PREFACE

By launching the publication "Municipalities and regions of the Republic of Serbia, 2024", the Statistical Office of the Republic of Serbia carries on with issuing annual statistics on municipalities, cities and regions of the Republic of Serbia.

This publication, just as the previous volumes of the series, features about 1000 data for each municipality, city and region. Considering the contents, coverage and presentations, this is actually a complete statistical yearbook of municipalities, cities and regions.

In presenting the data we took into account the present organization of the Republic of Serbia and its administrative bodies. Territorial distribution is presented in accordance with the Regulation on Nomenclature of Statistical Territorial Units ("Official Gazette of RS", No. 109/09 and 46/10).

At the Statistical Office of the Republic of Serbia, in Belgrade head office and at its regional offices, we keep filed more detailed statistical data that were not published, but are available to the interested users. The data are offered in printed and electronic form (series 1997-2023 available at SORS website).

Apart from the data of SORS, the publication contains the data provided by the Ministry of Interior of the Republic of Serbia, Ministry of Finance, Republic Geodetic Authority of the Republic of Serbia, National Employment Service and Institute of Public Health of Serbia.

In order to provide an insight into the data of this publication for the wide range of users, the Statistical Office of the Republic of Serbia edited also a separate English version of the publication ("Municipalities and regions of the Republic of Serbia, 2024").

Belgrade, 2024

"Municipalities and regions in the Republic of Serbia, 2024" Main principles of editing 15

1. GENERAL INFORMATION 17
1.1. General data, 2023 18

2. SOCIAL SYSTEM 23
2.1. Elections for delegates to assemblies of municipalities, December 31, 2023
Poll places, voters, electoral lists and candidates 24
2.2. Proposers, by number of elected delegates to assemblies of municipalities and towns, December 31, 2023 28
2.3. Delegates to assemblies of municipalities and towns, by sex and age, December 31, 2023 32

3. POPULATION 37
3.1. Population by age and sex, by the 2022 Census 40
3.2. Population, by ethnicity, by the 2022 Census 64
3.3. Population by religion, by the 2022 Census 72
3.4. Population by mother tongue, by the 2022 Census 80
3.5. Population aged 15 and over, by educational attainment and sex, by the 2022 Census 88
3.6. Population aged 15 and over, by legal marital status and sex, by the 2022 Census 101
3.7. Households according to the number of members, by the 2022 Census 106
3.8. Families by type, by the 2022 Census 110
3.9. Vital events, 2023 114
3.10. Causes of deaths, 2023 118
3.11. Population estimate 126
3.12. Main contingents and indicators of population of the Republic of Serbia, 2023 130
3.13. Population projections – as of 01.01 134

4. EMPLOYMENT AND SALARIES AND WAGES 139
4.1. Registered employment by municipality of residence, 2023 140
4.2. Registered employment by municipality of work by activity sections, 2023 144
4.3. Structure of registered employment, 2023 152
4.4. Unemployed – as of 31 December 2023 160
4.5. Average net salaries and wages per employee, January–December 164

5. LOCAL GOVERNMENT BUDGET 168
5.1. Budgetary receipts and revenues, 2023 169
5.2. Budgetary expenditures, 2023 173

6. BUDGET BENEFICIARIES EXPENDITURES 177
6.1. Budget beneficiaries' expenditures, 2023 178

7. INVESTMENTS 183
7.1. Realized investments in new fixed assets, by type of construction and technical structure, 2023 185
7.2. Realized investments in new fixed assets, by activities, 2023 190

8. PRICES 207
8.1. Average retail prices in towns, 2023 208

9. AGRICULTURE 215
9.1. General data on agricultural holdings – Farm Structure Survey 2023 216

10. FORESTRY 225
10.1. Afforestated area and timber volume, 2023 226

11. ENVIRONMENT 231
11.1. Public water supply and waste water discharge, 2023 232

12. CONSTRUCTION 236
12.1. Value of construction works done, 2023 238
12.2. Housing construction and demolished dwellings, 2023 242
12.3. Housing characteristics, by 2023 Census 246

13. TRADE 254
13.1. Sale and purchase of selected products of agriculture, forestry and fishing, 2023 255

14. TOURIST TRADE 259
14.1. Tourism, 2023 260
14.2. Tourists and overnight stays, by tourist places, 2023 264

15. TRANSPORT AND COMMUNICATION 266
15.1. Length of roads, 2023 267
15.2. Post activities and telecommunications, 2023 271
15.3. Registered road vehicles and trailers, 2023 276

16. EDUCATION 281
16.1. Preschool institutions, 2022/23 school year 283
16.2. Primary and lower secondary education, 2022/23, end of school year 287
16.3. Upper-secondary education, 2022/23, end of school year 291
16.4. Teachers in regular primary and secondary schools, 2022/23, end of school year 295

16.5. Students enrolled in tertiary education, 2022/23 school year 299
16.6. Graduated students in tertiary education, 2022 301
16.7. Teachers and assistants in tertiary education, 2022/23 303

17. CULTURE 305
17.1. Cinemas, 2023 306

18. HUMAN HEALTH 308
18.1. Medical doctors, dental practitioners and graduate pharmacists in health service, 2023 309

19. JUSTICE ADMINISTRATION 313
19.1. Sentenced adults and minors, by place of committing criminal offence and by type of criminal offence, 2023 314

MAIN PRINCIPLES OF EDITING "MUNICIPALITIES AND REGIONS IN THE REPUBLIC OF SERBIA, 2024"

Distribution of material

The statistical material in this publication was presented following basically the same sequence as in the "Statistical Yearbook of Serbia". Certain chapters of the Yearbook were excluded here: Geographical review, Climate and environment, National accounts, Individual consumption, Money, External trade, Catering trade, Research and development and International review.

Data sources

The statistical data presented here resulted from the accomplished programs of statistical surveys.

Included are also certain statistics that are in charge of the following institutions: Ministry of Finance, Republic Geodetic Authority of the Republic of Serbia, National Employment Service and Institute of Public Health of Serbia. In the tables containing these data, given are the full titles of the data sources.

Coverage

The data coverage, whole and partial, is explained in the methodological papers. The data are fully comparable by municipalities and the years of production, excluding the cases where methodological changes appear.

Methodological explanations

In a separate chapter of the publication, presented are the most required methodological explanations. The detailed methodological explanations can be found in the volumes of the edition "Methodologies and standards" (SORS), i.e. "Methodological papers" (FSO) or on the website of the Statistical Office of the Republic of Serbia.

Technique of presentation

As a rule, all the municipalities were covered in table presentations. In certain areas, where the phenomena observed are not characteristic of all municipalities, the municipalities not featuring the observed phenomena were excluded. In the case of City of Belgrade, majority of data were presented so as to cover all municipalities.

The municipalities were divided here into administrative districts and data on cities were presented separately. It is to be noted that certain cities did not use the opportunity to establish the city municipalities. In this yearbook, the territorial distribution was presented in compliance with the Regulation on Nomenclature of Statistical Territorial Units ("Official Gazette of RS", No. 109/09 and 46/10).

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).

1. GENERAL DATA

Authors:
Jelena Denić
Milutin Radenković
Pavle Cimbaljević
Dragana Paunović Radulović
Ljiljana Sekulić

Sources and method of data collection

Data on the total area of the Republic of Serbia, as well as data on the areas of regions, districts and municipalities/city municipalities and cities, are taken from the Republic Geodetic Office, as of January 1, 2024. Since cadastral surveys are ongoing, the data on the area should be considered provisional. Data on the number of cadastral municipalities was also taken from the Republic Geodetic Office.

Population estimates for the post-census year 2023 were made based on the estimated number of inhabitants at the end of the previous year (December 31, 2022) and the results of the annual vital statistics and internal population migration.

The average estimated number of inhabitants (as of 30.6.2023) represents the arithmetic mean of the estimated number of inhabitants at the beginning (1 January) and at the end (31 December) of 2023.

ELECTIONS AND COMPOSITION OF MUNICIPAL AND CITY/TOWN ASSEMBLIES

Sources and methods of data collection

The data on the results of the elections for the delegates to municipal and city/town assemblies, as well as data on delegates of regions and areas were obtained from the municipal and city/town electoral boards by summarized reports for the level of municipality, i.e. city/town.

Coverage

The elections for delegates were held on June 21 2020. Together with the data from these elections, processed were the data from elections held on March 28 and October 17 2021, April 3 2022, as well as December 17 2023.

For the city municipalities: Vranje, Požarevac and Užice, elected city assembly councillors also perform their functions at the municipal level.

Definitions

Elections for delegates were conducted according to proportional system and each municipality/town presented one electoral unit in elections for delegates.

The elections were conducted by election commissions and election boards, which, through local government units, submitted their reports to the statistical body in charge of statistics (Law on local elections, "Official Gazette of RS", no 129/2007, 34/2010 – Constitutional Court decision and 54/2011, 12/2020, 16/2020 - authentic interpretation, 68/2020 and Law on local elections, "Official Gazette of RS", no 14/2022 and 35/ 2024). On such basis, the Statistical Office of the Republic of Serbia has collected data and performed control, processing and presentation of the data.

Sources and method of data collection

Population data for 2022 are presented based on the results of 2022 Population, Households and Dwellings Census.

The estimated number of inhabitants in the middle of the year (as of June 30) is calculated based on census data, data on natural population growth and data on internal migration.

Population projections were made for the period from 2022 to 2052, up to the level of municipalities. The base population is the estimated number of inhabitants on January 1, 2022. They were made in 32 scenario variants, which are the result of combining different assumptions about future trends in fertility, mortality and migration. Data on the projected population according to the average (expected) projection variant for 2032, 2042 and 2052 are presented.

Data on births, deaths and marriages are collected and submitted by registrars, and data on divorces are submitted by the competent courts.

Coverage

2022 Census was conducted from 1 to 31 October 2022. Monitoring during the field implementation of 2022 Census enabled the oversight of the work of enumerators in almost real time. Given that it was determined that there was a concern that in some cities not all citizens would be enumerated by the end of October 2022, field data collection was extended for seven days in several cities. Telephone duty stations were also organized to enable citizens who were not enumerated for any reason to contact the enumerator or to be enumerated themselves by telephone. The telephone enumeration lasted until 17 November 2022.

The application of innovative technical and technological solutions in 2022 Census made it possible to check the coverage of census units immediately after the census was completed, in a short time, and to identify areas with a share of enumerated persons lower than the estimated number. In order to improve coverage, for the first time in 2022 Census, the imputation method from administrative sources was applied to persons (3.2%) who were found to have lived in the Republic of Serbia at the time of 2022 Census, but who, for whatever reason, were not enumerated.

2022 Census was not conducted in the territory of the Autonomous Province of Kosovo and Metohija.

Birth statistics include all births (both live and stillbirths) in the observed year. Death statistics include every death in the observed year. Marriage statistics include marriages that are concluded in a legally prescribed manner, i.e. those that are entered into the civil registry in the observed year. Divorce statistics include legally valid divorces, annulments and marriages that are declared invalid also in the observed year. According to the regulations on civil registry keeping, cases of births, deaths and marriages are mandatory entered into the civil registry of the area in which they occurred, regardless of whether the person resides in that area or not. The processing involves regrouping, so that the results are expressed according to the place of residence of the person, which corresponds to the concept of the usual population, applied in 2011 Census. It is to be noted that Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total). 2011 Census was not conducted on the territory of the Autonomous Province of Kosovo and Metohija. In the municipalities of Preševo and Bujanovac, a reduced coverage of census units was recorded due to the boycott by the majority of members of the Albanian national community.

Definitions

Population. In 2022 Census, the concept of "usual resident population" was applied to determine the total number of population, as in 2011 Census. According to this concept, a person is considered to be a usual resident of the place where he lives alone (in the case of a single-person household) or with members of his household, regardless of where he has his registered place of residence or stay. In accordance with the definition of the place of usual residence, the usual resident population of a particular place includes persons who have lived in that place continuously for at least 12 months before the critical moment of the census, as well as persons who have lived in that place for less than 12 months, but with the intention of staying there for at least one year.

Age. In the tables of census results and vital statistics, the population is expressed by age groups according to completed years of life. For example, the group 0–4 includes children from birth until they reach the age of five.

Ethnicity. As in the previous censuses, data on the national composition of the population in 2022 Census were collected on the basis of free declaration of residents. Article 47 of the Constitution of the Republic of Serbia guaranteed citizens complete freedom of declaration of their ethnicity. According to the same article, citizens were not obliged to declare themselves on this issue

Religion. The answer to the question about religion in 2022 Census is the result of the individual's personal conviction based on their understanding of religion, so when giving the answer it was not important whether the person was registered in the book of adherents of a particular religion. According to Article 43 of the Constitution of the Republic of Serbia, citizens were not obliged to declare themselves on this issue.

Mother tongue. As in the previous census, in 2022 Census, the mother tongue was understood as the language that a person learned to speak in early childhood, or if more than one language is spoken in the household, the language that the person considers to be their mother tongue.

Highest school completed. The highest school completed is the school from which a person obtained the highest level of education. Data on the highest school completed refers exclusively to education acquired in the official school system, so that education acquired within non-standard programs, so-called informal education (programs/trainings/courses outside the official school system), is not taken into account. Persons who have obtained a master's or doctorate degree are reported in the higher education group. Data on the highest school completed are reported only for the population aged 15 and over.

Legal marital status. Data on legal marital status refer to the formal and legal marital status of a person. This question was answered by all persons, including persons living in consensual unions. Data on legal marital status are reported for persons aged 15 and over.

Household. A households can be a one-person household (when one person lives alone in a separate dwelling or part of the dwelling and meets the needs independently), and multi-person houselold (when several persons, whether related or not, share their expenses for housing and food).

Family is a union consisting of a marital or consensual couple, or parents (both or one) and their children. Thereby, a child is any person, regardless of the age and marital status, who lives in a household with one or with both parents and does not have a marital/consensual partner or his/her own child in that household.

A live birth is a child who showed signs of life (breathing and heartbeat) at birth.

A stillbirth is a child who was born without any signs of life and who was carried for more than 28 weeks.

Cause of death. Data on the cause of death are based on the concept of the underlying cause of death. The underlying cause of death is defined as "a) a disease or injury that initiated a series of conditions that led directly to death or b) the circumstances of an accident or violence that caused the fatal injury" (ICD-10, Volume 2, 2010 edition).

4. EMPLOYMENT AND SALARIES AND WAGES

Authors:
Marija Sućić
Marija Kostić

Registered employment

Sources and methods of data collection

The data on the employed are based on the Survey on registered employment, combining data from Central register of compulsory social insurance (CRCSI) and Statistical business register (SBR).
The annual average was calculated as the arithmetical mean value of all 12 months.
Data on employment and registered number of unemployed persons have been taken over from the National Employment Service.

Coverage

The survey on registered employment covers all payers of social contributions and insured persons who are registered in CRCSI, on the grounds of employment, people who work and whose status is equated with employment, persons insured on the basis of performing temporary and occasional jobs, persons working under contract and persons insured on the grounds of performing independent activities.
Data on employment and registered number of unemployed persons have been taken over from the National Employment Service.
Data on unemployed persons comprise only persons registered in the National Employment Service.

Definitions

The term employed comprises persons who have formal contract of employment, i.e. have an employment relationship with an employer for a limited or unlimited period of time, and persons who perform temporary and occasional jobs under a work contract or contract of temporary employment, persons who run business individually or are founders of enterprises or entrepreneur's shops, as well as persons who undertake agricultural activities and registered in the CRCSI.

SALARIES AND WAGES

Data source

The survey on salaries and wages is based on data from the Tax return as regards tax deduction (form PPP-PD). Average salaries and wages are calculated on the basis of amounts of computed salaries and wages for the referent month and number of employees, expressed as full-time equivalent – FTE

Coverage

Included are all business entities that submitted completed electronic form to the Tax Administration, i.e. the form on tax report PPP-PD, with calculated salaries and wages.
Encompassed are all categories of employees for which employers, i.e. business entities delivered to the Tax Administration the completed electronic form on tax report PPP-PD, with calculated salaries and wages.

Definition of salaries and wages

The Survey on salaries and wages is based on data from the Withholding Tax Return form (PPP-PD form). Average earnings are calculated based on the amount of calculated earnings for the reporting month and the number of employees expressed in full-time equivalent (FTE). All business entities that have submitted an electronically completed PPP-PD tax return form with calculated earnings to the Tax Administration are included. All categories of employees for whom employers, i.e. business entities, have submitted an electronically completed PPP-PD tax return form with calculated earnings to the Tax Administration are included. In the earnings survey (in accordance with the Labor Law and the Personal Income Tax Law), earnings are understood to mean all payments to employees on which the applicable taxes and contributions are paid. In accordance with the Labour Law and Personal Income Tax Law, in the survey on salaries and wages, encompassed are all salaries and wages paid to employees and subject to taxes and contributions.

Salaries and wages comprise:

- Salaries and wages of employees with indefinite or fixed-term employment contract, including on-call duty, night-and shift-work, work on Sundays and holidays, food allowances during work and for non-executed hours of work (annual vacation, paid leave, holidays, sick leave up to 30 days, absence due to professional development, work failure not caused by workers' guilt), holiday refund, awards, bonuses etc.;
- Remuneration for work of employees in temporary or occasional employment (based on contract for performing temporary and occasional jobs).

Salaries and wages are not considered to be payments under the service contract, sick-leave benefits longer than 30 days, compensation of public transport costs for commuting to and from work, for the time spent on business trip in the country and abroad, accommodation and food allowances during work and work in the field, retirement gratuity or benefits to those for whose work the need was terminated, one-time fees in accordance with the social program, compensation of funeral expenses and compensation for occupational disease or injury, jubilee prizes, solidarity aid, as well as other revenues not subject to taxes and contributions payment.

[1)] The definition of salary is established based on the Labor Law ("Official Gazette of the Republic of Serbia", No. 24/05 and 61/05).

[2)] The data are presented according to the municipality of residence of the employees, not according to the municipality of work. The territorial division is carried out in accordance with the Regulation on the Nomenclature of Statistical Territorial Units ("Official Gazette of the Republic of Serbia", No. 109/09 and 46/10).

5. LOCAL GOVERNMENT BUDGET

Author:
Vesna Simonović

Sources and methods of data collection

Data on budgetary revenues and expenditures of municipalities and cities of the Republic of Serbia are collected and processed by the Ministry of Finance.

Coverage

Data on budgetary revenues and expenditures are related to statements of balance of budget of all cities and municipalities that create local government. Covered are all direct and indirect budgetary beneficiaries that are mainly financed from the local government funds.

Definitions

Total budgetary revenues consist of current (tax and non-tax) revenues, receipts from selling non-financial assets, and receipts from borrowing and selling financial assets. Receipts from the sales of non-financial assets cover only income acquired through the sales of capital goods (government-ownership buildings and structures, stocks and land) and capital transfers from non-government institutions. Budgetary revenues are used to cover budgetary expenditures. Regular operating costs of budgetary beneficiaries are financed by current revenues. Total budgetary expenditures also comprise purchase of non-financial assets, credit repayment and purchase of financial assets.

[3)] Budget of the city of Niš involves receipts intended for functioning of Belgrade. It cannot be further distributed by municipalities.

6. BUDGET BENEFICIARIES EXPENDITURES

Author:
Jakša Burzanović

Sources and methods of data collection

Data on budget revenues and expenditures of municipalities and cities of the Republic of Serbia is collected and processed by the Ministry of Finance.

Coverage

Data on realized budget revenues and expenditures refer to the final budget accounts collected from all cities and municipalities that make up the local government system. All direct and indirect users of the city or municipality budget that are predominantly financed by local government funds are included.

Definitions

Total budget revenues consist of current (tax and non-tax) revenues, proceeds from the sale of non-financial assets, as well as proceeds from borrowing and the sale of financial assets. Proceeds from the sale of non-financial assets include only proceeds from the sale of capital goods (state-owned buildings, inventories and land) and capital transfers from non-governmental institutions. Budget revenues are used to cover budget expenditures. Current revenues finance the regular operating expenses of budget users. Total budget expenditures consist of both expenditures for the acquisition of non-financial assets and expenditures for the repayment of loans and the acquisition of financial assets.

[1)] For AP Kosovo and Metohia, coverage is incomplete.

7. INVESTMENTS

Author:
Jelena Jakovljević

Sources and methods of data collection

The data on investments in new fixed assets are collected from all legal persons, by the regular annual survey „Investments in Fixed Assets", and they refer to all ownership types.

Coverage

The data on realized investments in new fixed assets are given at current prices, by technical structure (construction works, equipment and other) and by the type of constructions (new facilities, reconstructions, modernization, superstructures, extensions or replacements of existing facilities) and by Sections of Classification of activities. They are classified by investments' destination and location (pure activity principle). On the level of the Republic of Serbia and its regions, covered are all legal entities, and regarding the level of municipalities, coverage included big and medium-sized legal entities.

Definitions

Realized investments in a reporting year present the value of effectively carried out constructions, executions or purchase of objects, equipment and other fixed assets, no matter whether these investments were accomplished and paid off.

8. PRICES

Authors:
Ljiljana Trmčić
Ljiljana Vidojević Milutinović

Sources and methods of data collection

The retail prices of agricultural and industrial products and the prices of services that are regularly processed each month and collected by statisticians from regional offices in the selected towns. The prices of industrial (food and non-food) products and the prices of services are scanned once per month at 3-12 places, depending on size of town. The prices of agricultural products are surveyed twice a month, in 3 to 10 stores and in market places (1 to 7 markets in a town).

Average monthly price for each item and service in a town is calculated by non-weighted geometric mean of all collected prices in the city. Average annual prices are calculated as arithmetic mean value of average monthly prices.

Coverage

Retail prices are scanned in 15 towns: Beograd, Valjevo, Zaječar, Zrenjanin, Kragujevac, Kraljevo, Leskovac, Niš, Novi Sad, Pančevo, Smederevo, Sremska Mitrovica, Subotica, Užice and Šabac and they relate to 660 products and services.

Definitions

Retail prices are the prices (including all taxes) at which retail trade, individual manufacturers and service providers sell products and charge for services to end consumers.

9. AGRICULTURE

Authors:
Gordana Veljković

CENSUS OF AGRICULTURE 2023

Presented data are the part of results of Agriculture Census that was conducted on the territory of the Republic of Serbia in the period October 1st to December 15th, 2023, in accordance with the Regulation on Establishing the Official Statistics Plan for 2023 ("Official Gazette of the Republic of Serbia", No. 141/2022) and the Law on 2023 Census of Agriculture (Official gazette RS, no. 76/21). The data are shown by holdings' location. Census of Agriculture covered enterprises, farm cooperatives, other forms of organization with the status of legal entities and unincorporated enterprises registered in the Business Register Agency under agricultural production as their primary activity or registered in another activity, but having organizational parts where agricultural production is performed, also including family agricultural holdings.

Definitions

An agricultural holding is a technical and economically independent production unit which has single management and on which an enterprise, farm cooperative or another legal entity, entrepreneur or family holding undertakes agricultural production as primary or secondary activity. Holding's location is the place where overall agricultural production takes place or at least its main part. It is usually the place where agricultural facilities / buildings are placed, intended for agricultural production (e.g. buildings for cattle housing, glasshouses, coolers for agricultural products storage, the greatest administrative building, etc.) or the largest part of utilized agricultural area.

Utilized agricultural area includes:

- agricultural area in kitchen gardens
- arable land and gardens (including fallow land)
- permanent crops - orchards, vineyards, nurseries, crops of basket willows, areas with typha, carob trees, areas on which mushrooms are planted, as well as crops of Christmas trees intended for selling and meadows and pastures regularly cultivated (used) by the holding.

9.1 GENERAL DATA ON AGRICULTURAL HOLDINGS

10. FORESTRY

Author:
Boško Krstović

Sources and methods of data collection

The data of forestry statistics are collected by regular annual surveys and are based on the existing programs and records of forests management: Annual survey on exploitation of public forests, Annual survey on private forests exploitation and Annual report on afforestation and forests growing for private and public forests, and Tree-annual survey on changes in forests' area for public and private forests. These data are all provided by *Srbijašume* and *Vojvodinašume*, the public forests administration companies, as well as by other organizations in charge of forests management (national parks, cooperatives, etc.).

Definitions

Under the term forest we assume a land area over 5 acres overgrown with forest trees, regardless the fact it is of economic significance, has protection function or is envisaged for special purposes. Afforestation is all artificial afforestation, by sowing or planting, either to re-grow forests on wasted land (afforestation 'in forests') or to grow new forests ('new' afforestation). Forests felling relates to the gross volume of felled timber, measured at stumps. Technical wood is the wood that is due to its physical and chemical properties envisaged for technical and industrial purposes.

As of the end of 2023.

[1)] Data for the Republic of Serbia were taken from the Ministry of Agriculture, Forestry and Water Management - Forestry Administration (preliminary data) and the Second National Forest Inventory 2018–2023). All other data in Table 10.1 were calculated by SORS based on the results obtained from the three-year survey on changes in forest area (ŠUM13) and using the results of the Second National Forest Inventory 2018–2023.

11. ENVIRONMENT

Author:
Neda Cukavac

Sources and methods of data collection

Data on the water abstracted, delivered, and the number of households connected to the water supply network are collected through a statistical survey on drinking water supply. Data on wastewater discharge and treatment and the number of households connected to the sewerage system are collected through a statistical survey on wastewater from settlements. Reporting units fill out questionnaires based on records and documentation, and where necessary, based on estimates. Data have been collected annually since 2005.

Coverage

Data on water use in settlements are collected from reporting units that distribute water and/or manage water use systems. Data on individual water supply systems (domestic), which serve exclusively a specific household or a group of up to five households, are not collected. Data on treated and discharged wastewater are collected from reporting units that manage sewerage systems.

Definitions

Delivered water is all directly affected and secured quantities of water that the water utility distributed to its users during the reporting year. The quantities of delivered water are determined by a water meter, and where they are not available, they are calculated according to the standards for a particular branch of activity. Wastewater is that which, after use, is drained to a treatment plant or discharged into a recipient (soil, groundwater or surface water). Atmospheric water is not included in the quantities of wastewater. The quantities of wastewater are determined by a water meter or by estimation according to the established production standards. Purifying waste, or polluted used water, means freeing it to the permitted extent from hazardous and harmful substances and radionuclides that have appeared in it, and making it harmless for use.

11.1. PUBLIC WATER SUPPLY AND WASTE WATER DISCHARGE, 2023

[1] Discharged waste water is the sum of waste water from municipalities with respective drainage system and estimated discharged wastewater to other recipients.

[2] Municipalities that abstract water from other municipality, totally or partially.

[3] Municipalities that a part of abstracted water give to other municipalities.

[4] Presented data are aggregated values for Belgrade municipalities: Čukarica, Stari grad, Savski Venac, Rakovica, Palilula, Novi Beograd, Surčin, Zemun, Zvezdara, Voždovac, Barajevo and Grocka.

[5] Presented data are aggregated values for the following municipalities: Novi Sad, Sremski Karlovci and Petrovaradin.

12. CONSTRUCTION

Authors:
Dejana Đorđević
Milka Đuka
Gabrijela Rosić

Sources and methods of data collection

Data are collected in Annual survey on construction works, Monthly report on construction permits and Annual report on demolished housing constructions and dwelling adaptations.

Coverage

Annual survey on construction works covers all construction works carried out by legal and physical entities engaged in construction activity, section Construction, (Classification of Activities, 2010), as well as legal entities not classified into construction activity, but that comprise units engaged in construction. Data on works carried out by sole proprietors are taken over from the records of construction permits.
Annual report on demolished housing constructions and dwelling adaptations covers demolished housing constructions, as well as buildings with one or more apartments adapted into non-residential premises. Reporting units are respective administrative bodies, as well as units that have available documentation on demolished constructions.

Definitions

Construction works value anticipates all construction materials applied and labour force used. The value does not include the costs of land, project design, supervision and VAT. The value of works relates to undertakings in referent year, i.e. accomplished and unaccomplished constructions. The works executed were presented by territory where construction sites are found and not by territory, i.e. place where contractor's head office is situated.
Dwelling is any residential construction unit intended for habitation, consisting of one or several rooms with necessary auxiliary spaces (kitchen, bathroom, lobby, pantry, toilet, etc.) or without auxiliary spaces, and with one or more separate entrances.

More detailed methodological explanations on construction statistics are found in the SORS edition Methodologies and standards, Annual survey on construction works, volume 21/07 and Monthly report on construction permits, volume 22/07 and Annual survey on demolished dwelling constructions and dwellings converted into business premises, volume 23/07.

HOUSING STOCK, CENSUS 2022

Sources and methods of data collection

Data on the housing stock are derived from the data of 2022 Census of Population, Households and Dwellings. Housing stock covers both occupied and vacant dwellings intended for permanent habitation. Housing stock excludes dwellings used on temporary basis for holiday and recreation, during seasonal works in agriculture, occupied business premises, premises occupied in case of need, collective dwellings and temporary bunkhouses.

Data on the basic characteristics of dwellings were collected in 2022 Population, Households and Dwellings Census. All dwellings in the Republic of Serbia are covered: inhabited dwellings, temporarily uninhabited dwellings, abandoned dwellings, dwellings used occasionally for vacation and seasonal work, and dwellings used exclusively for business. 2022 Census was not conducted in the territory of the Autonomous Province of Kosovo and Metohija

Definitions

Dwelling is taken to be any residential construction unit intended for habitation, consisting of one room or a suite of rooms with or without necessary accessories (such as: kitchen, bathroom, lobby, pantry, toilet, etc.) and with one or more separate entries.

Total dwelling area is the useful floor area measured inside of the dwelling walls and is the sum of the area of all the rooms, kitchen, bathroom, toilet, corridor and other accessories in the dwelling, including the area of the lobby, balcony and terraces.

In 2022 Census, the concept of "usual population" was applied to calculate the number of persons in a dwelling. The usual population of a particular place includes persons who have lived in that place continuously for at least 12 months prior to the critical moment of the census, as well as persons who have lived in that place for less than 12 months, but with the intention of staying there for at least one year.

A room is a space inside the housing unit, enclosed by walls, from floor to ceiling or roof, of height at least 2 meters and having at least 4 square meters (a bed for adults should be placed). Number of rooms excludes kitchen.

A dwelling has installations of electricity, water supply system, sewerage, distance / central heating if such installations are placed in at least one room of the dwelling, regardless whether connected to the public networks or not. A dwelling has gas installations only if the gas is supplied through the network.

More detailed methodological explanations for 2022 Census can be found in the Methodological Instructions for supervisors, coordinators and instructors implementing training and controlling the field implementation of the Census (Belgrade 2022).

13. TRADE

Author:
Miloš Vukmirović

Sources and methods of data collection

The data on the sale and purchase of the products of agriculture, forestry and fishing are collected in the Monthly survey on turnover of agricultural products of private production, in enterprises and cooperatives and in the Monthly survey on purchase of agricultural products from family holdings. The report sources are records and other documentation provided by legal persons, cooperatives and other respective organizations.

Coverage

Purchase and sale of agricultural, forestry and fishing produce include sale of own production of enterprises and cooperatives and purchase from family holdings, authorized for organizing further sale or processing.

Definitions

Under the term 'sold and purchased quantities' we anticipate the turnover, i.e. the delivery of agricultural products from own production of legal persons and cooperatives, as well as directly purchased quantities of agricultural products from family holdings, aimed at further selling or processing.

14. TOURISM

Authors:
Miloš Radojković
Dragana Gajić
Valentina Ilić
Kristina Vojinović

Sources and methods of data collection

The data on tourist arrivals and overnight stays are presented according to regular survey – Monthly survey on arrivals and overnight stays in tourist resorts, where accommodation services are rendered.

Data on tourist traffic (number of tourist arrivals and overnight stays) and accommodation capacities are published based on statistical processing of data taken from the administrative source, the Central Information System in Catering trade and Tourism (eTurist).

Coverage

By downloading data from the Central Information System in Catering trade and Tourism, full coverage of facilities providing catering and accommodation services is ensured, as well as all registered users of catering services in accommodation facilities, who are defined as tourists in accordance with the methodological framework of official tourism statistics.

Definitions

A tourist is any person who spends at least one night in the place of visit, outside of his residence, in a tourist accommodation facility for rest, recreation, or other reasons such as health, sports, education, religion, family, business, etc. Tourists' arrivals presents the number of tourists who registered and spent the night in a facility that provides accommodation services. The tourist registers in each catering facility (which provides commercial accommodation) in which he stays. Therefore, in case of changing object, it is re-recorded. Based on this, tourism statistics record the number of tourist arrivals, not the number of tourists. Tourist nights represent the number of registered tourist nights in facilities that provide accommodation services.

[1)] Average number of overnight stays is calculated by dividing number of overnight stays by number of tourists. As tourists are registered in each place where they stay, in case of changing place, data have been repeated, i.e. duplicated. Therefore, average number of overnight stays, calculated in this way, is probably smaller than real one.

[1)] Average number of overnight stays is calculated by dividing number of overnight stays by number of tourists. As tourists are registered in each place where they stay, in case of changing place, data have been repeated, i.e. duplicated. Therefore, average number of overnight stays, calculated in this way, is probably smaller than real one.

15. TRANSPORT AND COMMUNICATIONS

Autori:
Predrag Mutavdžić
Marija Dobrosavljević
Roksalana Đorđević

Sources and methods of data collection

The data on length of national roads, class I and class II are provided from the public enterprise "Roads of Serbia" and the respective municipal bodies and data on provincial (municipal) roads from regular annual surveys, provided by the respective municipal bodies.

Data on postal and telecommunications traffic were obtained from business entities registered in these areas, based on regular annual and quarterly statistical reports. Data on registered road motor vehicles and trailers were obtained from the registered vehicle file maintained by the Ministry of Internal Affairs.

Coverage

The funds, as well as postal and telecommunications traffic, refer to public postal and telecommunications traffic carried out by business entities in the field of postal and telecommunications traffic. Telephone subscribers include active connections of all legal entities and individuals owned by business entities, which are engaged in the provision of telephone services and owned by subscribers. All registered vehicles are included, except for vehicles of the Serbian Armed Forces, diplomatic and consular missions and vehicles registered with temporary plates. The PTT traffic of letter and parcel shipments includes only shipments sent domestically, and dispatched and arrived shipments in international traffic. Data on letters include printed matter, business papers, shipments for the blind and airmail. The circulation of newspapers and magazines is not shown by municipality, because this circulation is registered in dispatch only in places that have newspaper editorial offices, and in arrival as letter-carrying items.

Milica Gardović

Sources and methods of data collection

Data on preschool and tertiary education are collected through regular annual surveys, while data on primary and secondary education are taken from the Unified Information System of Education (UISE), managed by the Ministry of Education.

Coverage

Annual reports of Education Statistics cover preschool, primary, secondary and tertiary education, from the sector Classification of Activities – "Education". Data on pre-school, primary and secondary education and upbringing refer to the end of the school year, while data on students enrolled in higher education refer to the winter semester, in which the students were enrolled. Data on graduates refer to the calendar year.

Definitions

In education statistics, the term school refers to an educational institution or unit that carries out educational activities by implementing a curriculum. Every school unit is also shown as a school, regardless of whether it is an independent school, a regional department, or a department within another type of school.

Preschool education and upbringing involves the education of children of preschool age, that is, from the age of six months to the age of starting primary school. The providers of preschool education are preschool institutions.

Primary education is an activity of direct social interest and is carried out as a public service. In the Republic of Serbia, primary education is compulsory, lasts eight years and is carried out in two educational cycles. The first cycle includes the first, second, third and fourth grades, and the second includes the fifth, sixth, seventh and eighth grades.

Secondary education and upbringing activities are carried out in secondary schools, namely: high school; vocational school; art school; mixed school (high school and vocational or art school).

Students with disabilities acquire education, as a rule, in schools with other students, and when it is in the best interest for students, they attend schools for students with disabilities, in accordance with the Law.

Higher education is carried out through academic and vocational studies based on approved, or accredited, study programs for acquiring tertiary education. Tertiary education includes colleges, faculties and academies.

Maja Tošić
Milica Gardović

Sources and methods of data collection

The data on cinemas are taken over from the Centre for Study in Cultural Development of the Republic of Serbia.

Definitions

A cinema is a hall or open-air theatre equipped and envisaged for public film projections, regardless the fact it is an independent organization or a composite unit of some other organization. Included are regular cinemas (in permanently occupied halls), open-air cinemas and traveling cinemas.

Cinema performance is a public film projection (feature film projection) that lasts approximately two hours.

18. PUBLIC HEALTH

Autor:
MsC Gordana Bjelobrk

Sources and methods of data collection

Statistical data on health are taken over from the Institute of Public Health of Serbia "Dr Milan Jovanovic Batut".

Coverage

Data published in this chapter were compiled from health care institutions in the Republic of Serbia, which are included in the Plan of health institutions network. Figures on staff number are shown as of December 31.

19. JUSTICE ADMINISTRATION

Author:
Vesna Zajc

Sources and methods of data collection

Data on adult and minor persons sentenced by absolute decrees are compiled from the courts of general jurisdiction, in individual statistical questionnaire.

Coverage

Covered are all adult persons, i.e. minor persons pronounced guilty and convicted, to whom sentence was rendered and courts of general jurisdiction acknowledged as decree absolute, in the respective year.

Definitions

Adult person sentenced by decree absolute is a person aged 18 and over at the moment of criminal offence committal, and minor person sentenced by decree absolute is a person aged between 14 and 18.

19.1. SENTENCED ADULTS AND MINORS, BY PLACE OF COMMITTING CRIMINAL OFFENCE AND BY TYPE OF CRIMINAL OFFENCE, 2023
