Notes:

The data on issued building permits are overtaken from the Central Register of Integrated Procedures, which has been, according to the Law on planning and construction ("Official Gazette of the Republic of Serbia", number 132/14, article 8) administered by the Serbian Business Registers Agency (SBRA). The data on dwellings, unavailable in Central Register of Integrated Procedures, are filled in by the Ministry competent for construction affairs, responsible authorities of the Autonomous Province, city or municipality that, according to the Law on planning and construction ("Official Gazette of the Republic of Serbia", number 132/14, article 133), issue construction permits.

In the scope of this survey, the concept of „building permit“ comprises the building permit for construction and the decision which approves the execution of works following the article 145 of the Law on planning and construction. The issued building permits and approvals for works executions, based on harmonized request, included are only if the construction is approved for the first time.

This statistical survey comprises the issued building permits for all types of constructions described in the Classification of Types of Constructions, i.e. buildings and other civil engineering works and these are presented by territories where the planned works are performed in the country.

Data on issued building permits show the future trends of construction activity and enable an insight in investments' structure on state and local self – government level.

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).

Detailed methodological notes of this survey can be found on the site of the Statistical Office of the Republic of Serbia: <http://www.stat.gov.rs/istrazivanja/methodology-and-documents/?a=05&s=0>.
