Methodological notes:

The indices published in this statistical release relate to turnover of all business entities (legal persons and unincorporated enterprises) dealing with retail trade, division 47 of CA (Classification of Activities – “Official Gazette of RS”, no. 54/10).

Retail trade turnover is obtained on the basis of regular monthly statistical survey “Monthly Survey of Retail Trade”, based on the sample and on VAT reports received from Tax administration.

The turnover in retail trade includes VAT.

The turnover indices at constant prices (real indices) have been obtained by deflating the indices at current prices (nominal indices) by the corresponding consumer price indices, excluding: water (from public utility systems), electricity and motor vehicles, motorcycles and parts.

All published indices ought to be regarded as preliminary, meaning that certain corrections can appear on the basis of the estimated results, obtained from the regular statistical surveys that are conducted on the increased number of sample units.

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).
