Upper secondary education

Beginning of 2023/2024 school year

Belgrade, 2024

Bulletin – Upper secondary education beginning of 2023/2024 school year

Issued and printed by: Statistical Office of the Republic of Serbia, Belgrade, Milana Rakića 5

Responsible person: Dr Miladin Kovačević, Director

Prepared by: Nadežda Bogdanović, Sava Bošković, Nedjelko Čalasan and Tatjana Žarić

Editorial board:

Chief editor: Vladimir Šutić

Members: Selena Marković, Tatjana Savić, Jasmina Kostić Simov and Sonja Radoičić

Translated by: Vesna Aralica

Design and editing: Division for statistical output development and visualization

PREFACE

In the bulletin “Upper Secondary Education – beginning of 2023/2024 school year” the Statistical Office of the Republic of Serbia publishes the results of the statistical survey on regular upper secondary education (without special needs education) at the beginning of the 2023/2024 school year.

From the beginning of the school years 2022/2023 and 2023/2024, the data on upper secondary education were obtained by retrieving those from the database of the Ministry of Education - unique information system of education (UISE). The Statistical Office of the Republic of Serbia conducted regular statistical surveys on upper secondary education till the beginning of the school year 2022/2023, included, when secondary schools transmitted statistical reports as of the beginning and end of the school year.

The statistical survey aims to provide indicators on regular upper secondary schools, classes, pupils and teachers, which are an important tool for monitoring the upper secondary education system.

All the data are presented at the level of the Republic of Serbia, statistical territorial units (NSTJ 3) and municipal level. Publishing of the bulletin started in the 1992/93 school year.

The Bulletin contains also general methodological explanations dedicated to help users understand and use the data correctly.

Since 1999, the Statistical Office of the Republic of Serbia has no available data for AP Kosovo and Metohia, therefore they are not included in the data for the Republic of Serbia (total).

Belgrade, 2024

Director
Dr Miladin Kovačević

Table 3. Classes and pupils, by fields of education, beginning of 2022/2023 school year	26

METHODOLOGICAL EXPLANATIONS AND REMARKS

LEGAL BASIS

The Survey on Upper Secondary Education is regulated by the Law on Official Statistics, “Official Journal of the RS”, number 104/09.

OBJECTIVE OF THE SURVEY

The objective of the survey is to provide data on the situation, structure and advancement of schools, and classes, as well as data on the structure and movement of pupils and teachers.

Education Statistics processes and publishes upper secondary schools data from administrative sources, schools whatever the field of education in selected types of schools. It has uniform main definitions and classifications that allow obtaining same-sex data on all the types of upper secondary schools. In that sense, the statistics of education is a unique and connected system that takes into account, based on appropriate methods and statistical procedures, the characteristics of selected types of schools.

SOURCES OF DATA

The data on upper secondary education are the result of the Unified Information System of Education (UISE), starting from the end of the 2022/2023 school year and the beginning of the 2023/2024 school year.

COVERAGE AND COMPARABILITY

The coverage in UISE is complete. Data in the register is filled in by each high school (public and private) for head school and for a class in another place - settlement (if the school operates away from its seat).

EXPLANATIONS ON SELECTED CONCEPTS AND CHARACTERISTICS

Upper secondary education provides knowledge and develops skills for employment and further education.

In education statistics, regular upper secondary school is any institution where upper secondary education is provided through a plan and curriculum. Classes of regular education in some other places – settlements (territorially separated classes) are shown as separate units (schools).

Upper secondary school can be established as a gymnasium (general and specialized type), art school, vocational school or mixed school (gymnasium and vocational or art school).

Gymnasiums provide general education in natural and social sciences for further education. Gymnasium education lasts four years. Upon completion of the fourth grade, pupils pass a general final year examination.

Art schools provide general and art four-year education for the purpose of performing corresponding professions and continuing education in tertiary education institutions. Upon completion of the fourth grade of upper secondary education, pupils pass an art final year examination.

Vocational schools provide general and vocational education lasting three or four years for the purpose of performing corresponding professions and continuing education in tertiary education institutions. Upon completion of the third, that is fourth grade, pupils pass a vocational final year examination. Vocational

are: construction, mechanical engineering, agriculture, forestry, health, economy, catering, commerce, transport schools, and others.

Military schools are organized as the Military Gymnasium and Secondary Vocational Military School.

Schooling in the Military Gymnasium lasts four years, and pupils follow a curriculum of general gymnasiums. Military Gymnasium prepares and motivates the pupils to continue schooling at military academies.

Schooling in the Secondary Vocational Military School lasts four years. The pupils follow a curriculum of military technical orientation for army air force and air warfare, and for the unit for electronic warfare.

A class is a group of pupils taught during the school year by several teachers successively.

A grade is the level of education providing pupils with a range of knowledge defined by the curriculum of a selected type of school during a certain period of time, at most during one school year.

The concept of pupils implies regular pupils. Regular pupils are persons enrolled in schools for the purpose of attending lectures.

Prior to the 1990/91 school year, pupils in upper secondary schools chose a selected profession/occupation. Starting from the 1990/91 school year, upper secondary education has been provided by fields of education, and within the latter by corresponding educational profiles.

The data in this bulletin correspond to the educational level USCED3 according to the international classification of education – ISCED2011.
