PREFACE

By launching the publication "Municipalities and regions of the Republic of Serbia, 2020", the Statistical Office of the Republic of Serbia carries on with issuing annual statistics on municipalities, cities and regions of the Republic of Serbia. Our decision to establish a publication that comprises the data of various aspects of social and economic development of Serbian municipalities, cities and regions came from our appreciation of the social requirements for an overall insight of the status and development of certain municipalities, cities and regions.

This publication, just as the previous volumes of the series, features about 1000 data for each municipality, city and region. Considering the contents, coverage and presentations, this is actually a complete statistical yearbook of municipalities, cities and regions.

In presenting the data we took into account the present organization of the Republic of Serbia and its administrative bodies. Territorial distribution is presented in accordance with the Regulation on Nomenclature of Statistical Territorial Units ("Official Gazette of RS", No. 109/09 and 46/10).

At the Statistical Office of the Republic of Serbia, in Belgrade head office and at its regional offices, we keep filed more detailed statistical data that were not published, but are available to the interested clients. The data are offered in printed and electronic form (series 1997-2019 available at SORS website).

Apart from the data of the SORS, the publication contains the data provided by the Ministry of Interior of the Republic of Serbia, Ministry of Finance, Republic Geodetic Authority of the Republic of Serbia, National Employment Service and Institute of Public Health of Serbia.

In order to provide an insight into the data of this publication for the wide range of users, the Statistical Office of the Republic of Serbia edited also a separate English version of the publication ("*Municipalities and regions of the Republic of Serbia, 2020*").

"Municipalities and regions in the Republic of Serbia, 2020" Main principles of editing 15

1. GENERAL INFORMATION 17
1.1. General data, 2019 18

2. SOCIAL SYSTEM 23
2.1. Elections for delegates to assemblies of municipalities and towns, December 31, 2019 (Poll places, voters, electoral lists and candidate) 24
2.2. Proposers, by number of elected delegates to assemblies of municipalities and towns, December 31, 2019 28
2.3. Delegates to assemblies of municipalities and towns, by sex and age, December 31, 2019 32

3. POPULATION 36
3.1. Population by age and sex, by the 2011 Census 40
3.2. Population, by ethnicity, by the 2011 Census 66
3.3. Population by religion, by the 2011 Census 74
3.4. Population by mother tongue, by the 2011 Census 82
3.5. Population aged 15 and over, by educational attainment and sex, by the 2011 Census 90
3.6. Population aged 15 and over, by legal marital status and sex, by the 2011 Census 103
3.7. Population by economic activity, by the 2011 Census 108
3.8. Households by number of members, by the 2011 Census 116
3.9. Families by type and number of members, by the 2011 Census 120
3.10. Vital events, 2019 133
3.11. Causes of death, 2019 138
3.12. Population estimate 146
3.13. Main contingents and indicators of population of the Republic of Serbia, 2019 150

4. EMPLOYMENT AND SALARIES AND WAGES 154
4.1. Registered employment by municipality of residence, 2019 156
4.2. Registered employment by municipality of work by activity sections, 2019 160
4.3. Structure of registered employment, 2019 168
4.4. Unemployed – as of 31 December 2019 176
4.5. Average net salaries and wages per employee, January–December 180

5. LOCAL GOVERNMENT BUDGET 185
5.1. Budgetary receipts and revenues, 2019 186
5.2. Budgetary expenditures, 2019 190

6. BUDGET BENEFICIARIES EXPENDITURES 195
6.1. Budget beneficiaries' expenditures, 2019 196

7. INVESTMENTS 201
7.1. Realized investments in new fixed assets, by type of construction and technical structure, 2019 203
7.2. Realized investments in new fixed assets, by activities, 2019 208

8. PRICES 225
8.1. Average retail prices in towns, 2019 226

9. AGRICULTURE 233
9.1. General data on agricultural holdings – Farm Structure Survey 2018 234

10. FORESTRY 243
10.1. Afforestated area and timber volume, 2019 244

11. ENVIRONMENT 249
11.1. Public water supply and waste water discharge, 2019 250

12. CONSTRUCTION 254
12.1. Value of construction works done, 2019 256
12.2. Housing construction and demolished dwellings, 2019 260
12.3. Housing stock, by 2011 Census 264

13. TRADE 273
13.1. Sale and purchase of selected products of agriculture, forestry and fishing, 2019 274

14. TOURIST TRADE 279
14.1. Tourism, 2019 280
14.2. Tourists and overnight stays, by tourist places, 2019 284

15. TRANSPORT AND COMMUNICATION 287
15.1. Length of roads, 2019 288
15.2. Post activities and telecommunications, 2019 292
15.3. Registered road vehicles and trailers, 2019 297

16. EDUCATION 302
16.1. Preschool institutions, 2018/19 school year 304
16.2. Primary and lower secondary education, 2018/19, end of school year 308
16.3. Upper-secondary education, 2018/19, end of school year 312
16.4. Teachers in regular primary and secondary schools, 2018/19, end of school year 316

16.5. Students enrolled in tertiary education, 2018/19 school year 320
16.6. Graduated students in tertiary education, 2018 322
16.7. Teachers and assistants in tertiary education, 2018/19 324

17. CULTURE 327
17.1. Cinemas, 2019 328

18. HUMAN HEALTH 331
18.1. Medical doctors, dental practitioners and graduate pharmacists in health service, 2019 332

19. JUSTICE ADMINISTRATION 337
19.1. Sentenced adults and minors, by place of committing criminal offence and by type of criminal offence, 2019 338

MAIN PRINCIPLES OF EDITING "MUNICIPALITIES AND REGIONS IN THE REPUBLIC OF SERBIA, 2020"

Distribution of material

The statistical material in this publication was presented following basically the same sequence as in the "Statistical Yearbook of Serbia". Certain chapters of the Yearbook were excluded here: Geographical review, Climate and environment, National accounts, Individual consumption, Money, External trade, Catering, Research and development and International review.

Data sources

The statistical data presented here resulted from the accomplished programs of statistical surveys.

Included are also certain statistics that are in charge of the following institutions: Ministry of Finance, Republic Geodetic Authority of the Republic of Serbia, National Employment Service and Institute of Public Health of Serbia. In the tables containing these data, given are the full titles of the data sources.

Coverage

The data coverage, whole and partial, is explained in the methodological papers. The data are fully comparable by municipalities and the years of production, excluding the cases where methodological changes appear.

Methodological explanations

In a separate chapter of the publication, presented are the most required methodological explanations. The detailed methodological explanations can be found in the volumes of the edition "Methodologies and standards" (SORS), i.e. "Methodological papers" (FSO) or on the website of the Statistical Office of the Republic of Serbia.

Technique of presentation

As a rule, all the municipalities were covered in table presentations. In certain areas, where the phenomena observed are not characteristic of all municipalities, the municipalities not featuring the observed phenomena were excluded. In the case of City of Belgrade, majority of data were presented so as to cover all municipalities.

The municipalities were divided here into administrative districts and data on cities were presented separately. It is to be noted that certain cities did not use the opportunity to establish the city municipalities. In this yearbook, the territorial distribution was presented in compliance with the Regulation on Nomenclature of Statistical Territorial Units ("Official Gazette of RS", No. 109/09 and 46/10).

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).

Sources and methods of data collection

The data on the total area of the Republic of Serbia, as well as the data on the area of regions, areas, municipalities and cities were taken over from the Republic Geodetic Authority, as of January 1st, 2020. Since the new cadastre measurements are in process, the data on the area should be considered as provisional. The data on the number of cadastre municipalities were also taken over from the Republic Geodetic Authority.

The population estimates for the post- census 2019 were derived according to the population estimate as of the end of the previous year (December 31st, 2018) and the data on the results of processed statistics on natural and mechanical migrations of population in 2019.

The mechanical component of migrations covers the internal migrations only.

ELECTIONS AND COMPOSITION OF MUNICIPAL ANDCITY/TOWN ASSEMBLIES

Sources and methods of data collection

The data on the results of the elections for the delegates to municipal and city/town assemblies, as well as data on delegates of regions and areas were obtained from the municipal and city/town electoral boards by summarized reports for the level of municipality, i.e. city/town.

Coverage

The elections for delegates were held on 24/04/2016. Together with the data from these elections, processed were the data from elections held in 2017 (municipalities: Zaječar, Vrbas, Odžaci, Kovin, Kosjerić, Negotin, Mionica and Pećinci), in 2018 (Aranđelovac, Bor, Majdanpek, Preševo, Smederevska Palanka, City of Belgrade, Lučani, Doljevac and Kula) and in 2019 (Kladovo and Medvedja).

Definitions

Elections for delegates were conducted according to proportional system and each municipality/town presented one electoral unit in elections for delegates.

The presidents of municipalities and the mayors of cities were elected by delegates of municipal and city/town assemblies after constitution.

The elections were conducted by municipal and city election commissions, which have submitted their reports to the statistical body in charge of statistics (Law on local elections, "Official Gazette of RS", no 129/2007, 34/2010 – Constitutional Court decision and 54/2011, article 15, point11). On such basis, the Statistical Office of the Republic of Serbia has collected data and performed control, processing and presentation of the data.

Sources and methods of data collection

The data on population for 2011 are shown according to the results of 2011 Census of population, households and dwellings.

The population number estimate in mid-year (as of 30 June) is calculated on the basis of data of population Census, data on population increase and data on internal migrations.

Data on births, deaths and contracted marriages are compiled and supplied by registrars and data on divorces by the courts of respective jurisdiction.

Coverage

The statistics of births cover all births (live and still births) in the respective year. The statistics of deaths covers all death cases. The statistics of contracted marriages covers the marriages that have been legally contracted, i.e. entered into the register of marriages. The statistics of divorces covers all legally divorced, null and void made marriages.

According to the legal provisions on registers, the cases of births, deaths and contracted marriages are entered into registers kept for the region where the respective events took place, regardless of the fact whether this is the place of residence of the concerning parties. When processed, the data are further re-classified according to place of usual residence and this is in compliance with the census concept of usually resident population, applied in 2011 Census.

It is to be noted that starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).

2011 Census was not conducted on the territory of AP Kosovo and Metohija. In the municipalities of Preševo and Bujanovac, under coverage of the Census units was recorded due to the boycott by the majority of Albanian ethnic community.

Definitions

Population. In the 2011 Census the concept of "usual residence" was applied for the first time to determine the total number of population of an area. According to this concept, person is considered to be a resident of the place in which a person alone (in case of one-person household) or with the members of his/her household, spends most of the time, i.e. daily/night rest, regardless of where this person has his/her residence registered. Thus the total population of a certain place includes persons who have lived in that place continuously for at least one year before the critical census moment as well as persons who have lived in that place for less than twelve months, but with an intention to stay there for at least one year.

Age. In the tables of census data and vital statistics, the population was presented by age groups – in completed years of age; e.g. the age group 0 – 4 comprises the children from the moment of birth to the completed fifth year.

According to the data of age, several important population sub-sets are derived: pre-school aged children (children aged below 7), school- aged children -compulsory education (age of 7-14), adult population (aged 18 and above), working age population (aged 15 – 64), and female fertile population(aged 15 – 49), etc.

National or ethnic affiliation. As in the previous censuses, in 2011 Census, the data on the ethnic composition of the population were collected on the basis of free declaration of population. According to Article 47 of the Constitution of the Republic of Serbia, citizens are guaranteed absolute freedom regarding the declaration on their ethnicity. Moreover, the same article states that citizens are not obliged to declare themselves on their ethnicity.

Religion. The answer to the question on religion in 2011 Census is the result of individual conviction based on one's comprehension of religion; thus, what mattered was the identification with the religion, but not the membership of a religion. According to Article 43 of the Constitution of the Republic of Serbia, citizens are not obliged to declare themselves on their religion. In such cases, the enumerator was obliged to write the following answer:"Did not declare".

Mother tongue. As in the previous census, in 2011 Census, mother tongue was taken to be the language first spoken in early childhood, i.e. if several languages were spoken in the household, it was the language that the person considered to be his/ her mother tongue.

The highest educational attainment. The highest educational attainment is the school which a person completed, thus attaining his/her highest educational level. Data on completed school relate exclusively to education attained in the official educational system, so that education attained in scope of non-standard programs, i.e. informal education (various types of courses organized by workers 'universities, people's universities, etc.) is not counted. Persons who earned master and doctoral degree are shown in the group of tertiary education.

Data on the highest educational level are shown only for the population aged 15 and over.

Legal marital status. Data on the legal marital status refer to the formal, legal marital status of persons. Answers to this question were provided by all respondents, including those living in consensual unions. Data on legal marital status are presented for persons aged 15 and over.

Economic activity. In Census 2011 (as well as in Census 2002), the concept of current activity was used. Based on the economic activity, total population was classified into economically active and economically
inactive.

Economically active population („labour force") comprises persons who perform an occupation and the unemployed.

The contingent of persons who perform an occupation (the employed) comprises persons aged 15 and over who performed in the week before the census a job, for at least an hour, that was paid or would be paid (in cash or in kind), regardless of the person's formal and legal employment contract, only oral agreement with the employer or performed a job independently, as well as persons who had a job, but were, for objective reasons, not able to perform it in the reference week because of illness, holiday or vacation, strike, etc.

Unemployed persons comprise persons aged 15 and over who did not work in the reference week, but were actively seeking employment and were willing to start working if a job would be offered to them within two weeks in relation to the „critical moment of the census".

Economically inactive population comprises persons who, in the week before the census, did not seek employment nor had the opportunity to start working within two weeks if a job would be offered.

Contingent of children up to 15 relates to persons aged under the official minimal limit for the economic
activity.

The category of pensioners comprises economically inactive persons who acquired pension rights, regardless whether it is an old-age, disability, survivors' or farmers' pension.

Contingent of persons with income from property involves persons gaining income such as rent (renting house or flat, business premises), royalties (income from equity), etc.

The category of pupils/ students relates to all persons aged 15 and over who attend full – time or part – time school and who are not economically active nor recipients of survivors' pensions.

The category of homemakers comprises persons who are most of their time engaged in household duties in their own home.

The category Other comprises persons who cannot be classified in any of the above categories of economically inactive population (e.g. children aged over 14 not attending school and not seeking a job, persons incapable for working, persons who, in the referent period, were serving the prison sentence or detention measures etc.).

Household. Household is every family or other people community of persons who live together and share their living expenses (habitation, food etc.). Household is also any person who lives alone and is not a member of another household, regardless whether living in a separate or shared housing unit, in a single-person accommodation or as a tenant (i.e. one - person household).

Family. Family is a union consisting of a marital or consensual couple, or parents (both or one) and their children. Thereby, a child is any person, regardless of the age and marital status, who lives in a household with one or with both parents and does not have a marital/consensual partner or his/her own child in that household.

Live born is a child that showed the signs of life (breathing and heart beating) after birth.

Stillborn is a child born showing no life signs, provided that pregnancy lasted longer than 28 weeks.

Cause of death. The data on cause of death are based on the concept of underlying cause of death. Underlying cause of death has been defined as "(a) the disease or injury which initiated the train of morbid events leading directly to death, or (b) the circumstances of the accident or violence which produced the fatal injury" (ICD-10, volume 2, edition 2010).

4. EMPLOYMENT AND SALARIES AND WAGES

Authors:
Jasmina Petković
Marija Kostić

REGISTERED EMPLOYMENT

Sources and methods of data collection

The data on the employed are based on the Survey on registered employment, combining data from Central register of compulsory social insurance (CRCSI) and Statistical business register (SBR). The annual average was calculated as the arithmetical mean value of the number of the employed persons of all 12 months. Data on employment and registered number of unemployed persons have been taken over from the National Employment Service.

Coverage

The survey on registered employment covers all payers of social contributions and insured persons who are registered in CRCSI, on the grounds of employment, people who work and whose status is equated with employment, persons insured on the basis of performing temporary and occasional jobs, persons working under contract and persons insured on the grounds of performing independent activities.
Data on employment and registered number of unemployed persons have been taken over from the National Employment Service.
Data on unemployed persons comprise only persons registered in the National Employment Service.

Definitions

The term employed comprises persons who have formal contract of employment, i.e. have an employment relationship with an employer for a limited or unlimited period of time, and persons who perform temporary and occasional jobs under a work contract or contract of temporary employment, persons who run business individually or are founders of enterprises or entrepreneur's shops, as well as persons who undertake agricultural activities and are registered in the CRCSI.

SALARIES AND WAGES

Data source

The survey on salaries and wages is based on data from the Tax return as regards tax deduction (form PPP-PD). Average salaries and wages are calculated on the basis of amounts of computed salaries and wages for the referent month and number of employees, expressed as full-time equivalent– FTE.

Coverage

Included are all business entities that submitted completed electronic form to the Tax Administration, i.e. the form on tax report PPP-PD, with calculated salaries and wages.

Encompassed are all categories of employees for which employers, i.e. business entities delivered to the Tax Administration the completed electronic form on tax report PPP-PD, with calculated salaries and wages.

Definition of salaries and wages

In accordance with the Labour Law and Personal Income Tax Law, in the survey on salaries and wages, encompassed are all salaries and wages paid to employees and subject to taxes and contributions.

Salaries and wages comprise:

- Salaries and wages of employees with indefinite or fixed-term employment contract, including on-call duty, night-and shift-work, work on Sundays and holidays, food allowances during work and for non-executed hours of work (annual vacation, paid leave, holidays, sick leave up to 30days, absence due to professional development, work failure not caused by workers' guilt),holiday refund, awards, bonuses etc.;

- Remuneration for work of employees in temporary or occasional employment (based on contract for performing temporary and occasional jobs).

Salaries and wages are not considered to be payments under the service contract, sick-leave benefits longer than 30 days, compensation of public transport costs for commuting to and from work, for the time spent on business trip in the country and abroad, accommodation and food allowances during work and work in the field, retirement gratuity or benefits to those for whose work the need was terminated, one-time fees in accordance with the social program, compensation of funeral expenses and compensation for occupational disease or injury, jubilee prizes, solidarity aid, as well as other revenues not subject to taxes and contributions payment.

5. LOCAL SELF-GOVERMENT BUDGET

Author:
Vesna Simonović

Sources and methods of data collection

Data on budgetary revenues and expenditures of municipalities and cities of the Republic of Serbia are collected and processed by the Ministry of Finance.

Coverage

Data on budgetary revenues and expenditures are related to statements of balance of budget of all cities and municipalities that create local government. Covered are all direct and indirect budgetary beneficiaries that are mainly financed from the local government funds.

Definitions

Total budgetary revenues consist of current (tax and non-tax) revenues, receipts from selling non-financial assets, and receipts from borrowing and selling financial assets. Receipts from the sales of non-financial assets cover only income acquired through the sales of capital goods (government-ownership buildings and structures, stocks and land) and capital transfers from non-government institutions. Budgetary revenues are used to cover budgetary expenditures. Regular operating costs of budgetary beneficiaries are financed by current revenues. Total budgetary expenditures also comprise purchase of non-financial assets, credit repayment and purchase of financial assets.

[3)] Budget of the city of Niš involves receipts intended for functioning of Niš. It cannot be further distributed by municipalities.

6. BUDGET BENEFICIARIES EXPENDITURES

Author:
Jakša Burzanović

Sources and methods of data collection

The data on direct budget beneficiaries were collected through regular statistical survey, 'Budget beneficiaries -Complex annual survey', which is carried out pursuant to financial statements and other accounting documents. The data on indirect budget beneficiaries were taken over from the balance of payment received from the Treasury administration.

Coverage

Compiled are the data on revenues and expenditures of budgetary beneficiaries. The data are shown according to the Classification of Activities.

Definitions

Budget beneficiaries' expenditures include the remuneration for employees, taxes, operating expenses, fees and fines, current donations, subsidies and grants, welfare from the budget, payments to NGOs, and re-payment of interests and incurred credit costs, amortization costs and purchase of non-financial assets.

7. INVESTMENTS

Author:
Jelena Jakovljević

Sources and methods of data collection

The data on investments in fixed assets are collected from all legal persons in the country, by the regular annual survey „Investments in Fixed Assets", and they refer to all ownership types.

Coverage

The data on realized investments in new fixed assets are given at current prices, by technical structure (construction works, equipment and other fixed assets) and by the type of constructions (new facilities, reconstructions, modernization, superstructures, extensions or replacements of existing facilities) and by Classification of Activities. They are classified by investments' destination and location (pure activity principle). On the level of the Republic of Serbia and its regions, covered are all legal entities, and regarding the level of municipalities, coverage included big and medium-sized legal entities.

Definitions

Realized investments in a reporting year present the value of effectively carried out constructions, executions or purchase of new objects, equipment and other fixed assets, no matter whether these investments were accomplished and paid off.

8. PRICES

Authors:
Tatjana Savić
Radmila Bošković
Ljiljana Trmčić

Sources and methods of data collection

The retail prices of agricultural and industrial products and the prices of services that are regularly processed each month and scanned by statisticians from regional offices in the selected towns. The prices of industrial (food and non-food) products and the prices of services are scanned once per a month at 3-12 places, depending on size of town. The prices of agricultural products are surveyed twice a month, generally in 3 to 7 stores and in market places (1 to 7 markets in a town).Average monthly price for each item and service in a town is calculated by non-weighted geometric mean value of prices at several surveyed places. Average annual prices are calculated as arithmetic mean value of average monthly prices.

Coverage

Retail prices are scanned in 15 towns: Beograd, Valjevo, Zaječar, Zrenjanin, Kragujevac, Kraljevo, Leskovac, Niš, NoviSad, Pančevo, Smederevo, Sremska Mitrovica, Subotica,Užice and Šabac and they relate to 661 products and services.

Definitions

Retail prices are those prices at which retail shops, individual producers and service providers sell products and to end users. The prices include Value added tax.

FARM STRUCTURE SURVEY 2018

Presented data are the part of results of Farm structure survey (the Survey), conducted on the territory of the Republic of Serbia in the period October 1st to November 30th 2018, on the basis of Regulation on determining 2018 Plan of Official statistics ("Official Gazette of RS", No120/17). The data are presented by location of holding. The Survey covered enterprises, farm cooperatives, other forms of organization with the status of legal entities and unincorporated enterprises registered in the Business Register Agency under agricultural production as their primary activity or registered in another activity, but having organizational parts where agricultural production is performed, also including family agricultural holdings.

Definitions

An agricultural holding is a technical and economically independent production unit which has single management and on which an enterprise, farm cooperative or another legal entity, entrepreneur or family holding undertakes agricultural production as primary or secondary activity. Holding's location is the place where overall agricultural production takes place or at least its main part. It is usually the place where agricultural facilities / buildings are placed, intended for agricultural production (e.g. buildings for cattle housing, glasshouses, coolers for agricultural products storage, the greatest administrative building, etc.) or the largest part of utilized agricultural area.

Utilized agricultural area includes:

- agricultural area in kitchen gardens,
- arable land and gardens (including fallow land),
- permanent crops - orchards, vineyards, nurseries, crops of basket willows, areas with typha, carob trees, areas on which mushrooms are planted, as well as crops of Christmas trees intended for selling and
- meadows and pastures regularly cultivated (used) by the holding.

10. FORESTRY

Author:
Velibor Lazarević

Sources and methods of data collection

The data of forestry statistics are collected by regular annual surveys and are based on the existing programs and records of forests management: Annual survey on exploitation of public forests, Annual survey on private forests exploitation and Annual report on afforestation and forests growing for private and public forests, and Tree-annual survey on changes in forests' area for public and private forests. These data are all provided by Srbijašume and Vojvodinašume, the public forests administration companies, as well as by other organizations in charge of forests management (national parks, cooperatives, etc.).

Definitions

Under the term forest we assume a land area over 5 acres overgrown with forest trees, regardless the fact it is of economic significance, has protection function or is envisaged for special purposes.

Afforestation is all artificial afforestation, by sowing or planting, either to re-grow forests on wasted land (afforestation‘ in forests') or to grow new forests ('new' afforestation outside forests).

Forests felling relates to the gross volume of felled timber, measured at stumps. Technical wood is the wood that is due to its physical and chemical properties envisaged for technical and industrial purposes.

10.1. AFFORESTATED AREA AND TIMBER VOLUME, 2019

Region Area *City* - Municipality	Afforestated land, ha				Overgrown forest area - total, ha[1)]	Felled timber

Neda Cukavac

Sources and methods of data collection

Data on water abstraction and water supply and the number of households connected to the network are obtained by means of regular annual survey on drinking water supply. Data on sewerage and remediation activities and the number of households connected to the sewerage network are collected by the Urban wastewater survey. Reporting units shall fill in forms in accordance with respective records and documents, and according to estimates when required. Data are collected annually, starting from 2005.

Coverage

The data on water usage in settlements are collected from reporting units in charge of water supply and/or managing water usage systems. Surveys do not cover individual water supply (household supply) systems, which serve exclusively to certain households or household groups (up to 5 households). The data on purified and waste water are collected from reporting units responsible for managing public sewerage system.

Definitions

Supplied water means all directly abstracted and provided water quantities that the public supply system distributed to users during the referent year. The supplied quantities are determined by water meters or otherwise by calculations as stipulated by regulations for certain activity.

Wastewater is water that after use shall be transported to purification plant, or discharged to recipient (ground, underground or surface water). Wastewater quantities do not include atmospheric water. Wastewater quantities are measured by water meters or estimated according to defined production standards.

To purify wastewater, i.e. polluted used water means to eliminate from water, to an acceptable degree, all hazardous matters and radioactive substances that appeared, and in this way to make water safe for use.

[1] Discharged waste water is the sum of waste water from municipalities with respective drainage system and estimated discharged wastewater to other recipients.

[2] Municipalities that abstract water from other municipality, totally or partially.

[3] Municipalities that a part of abstracted water give to other municipalities.

[4] Presented data are aggregated values for Belgrade municipalities: Čukarica, Stari grad, Savski Venac, Rakovica, Palilula, Novi Beograd, Surčin, Zemun, Zvezdara, Voždovac, Barajevo and Grocka.

[5] Presented data are aggregated values for the following municipalities: Novi Sad, Sremski Karlovci and Petrovaradin.

[1] Discharged waste water is the sum of waste water from municipalities with respective drainage system and estimated discharged wastewater to other recipients.

[2] Municipalities that abstract water from other municipality, totally or partially.

[3] Municipalities that a part of abstracted water give to other municipalities.

[4] Presented data are aggregated values for the following municipalities: Medijana, Niska Banja, Palilula, Pantelej and Crveni Krst.

[5] Presented data are aggregated values for municipalities of Bojnik and Doljevac.

[6] Presented data are aggregated values for Vranje and Vranjska Banja.

12. CONSTRUCTION

Authors:
Dejana Đorđević
Milka Đuka
Gabrijela Rosić

Sources and methods of data collection

Data are collected in Annual survey on construction works, Monthly report on construction permits and Annual report on demolished housing constructions and dwelling adaptations.

Coverage

Annual survey on construction works covers all construction works carried out by legal and physical entities engaged in construction activity, section (F)- Construction, (Classification of Activities, 2010), as well as legal entities not classified into construction activity, but that comprise units engaged in construction. Data on works carried out by sole proprietors are taken over from the records of construction permits.

Annual report on demolished housing constructions and dwelling adaptations covers demolished housing constructions, as well as buildings with one or more apartments adapted into non-residential premises. Reporting units are respective administrative bodies, as well as units that have available documentation on demolished constructions.

Definitions

Construction works value anticipates all construction materials applied and labour force used. The value does not include the costs of land, project design, supervision and VAT. The value of works relate to undertakings in referent year, i.e. accomplished and unaccomplished constructions. The works executed were presented by territory where construction sites are found and not by territory, i.e. place where contractor's head office is situated.

Dwelling is any residential construction unit intended for habitation, consisting of one or several rooms with necessary auxiliary spaces (kitchen, bathroom, lobby, pantry, toilet, etc.) or without auxiliary spaces, and with one or more separate entrances.

More detailed methodological explanations on construction statistics are found in the SORS edition Methodologies and standards, Annual survey on construction works, volume 21/07 and Monthly report on construction permits, volume22/07 and Annual survey on demolished dwelling constructions and dwellings converted into business premises, volume 23/07.

HOUSING STOCK

Sources and methods of data collection

Data on the housing stock are derived from the data of 2011 Census of Population, Households and Dwellings. Housing stock covers all dwellings in the Republic of Serbia. Census 2011 was not conducted on the territory of AP Kosovo and Metohija. In the municipalities of Preševo and Bujanovac, the decreased number in census units' coverage was recorded due to the boycott by the majority of Albanian national community.

Definitions

Housing stock covers both occupied and vacant dwellings intended for permanent habitation. Housing stock excludes dwellings used on temporary basis for holiday and recreation, during seasonal works in agriculture, occupied business premises, premises occupied in case of need and collective dwellings.

Dwelling is taken to be any residential construction unit intended for habitation, consisting of one room or a suite of rooms with or without necessary accessories (such as: kitchen, bathroom, lobby, pantry, toilet, etc.) and with one or more separate entries. The total dwelling area is the useful floor area measured inside of the dwelling walls and is the sum of the area of all the rooms, kitchen, bathroom, toilet, corridor and other accessories in the dwelling, including the area of the lobby, balcony and terraces.

In Census 2011, for calculation of number of persons in a dwelling, applied was the concept of „usual residence". Regarding this concept, number of persons covers all persons who spend most of their time, i.e. daily/ night rest in that dwelling, as well as persons who were temporarily (shortly) absent at the critical moment of the census due to education, work, vacation, business trip, medical treatment, etc.

A room is a space inside the housing unit, enclosed by walls, from floor to ceiling or roof, of height at least 2 meters and having at least 4 square meters (a bed for adults should be placed). Number of rooms excludes kitchen.

A dwelling has installations of electricity, water supply system, sewerage, distance / central heating if such installations are placed in at least one room of the dwelling, regardless whether connected to the public networks or not.

13. TRADE

Author:
Slavica Jotanović

Sources and methods of data collection

The data on the sale and purchase of the products of agriculture, forestry and fishing are collected in the Monthly survey on turnover of agricultural products of private production, in enterprises and cooperatives and in the Monthly survey on purchase of agricultural products from family holdings. The report sources are records and other documentation provided by legal persons, cooperatives and other respective organizations providing the reports.

Coverage

Purchase and sale of agricultural, forestry and fishing produce include sale of own production of enterprises and cooperatives and purchase from family holdings, authorized for organizing further sale or processing.

Definitions

Under the term 'sold and purchased quantities' we anticipate the turnover, i.e. the delivery of agricultural products from own production of legal persons and cooperatives, as well as directly purchased quantities of agricultural products from family households, aimed at further selling or processing.

14. TOURISM

Author:
Ružica Veličković

Sources and methods of data collection

Data on the tourist turnover (the number of tourist arrivals and nights) are collected from regular monthly survey.

Coverage

Monthly survey cover tourist accommodation establishments providing, as a paid service, short-stay accommodation services. Coverage of tourist accommodation services in establishments owned by physical persons may not be considered as complete. Some of them provide accommodation services without obtained licence from the respective local government bodies and therefore they are not covered by the statistical survey. Also, some households do not provide data for all tourist customers.

Definitions

Tourist is every person who, outside his place of usual residence, spends at least one night, in tourist accommodation establishment for reasons of rest, recreation, health, study, sport, religion, family, business, public tasks or meeting.

Tourist arrival is the number of persons (tourists) who registered their stay in an accommodation establishment. Tourist is registered in every object where he stays. Consequently, in case tourists change the accommodation establishment they stay in, they are re-registered. Statistics thus register the number of tourist arrivals and not the number of tourists.

[1)] Average number of overnight stays is calculated by dividing number of overnight stays by number of tourists. As tourists are registered in each place where they stay, in case of changing place, data have been repeated, i.e. duplicated. Therefore, average number of overnight stays, calculated in this way, is probably smaller than real one.

15. TRANSPORT AND TELECOMMUNICATIONS

Authors:
Predrag Mutavdžić
Stevan Tešić
Roksalana Đorđević

Sources and methods of data collection

The data on length of national roads, class I and class II are provided from the public enterprise "Roads of Serbia" and the respective municipal bodies and data on municipal roads from regular annual surveys, provided by the respective municipal bodies.

Data on PTT traffic are obtained from the public enterprises registered in these divisions on the basis of regular annual and quarterly reports.

The data on registered road motor vehicles and trailers are obtained from the database of registered vehicles that are maintained by the Ministry of Interior of Serbia.

Coverage

Assets and PTT traffic relate to the public PTT traffic carried out under the organization of the public enterprises performed by business entities in the field of postal and telecommunication traffic.

Telephone subscribers include active connections of all legal and physical persons owned by business entities, which provide telephone services and are owned by subscribers.

Included are all registered vehicles, except for vehicles of the Serbian Army, diplomatic and consular missions and vehicles registered with a temporary license plate.

PTT mailing and parcel traffic comprise only dispatches in domestic and dispatches and receipts in international traffic. Data on letter mails include printed items, business documents, dispatches for the blind and air mailings. Turnover of newspapers and magazines is not presented by municipalities, since such dispatches are only registered in the places where editorial boards have their head offices, and when received -as letter mails.

16. EDUCATION

Authors:
Nadežda Bogdanović
Dušan Radovanović
Vesna Jašović Šurlan
Tamara Ergić

Sources and methods of data collection

Data on pre-school, primary, secondary and tertiary education are obtained from regular annual surveys.

Coverage

Annual reports of Education Statistics cover pre-school, primary and lower secondary, upper secondary and tertiary education from the division of the Classification of Activities - "Education". Data on pre-school, primary and lower secondary and upper secondary education refer to the end of the school year, whereas data on students enrolled in tertiary education refer to the beginning of winter semester, i.e. when students were enrolled. Data on graduated students refer to the calendar year.

Definitions

In the statistics of education, a school is an educational institution or educational unit where educational activity is performed according to a curriculum. Each school unit is, regardless whether it is an independent school unit, regional unit or class within another type of school, shown under this concept.

The activity of preschool education refers to education of preschool aged children, i.e. children from six months to the age when school starts. This program is performed in preschool institutions.

Primary and lower secondary education is the activity of the direct social interest and is realized as public service. In the Republic of Serbia, it is compulsory, lasts eight years and is performed in two educational cycles. The first cycle covers the first, second, third and fourth grade, and the second one includes the fifth, sixth, seventh and eighth grade.

Activity of upper secondary education is performed in secondary school, i.e. in gymnasium, vocational school, arts school, mixed school (gymnasium and vocational or arts school).

Students with disabilities acquire education, as a rule, in schools with other students, and when it is in the best interest for students, they attend schools for students with disabilities, in accordance with the Law. Classes with students with disabilities in relevant regular schools are shown as school units, which is in line with the statistical definition of school as an observation unit.

Activity of tertiary education is realized as academic or vocational studies on the grounds of certified, i.e. accredited programs for acquiring tertiary education. Tertiary education covers higher schools, faculties and art academies.

16.1. PRESCHOOL INSTITUTIONS, 2018/19 SCHOOL YEAR

17. CULTURE

Authors:
Vesna Jašović Šurlan
Tamara Ergić

Sources and methods of data collection

The data on cinemas are taken over from the Centre for Study in Cultural Development of the Republic of Serbia.

Definitions

A cinema is a hall or open-air theatre equipped and envisaged for public film projections, regardless the fact it is an independent organization or a composite unit of some other organization. Included are regular cinemas (in permanently occupied halls), open-air cinemas and travelling cinemas. Cinema performance is a public film projection (feature film projection) that lasts approximately two hours.

18. HUMAN HEALTH

Author:
Mirjana Popović

Sources and methods of data collection

Statistical data on health are taken over from the Institute of Public Health of Serbia "Dr Milan Jovanovic Batut".

Coverage

Data published in this chapter were compiled from health care institutions in the Republic of Serbia, which are included in the Plan of health institutions network. Figures on staff number are shown as of December 31.

[2)] Data refer only to health care institutions in the Republic of Serbia included in the Health Institutions Network Plan.

19. JUSTICE ADMINISTRATION

Author:
Vesna Zajc

Sources and methods of data collection

Data on adult and minor persons sentenced by absolute decrees are compiled from the courts of general jurisdiction, by the way of individual statistical questionnaire.

Coverage

Covered are all adult persons, i.e. minor persons pronounced guilty and convicted, to whom sentence was rendered and courts of general jurisdiction acknowledged as decree absolute, in the respective year.

Definitions

Adult person sentenced by decree absolute is a person aged 18 and over and minor person sentenced by decree absolute is a person aged between 14 and 18 at the moment of criminal offence committal.
