INTRODUCTION

The Statistical Office of the Republic of Serbia releases the annual publication “Regions of the Republic of Serbia” that is a summarized overview of the major and most interesting regional statistical indicators, which in an expressive way show the social and economic development stage of the Serbian regions.

This publication is the abstracted presentation, also possibly regarded as a complement to the statistical data that SORS publishes in its yearbook “Municipalities and regions of the Republic of Serbia”; our aim being to provide information to the readers in an understandable and scientifically grounded popular manner.

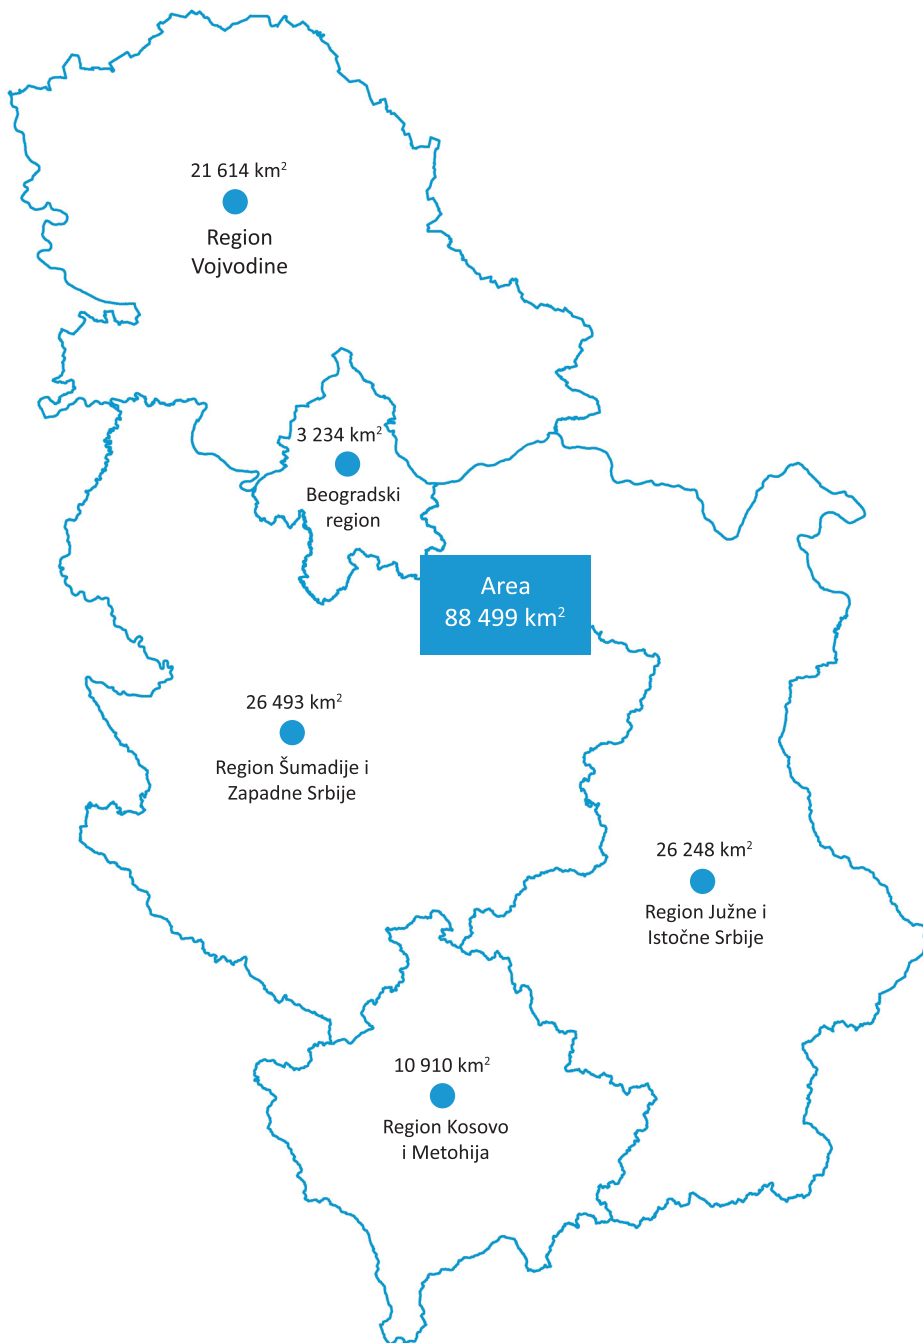

The balanced regional development, namely less expressive discrepancies in the GDP level and other measures of the economic and social development are of crucial importance for the long-term and sustainable overall development of the Republic of Serbia. The indispensable prerequisites for the anticipation and monitoring of the regional progress are reliable, scientifically grounded and internationally comparable statistical indicators; thereby acknowledged is the importance of SORS as the major information system for taking planning and strategic decisions in the domain of regional development.

Therefore, this publication may be regarded as another contribution that SORS makes in ensuring the information and data seen as essential for the domain of regional development, which are expected to find their way not only to the academic community and experts, but also to the widest range of readers interested in the issues related to the Serbian regional development.

Starting from 1999 SORS cannot provide available certain data for AP Kosovo and Metohija; therefore, they are not included in the data coverage for the Republic of Serbia – total.

CONSTRUCTION, 2023

The value of completed works in the territory of the Republic of Serbia in 2023 amounted to USD 717 461 million. Observed by regions, in 2023 the share in the works done was highest in Region Vojvodine (31.0%), then in Beogradski region (28.4%), following are Region Šumadije i Zapadne Srbije (25.2%), and Region Južne i Istočne Srbije (15.3%).

In 2023, by type of constructions, the value of works completed on buildings equalled 40.3%, and 59.4% equalled the value of other civil engineering works (transport infrastructure; pipelines, communication and electric lines; complex industrial structures; and other constructions, n.m.e). If only buildings are regarded, 40.1% of the completed works value concerns residential buildings, and 59.9% concerns non-residential buildings; as regards other constructions, the major part concerns transport infrastructure – 67.3% of the total value of other civil engineering works.

In 2023, the number of 35 652 dwellings was completed and the average floor space of them covered 75.5 m².

EXTERNAL TRADE IN GOODS, 2023

The exports value amounted to USD 30 938.3 million, which means it increased by 6.5% if related to the previous 2022 year, and the value of imports amounted to USD 39 839.1 million, which is less by 3.2% than in 2022, i.e. the previous year.

The exports value expressed in euros amounted to EUR 28 635.1 million, which means it increased by 3.7% if related to the previous year, 2022. The value of imports expressed in euros amounted to EUR 36 860.8 million, which is less by 5.5% than in the previous year.

Deficit amounted to USD 8 900.8 million, i.e. decreased by 26.4% when related to the previous year. Expressed in euros, deficit amounted to EUR 8 225.7 million, which is less by 27.9% if compared to the previous year.

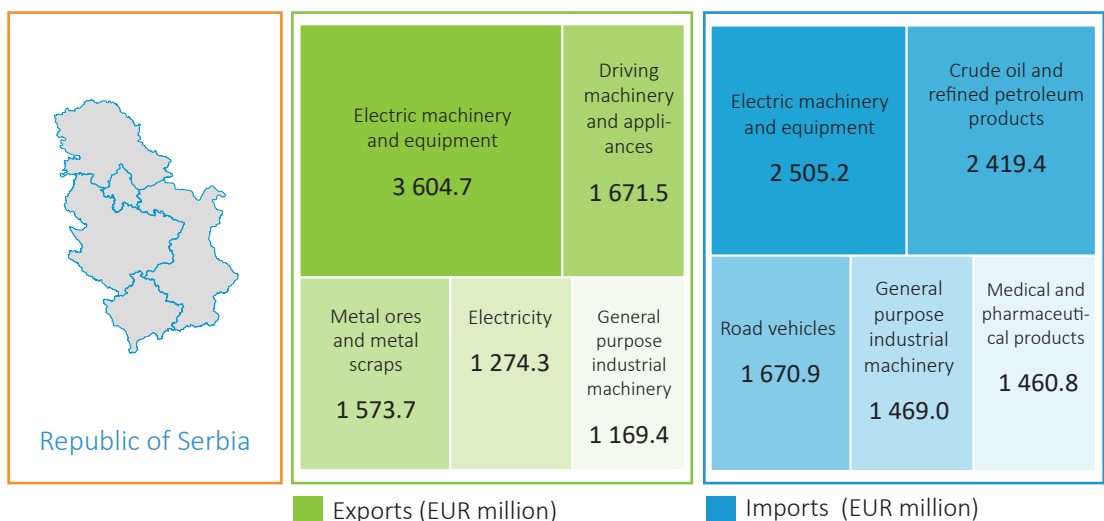

Exports – imports ration equalled 77.7%, and was higher than that in the previous year when it equalled 70.6%.

Exports and imports by regions were presented according to the head office location of the goods' proprietor in the moment of the acceptance of the customs document. This fact needs to be considered when interpreting the data by regions. For example, the data on imports of crude oil and gas are mostly collected in Region Vojvodine and Beogradski region; however, these are energy commodities concerning the total territory of Serbia.

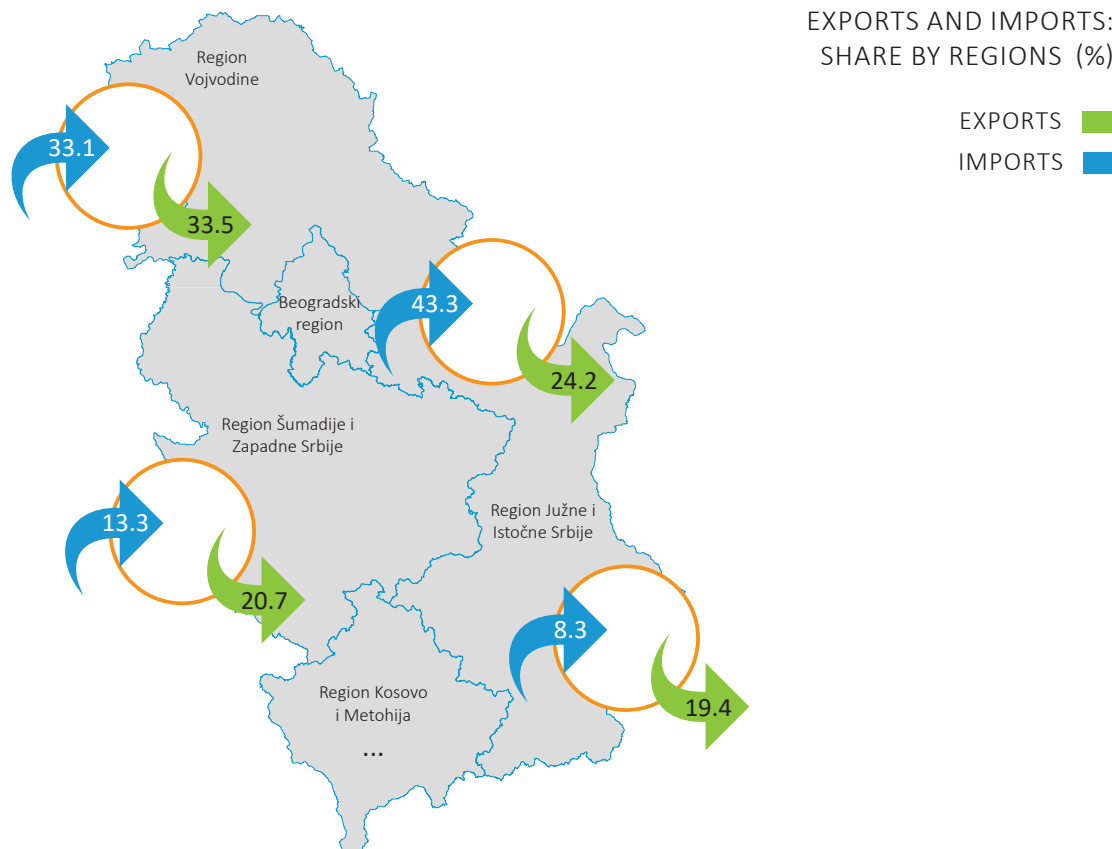

External trade in goods expressed the highest value with the countries that the Republic of Serbia has concluded free trade agreements. The EU Member States accounted for 59.7% of all trade.

The second by importance partner of Serbia are CEFTA countries that accounted for 9.3% of the total external trade in goods with Serbia, and with these countries constat suffices are expressive.

According to the Standard Trade Classification (SITC), exports of the first five sections made 32.4% of all exports. The imports value of the first five section equalled 25.8% of all imports. For the section "unclassified goods", where presently also goods from the customs warehouse and in the free zone are included, the share in the total imports equalled 11.8%.
