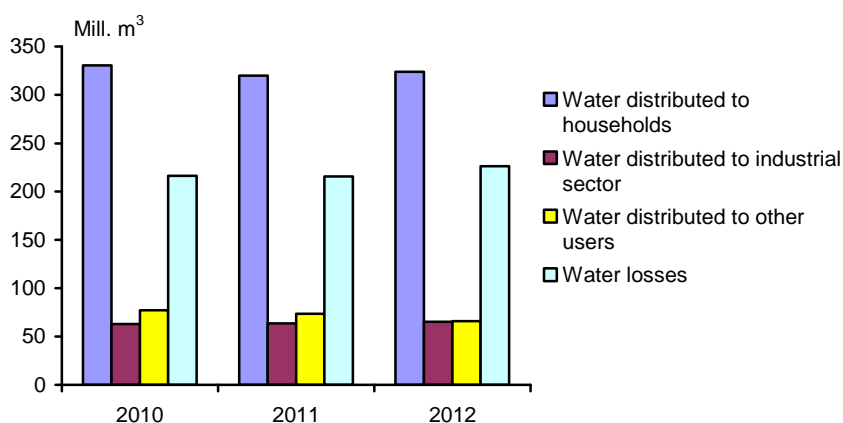

Percentage share of water losses of total water abstraction increased by 4.9% in 2012 compared to the referent value in 2011.

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohia and therefore these data are not included in the coverage for the Republic of Serbia (total).

Graph 1- Abstracted water, by source in the Republic of Serbia, 2012

Graph 2- Distributed water and losses in the Republic of Serbia, 2010-2012

1. Abstracted and distributed water quantities and water losses from water supply system ¹⁾, 2012

Republic of Serbia

	Total abstracted water, thous. m ³	Distributed water, thous.m ³				Number of households to which water was distributed	Percentage share of water losses in total water abstraction
		Total	To households	To industrial sector	To other users ²⁾		
Total	681 585	455 442	323 870	65 541	66 031	2 225 191	33.2
Serbia – North	369 626	268 365	190 899	37 523	39 943	1 347 255	27.4
