## Issued building permits in the Republic of Serbia, October 2013

### – Preliminary results –

On the basis of the number of issued permits in October 2013, building of 1109 dwellings with average area of 63.6 m<sup>2</sup> was recorded. Number of dwellings increased, according to the issued permits, by 31.7% when compared to October 2012. Out of the total number of dwellings in new residential buildings, 15.1% of dwellings will be built in single – dwelling buildings, with average area of 135.3 m<sup>2</sup>, while 81.9% of dwellings will be in the buildings with three and more dwellings, with significantly smaller average area of 47.9 m<sup>2</sup>.

In October 2013, 807 building permits were issued, presenting the increase of 6.3% when compared to October 2012. Index of anticipated value of works in October 2013 is by 13.9% higher than in October 2012.

Observed by types of constructions, in October 2013, 77.7% of issued permits related to buildings and 22.3% to civil engineering. When referring only to buildings, 69.9% related to residential buildings and 30.1% to non-residential ones, while regarding civil engineering, the largest number related to pipelines, communication and electric power lines, 73.9%.

Anticipated value of works on new building in October 2013 amounts to 85.9% of totally anticipated value of works. Observed by areas, the greatest construction activity was noted in Južnobańska oblast, 39.4% of the anticipated value of new building, followed by Beogradska oblast, 17.5%, Pčinjska oblast, 8.7% and Južnobačka oblast, 7.5%, while the shares of other areas were between 0.2 and 3.9%.

### Notes:

The presented data are collected in the scope of monthly survey on building permits. The report is filled in by the Ministry competent for construction affairs, responsible authorities of the Autonomous Province, city or municipality that, according to the Law on planning and construction ("Official Journal of the Republic of Serbia", number 72/2009, article 133), issue construction permits.

In the scope of this survey, the concept of „building permit“ comprises the building permit for construction and the decision which approves the execution of works.

This statistical survey comprises the issued building permits for all types of constructions described in the Classification of Types of Constructions, i.e. buildings and other civil engineering works and these are presented by territories where the planned works are performed in the country.

Data on issued building permits show the dynamics of construction activity and enable an insight in investments' structure on state and local self – government level.

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).

Detailed methodological notes of this survey can be found in the edition of SORS "Methodologies and Standards". On the website of the Office, the following information can be obtained:
