Number 356 - Year LXIII, 30.12.2013.

SERB356 IN10 301213

Industry statistics

Industrial production indices in the Republic of Serbia, November 2013 - Previous results -

Industrial production in the Republic of Serbia, in November 2013 was by 4,2% greater compared to November 2012 and was by 13,9% greater compared to 2012 average. Industrial production for January - November 2013, compared to the same period last year was by 6,0% greater.

Observed by sections, November 2013, compared to November 2012, in the mining and quarrying section saw a 0,3% fall, while the production in the manufacturing section increased by 4,0%, while the production in the section for electricity, gas, steam and air conditioning supply increased by 6,6%.

Industrial production, 2009 - 2013

Data in this Communication represent previous results and may undergo certain modifications.

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohia and therefore these data are not included in the coverage for the

| Electricity, gas, steam and air conditioning supply | 113,1 | 114,6 | 106,0 | 106,6 | 108,3 |

¹⁾ The estimate of the industrial production of small-sized enterprises that are not covered by regular statistical surveys of industry was made for November 2013. The estimate was made on the basis of the sample. If the estimate of industrial production of small-sized enterprises is included, the industrial production index for November 2013/2012 average, for total industrial production stands at 112.7 and for manufacturing 112.1.

Industrial production indices¹⁾

Industrial production index shows the percentage of decrease or increase in the quantities of produced manufactured products (services) on a selected territory. Hence, the index of industrial production presents trends of changes in industry development and the dynamics of its production in short time intervals.

There are two phases in the calculation of the index of production. In the first one, indices for groups and divisions are calculated on the basis of data on quantities, which are collected through the Monthly Survey on Industry, and on the basis of the weight by products (services).

Laspeyre's formula is used for the calculation. The quantities of products in the current and referent period are multiplied by weights of those products then those multiplication products are divided.

$$IFO_o = \frac{\sum q_1 k_0}{\sum q_0 k_0} * 100$$

IFO_o – index of the physical volume of industrial production for divisions;

q_1 – quantity produced in the current period;

q_0 – quantity produced in the referent period;

k_0 – weights for the product in the referent period.

In the second phase, the index of the physical volume of industrial production for the overall industry, sections, sub-sections and MIGs is calculated on the basis of indices obtained for divisions and on the basis of the weight for divisions, the formula below being used for that purpose:

$$IFO = \frac{\sum I_i W_i}{\sum W_i}$$

IFO – index of the physical volume of industrial production;

I_i – index of the physical volume of industrial production in a division;

W_i – weight for the division from the referent period.

¹⁾ Methodological explanations of Industrial Production Index could be found on the SORS website <http://webrzs.stat.gov.rs/WebSite/Public/PageView.aspx?pKey=69>. Time series of Industrial Production Indices are available on the SORS website, in the database <http://webrzs.stat.gov.rs/WebSite/public/ReportView.aspx>.
