Methodological explanations:

The presented data are collected by the survey on quarterly construction activity. The report is filled by enterprises that perform construction works. The survey does not include all enterprises, but only those, important for construction activity.

Value indices at constant prices are obtained by dividing indices at current prices by appropriate indices of producer's prices of elements and materials incorporated in construction (source: Statistical Office of the Republic of Serbia, statistical release Producers' prices index of industrial products for domestic market, CN 20).

More detailed methodological explanations of this survey are available on the website of the Statistical Office of the Republic of Serbia:
