Foreword

Tertiary education is an activity of particular interest for the Republic of Serbia and part of the international, especially European, scientific and artistic area. It is realized through academic and applied studies based on approved, i.e. accredited study programmes for attaining tertiary education.

The data on tertiary education are a result of regular annual surveys that are carried out in all tertiary education institutions and are collected by means of individual questionnaires. For enrolled students one uses the "Statistical report on enrolled students" (form SV-20), for graduated students the "Statistical report for students who graduated at higher education institutions" (form SV 50) and for teaching staff the "Report on teaching staff and structure of higher education institutions" (form SV-21).

Apart from this publication the data on tertiary education are also published in the "Statistical Year-book of the Republic of Serbia", "Municipalities and regions in the Republic of Serbia", "Statistical pocket-book of the Republic of Serbia" as well as in occasional publications issued by the Statistical Office of the Republic of Serbia.

Table of content

Foreword	3
Methodological explanations	7
I. ENROLLED STUDENTS	
1.1. Students by sex, financing modality and cycle of studies	12
1.2. Students by sex, financing modality and fields of education.....	14
1.3. Students enrolled at universities, faculties and higher schools (colleges) by type of studies	16
1.4. Students by fields of education and universities	22
1.5. Enrolled students by financing modality and sex	30
1.6. Students by previously completed secondary school.....	36
1.7. Students by universities.....	39
1.8. Students by ethnicity	40
1.9. Foreign students	48
1.10. Students by age and sex.....	52
1.11. Students by marital status	54
1.12. Students by way of supporting themselves during studies	55
1.13. Students by main way of supporting themselves during the studies	56
1.14. Does the student support other persons.....	57
1.15. Students by type of accommodation during the studies	58
1.16. Students by father and mother's educational level	59
1.17. Employment situation of students and parents/guardians	60
1.18. . Students in higher schools (colleges), faculties and art academies by municipalities.....	61
1.19. Students by place of residence	63
II. GRADUATED STUDENTS	
2.1. Students by sex, financing modality and cycle of studies	72
2.2. Students by sex, financing modality and fields of education.....	74
2.3. Students by universities, faculties, and fields of education	76
2.4. Graduated students by financing modality and sex	83
2.5. Graduated students by previously completed school	88

2.6. Students by universities	90
2.7. Students by ethnicity	92
2.8. Foreign students	100
2.9. Students by age and sex	101
2.10. Students by way of supporting themselves during studies	103
2.11. Students by type of accommodation during the studies	104
2.12. Student mobility	105
2.13. Students at higher schools (colleges) and faculties by sex, cycles of studies by regions, areas and municipalities	106

III. TEACHING STAFF

3.1. Teaching staff by universities and faculties	110
3.2. Teaching staff by titles and length of working hours.....	121

TERTIARY EDUCATION STATISTICS

LEGAL BASIS

Surveys are carried out according to the Law on Official Statistics ("Official Journal of the RS", number 104/2009) adopted by the Government of the Republic of Serbia.

METHODOLOGICAL BASIS

Objective and scope of statistical surveys

The objective of the tertiary education statistics is to collect, process and publish data on universities, faculties, academies, higher schools and study programmes, type and cycle of studies, students enrolled and graduated at all cycles of studies (first, second and third cycles) as well as on teaching staff by the main characteristics.

Tertiary education statistics surveys are conducted once a year and provide data on the number and territorial distribution of higher education institutions, ownership, cycles of study they are organizing, types of study programmes, and on students who have enrolled, i.e. graduated at a cycle of studies by sex, age, previously completed school, financing modalities during the studies, students' socio-economic status, students' mobility as well as data on teaching staff.

Data source

Data on enrolled and graduated students are collected via individual statistical questionnaires "Statistical report on students enrolled" (form ŠV'20) and „Statistical report for students who completed studies at higher education institutions (ŠV-50).

Data on teaching staff at higher education institutions are collected via a cumulative report "Report on teaching staff and the structure of higher education institutions" (ŠV-21) which is filled in by all higher education institutions.

Survey coverage

The coverage of tertiary education surveys is complete. The annual surveys on enrolled students (ŠV-20) and on graduated students (ŠV-50) cover all students enrolled at all cycles of studies in the current school year, i.e. all students who completed a cycle of studies in the calendar year at all higher schools, faculties and art academies whatever the ownership status. The survey on enrolled students does not include senior undergraduate students (do not enrol in a year of study).

The annual survey on teaching staff and the structure of higher education institutions (ŠV-21) covers all teachers and assistants in an educational process whatever the type of employment relationship and of working hours.

Reporting units

Reporting units for tertiary education surveys are all higher education institutions – universities, faculties, art academies and higher schools whatever the ownership.

Obligation to provide data

Reporting units are obligated to provide accurate, complete and up-dated data, which, by their content and form, meet the requirements of the official statistics. The obligation to provide data is based on Article 26a of the penalty provision concerning data provision or the provision of incomplete or inaccurate data based on Article 54 of the Law of Official Statistics ("Official Journal of the RS", number 104/2009).

Obligation to protect individual data

Data obtained from reporting units are considered official secret, are used for statistical purposes and cannot be released or made available to users. Data aggregated according to territory, cycle of study, ownership status, financing modality, etc. may be accessed by external users.

Explanation on the main concepts and characteristics

Higher education institutions are educational institutions where educational and scientific process is carried out in view of preparing specialists to work in corresponding areas, according to specially regulated curricula. The activity of tertiary education is performed by the following higher education institutions: university, faculty, i.e. art academy within a university; academy of applied studies; higher school and higher school of applied studies.

University, faculty, academy, academy of applied studies, higher school of applied studies are independent higher education institutions. Faculty, i.e. art academy is a higher education institution in the scope of a university that realizes academic study programmes and develops R&D, specialist, i.e. art works in one or more fields. Faculty, i.e. art academy can realize also applied study programmes.

The activity of tertiary education is realized through academic and applied studies based on selected, i.e. accredited study programmes for attaining tertiary education.

Academic studies involve academic study programmes that enable students to develop and apply scientific, specialist and art achievements.

Applied studies involve applied study programmes that enable students to apply knowledge and skills necessary to become included in work process.

First cycle studies are undergraduate academic studies and undergraduate applied studies.

Second cycle studies are graduate academic studies – master, specialized applied studies, specialized academic studies and integrated academic studies.

Integrated studies of academic study programmes are organized as integrated in the scope of undergraduate and graduate academic studies leading to 360 ECTS credits after completion.

Third cycle studies are doctoral academic studies.

Students who study by the old curriculum of academic studies and second cycle studies are shown separately.

Mobility in tertiary education is focused on removing barriers in knowledge flow and is the key element of the European strategy that should contribute to personal and professional students' development and to them then with skills they need in future. Eurostat defines two types of mobility:

1. students' enrolment abroad, i.e. in another country other than that where secondary education has been attained, for the purpose of getting a degree, and
2. international credit mobility to follow study programmes or traineeships of the same level as the studies carried out in the country.

For a student to be considered mobile, she/he must spend at least three months abroad or the programme attended abroad must ensure at least 15 ECTS credits.

Harmonisation with international recommendations, standards and practice

The methodology of tertiary education complies with international statistical standards and is aimed at obtaining data on tertiary education according to the International Standard Classification of Education (ISCED-2011, levels 5-8).

Level of data representativeness

As far as territorial representativeness is concerned, data are collected at the level of municipalities – according to the seat of the higher education institutions, administrative districts, AP Vojvodina and for the Republic of Serbia. Data aggregation is possible according to faculties within universities, ownership, fields of education, financing modality and levels of study.

Publication of the results

Data on enrolled and graduated students have been collected since 1945, and over 1951 – 2003 they were published in the bulletins of the Federal Statistical Office entitled Higher Schools.

Apart from this publication, the results of conducted surveys are published also in the “Statistical Yearbook of the Republic of Serbia”, “Municipalities and Regions of the Republic of Serbia” and in the “Statistical Pocket-book of the Republic of Serbia” as well as in occasional publications released by the Statistical Office of the Republic of Serbia.

Symbols
