METHODOLOGICAL EXPLANATIONS

In 2024 the Statistical Office of the Republic of Serbia has conducted a major or benchmark revision of GDP, and of all domains of the national accounts system in accordance with the five-year cycle of revision of national accounts of all European countries under the supervision of Eurostat. An exemplary modification, specifically the enhancement of methodologies and data sources, pertains to the refinement of the calculation of Gross value added (GVA) for unincorporated enterprises. (sole proprietorships and partnerships). In this publication presented are the major macroeconomic indicators for unincorporated enterprises for 2024 in accordance with upgraded methodology and new data sources.

The major novelty concerning the methodology of calculation of indicators for unincorporated enterprises regards the estimation of the number of unincorporated enterprises. According to the new methodology, the calculation covers only those unincorporated enterprises that submitted the financial statements to the Business Register Agency and so-called flat rate sole proprietorships that provided resolutions on taxed income from the tax administration, and estimated tax and social contributions. All other registered unincorporated enterprises that are in an *idle* mode or state of temporary closure, in accordance with the new methodology are excluded from calculations and considered inactive, which resulted in considerably reduced number of unincorporated enterprises when compared to the calculations before the large revision.

The calculation of Gross value added (GVA) of unincorporated enterprises observes the income approach as the sum of mixed income of unincorporated enterprises and personnel costs (increased by net tax on production). The calculation of mixed income is carried out based on the data from financial statements of unincorporated enterprises (about 120 000, i.e. 50% of unincorporated enterprises) and the Tax authority data on taxable income of flat rate sole proprietorships. The number of employees is estimated on the basis of the data of the Central register of social contribution payers (CRSCP), and the Labour Force Survey as well (regarding informal, unregistered employment). Personnel costs are estimated based on the tax administration data on employees employed with unincorporated enterprises. The estimation of output, intermediate consumption and turnover is carried out on the basis of data (coefficients) of financial statements of unincorporated enterprises, as well as based on the data of financial statements of micro and small enterprises.

Upgraded data sources for unincorporated enterprises, in the first place financial statements of so-called 'book-keepers' that have become available since 2020, regarding scope, details, and coverage as well, ensured more accurate, precise and reliable estimation of macroeconomic indicators for unincorporated enterprises.

The processing results are provided for (1) number of unincorporated enterprises, (2) number of employees. (3) turnover and (4) Gross value added. From the viewpoint of territory, the data are expressed on the levels of 1 and 2 of the Nomenclature of statistical territorial units (*NSTJ*): Srbija – sever and Srbija – jug, (*NSTJ 1*), and on the level of regions (*NSTJ 2*): Beogradski region, Region Vojvodine, Region Šumadije i Zapadne Srbije, i Region Južne i Istočne Srbije.

Starting from 1999 the Statistical Office of the Republic of Serbia has not at disposal and may not provide available certain data relative to AP Kosovo and Metohija and therefore these data are not included in the coverage for the Republic of Serbia (total).

In accordance with the applicable territorial distribution and the Classification of Activities (2010), from the viewpoint of territory the data are expressed to the level of regions, *NSTJ 2*, the Nomenclature of statistical territorial units, and by activities to the level of sections, the Classification of Activities (2010), *NACE Rev. 2*:

- A Agriculture, forestry and fishing
- B Mining and quarrying
- C Manufacturing
- D Electricity, gas and steam supply
- E Water supply; sewerage, waste management and remediation activities
- F Construction
- G Wholesale and retail trade; repair of motor vehicles and motorcycles
- H Transportation and storage
- I Accommodation and food service activities
- J Information and communication
- K Financial and insurance activities
- L Real estate activities
- M Professional, scientific and technical activities
- N Administrative and support service activities
- O Public administration and defence; compulsory social security
- P Education
- Q Human health and social work activities
- R Art, entertainment and recreation
- S Other service activities
- T Activities of households as employers
- U Activities of extraterritorial organizations and bodies

The features are defined as follows:

- *Turnover* – receipts from sales (of goods, and products and services as well);
- *Gross value added (GVA)* (at basic prices), as difference between output and intermediate consumption.
