Methodological Notes: The data for CA divisions 45 and 47 include the turnover of all business entities, legal entities and unincorporated enterprises (2012 included, the turnover referred only to legal entities), and CA division 46 includes only data for legal entities.

The data on the turnover of legal entities were obtained from three regular quarterly surveys relating to: a) wholesale and retail trade, and repair of motor vehicles and motorcycles, b) wholesale trade and c) retail trade, which are sample-based. The sample comprises all large, medium-sized and randomly selected small legal entities registered in CA section G (Wholesale and retail trade; repair of motor vehicles and motorcycles). The estimation includes also certain legal entities that are not registered under trade as being their principal activity, but have parts dealing with trade.

Data on the turnover of unincorporated enterprises were derived from VAT returns, obtained from the Tax Administration.

Goods turnover includes value added tax (VAT).

Goods turnover indices at constant prices are obtained by deflating the indices at current prices with appropriate consumer price indices, which exclude: water (from public utilities systems), electricity and motor vehicles, motorcycles and parts thereof.

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).

Detailed methodological notes for the domestic trade survey are available on the website of the Statistical Office of the Republic of Serbia: <http://webzrs.stat.gov.rs/WebSite/Public/PageView.aspx?pKey=105>.
