# PO17

Number 318 - Year LXIII, 26/11/2013

**Agriculture**

SERB318 PO17 261113

## Realized yield of late crops, plums and grapes in the Republic of Serbia, 2013 – Preliminary results –

Data on realized yield of late crops, plums and grapes are shown as of November 10<sup>th</sup> 2013.

According to these data, maize production in 2013 amounted to 5906 thousand tones, which is by 67.2% more than realized production in the previous year. Compared to 2012, expected production of sunflower is by 40.6% bigger, of potatoes by 32.4%, of sugar beet by 27.8% and of soya by 38.5%.

Compared to ten-year average (2003-2012), expected production of maize is by 3.3% higher, of sunflower, by 34.4%, of soya, by 7.8%, of sugar beet, by 7.8% and expected production of potatoes is lower by 8.9%.

Production of plums increased by 88.9% respective to production realized in 2012 and related to ten-year average, the increase was 38.4%. Realized production of grapes in the Republic of Serbia increased by 28.8% relative to 2012 and compared to ten-year average, it decreased by 4.4%.

Final data on realized yield of late crops and production of fruit and grapes in 2012 will be published in mid-December.

Territorial distribution is in accordance with the Regulation on Nomenclature of Statistical Territorial Units ("Official Gazette of RS", No. 109/09 and 46/10).

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).

### Production of some main crops, plums and grapes

### Methodological notes

Data in this statistical release are gathered by the Reports on realized yield of late crops, fruit and grapes (PO-33a, PO-33b).

Companies and agricultural cooperatives complete the reports, based on own accounting records, while data on family holdings are produced by statistical estimators, for each of the estimation areas (one cadastre municipality or several of them).

Harvested areas are areas on which crops were harvested and yield realized. Realized yield of fruit and grapes is expressed as yield per fertile tree/ vine.

For interested users, more detailed short methodology on crop production statistics is available on the website of the Statistical Office of the Republic of Serbia: [www.stat.gov.rs](http://www.stat.gov.rs).
