

Private Household Consumption NON-EXHAUSTIVENESS

INTRODUCTORY NOTES

Household final consumption expenditure data in SORS is estimated in according to **SNA93** and **ESA95**. This data has published by COICOP structure for 2002 – 2006 years, in current prices, previous year prices and constant prices 2002. The main data sources are: Household budget survey, Retail trade, many Branch statistics and a few Administrative sources.

Estimations of Imputed rentals (calculated by UCA) and Consumption of own production have already been included.

NOE SURVEY

Following recommendations of *Systematic tabular approach for Private Household Consumption* by EFTA-OECD experts we estimated Non-exhaustiveness in Serbian PHC for 2003 to 2006 year by Types:

1. Adjustments for consumption of illegal goods and services (narcotics and prostitution)
2. Adjustments for goods and services received as wages and salaries in kind by employees
3. Adjustments for consumption rich households and
4. Adjustments for 4 COICOP items (Health, Education services, Hotel and Restaurant services and services Maintenance and repair cars) using production side method based on number of employees and their wages.

RESULTS

FINAL ESTIMATE OF PHC ADJUSTMENT BY TYPE recapitulation of all adjustments

	2003	2004	2005	2006
1. TOTAL u mil. RSD currant prices	59 438	76 705	94 648	99 820
illegal consumption	11 636	14 413	17 901	20 823
wages and salaries in kind	8 079	10 222	14 635	15 042
non response - rich households	8 537	12 069	13 577	17 980
production side method for 4 COICOP items	14 026	21 766	20 161	34 834
other adjustments	17 159	18 234	28 374	11 141
2. TOTAL / GDP %	5,07	5,36	5,41	4,70
illegal consumption	0,99	1,01	1,02	0,98
wages and salaries in kind	0,69	0,72	0,84	0,71
non response - rich households	0,73	0,85	0,78	0,85
production side method for 4 COICOP items	1,20	1,53	1,15	1,64
other adjustments	1,46	1,28	1,62	0,52

Note

These estimations have not been included in official data RSOS yet.
